Contract Law in Poland

V&R unipress
Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of the law of property in Poland deals with the issues related to rights and interests in all kinds of property and assets – immovable, movable, and personal property; how property rights are acquired; fiduciary mechanisms; and security considerations. Lawyers who handle transnational disputes and other matters concerning property will appreciate the explanation of specific terminology, application,

and procedure. An introduction outlining the essential legal, cultural, and historical considerations affecting property is followed by a discussion of the various types of property. Further analysis describes how and to what extent legal subjects can have or obtain rights and interests in each type. The coverage includes tangible and intangible property, varying degrees of interest, and the various ways in which property is transferred, including the ramifications of appropriation, expropriation, and insolvency. Facts are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. The book

includes ample references to doctrine and cases, as well as to relevant international treaties and conventions. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for any practitioner faced with a property-related matter. Lawyers representing parties with interests in Poland will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative property law. Derived from the renowned multi-volume International Encyclopaedia of Laws, this concise exposition and analysis of the essential elements of law

with regard to family relations, marital property, and succession to estates in Poland covers the legal rules and customs pertaining to the intertwined civic status of persons, the family, and property. After an informative general introduction, the book proceeds to an in-depth discussion of the sources and instruments of family and succession law, the authorities that adjudicate and administer the laws, and issues surrounding the person as a legal entity and the legal disposition of property among family members. Such matters as nationality, domicile, and residence; marriage, divorce, and cohabitation; adoption and guardianship; succession and inter vivos arrangements; and the acquisition and administration of estates are all treated to a degree of depth that will prove useful in nearly any situation likely to arise in legal practice. The book is primarily designed to assist lawyers who find themselves having to apply rules of international private law or otherwise handling cases connected with Poland. It will also be of great value to students

and practitioners as a quick guide and easy-to-use practical resource in the field, and especially to academicians and researchers engaged in comparative studies by providing the necessary, basic material of family and succession law.

Kodeks cywilny sellier. european law publ. This excellent series presents comparative study, analysis and evaluation of 28 European legal systems in the field of transfer of movables. Major topics are the notion of ownership, the derivative acquisition of ownership (e.g. by a sales contract), the good faith acquisition of ownership and other property rights, the multiple sale of the same movable, the protection of possession, positive (acquisitive) prescription, and processing and consolidation. The work is based on comprehensive country reports (which are to be published) on the relevant legal rules in Europe and has the drafting and publication of text proposals of uniform European rules - with commentary and comparative notes - as its primary goal. It intends to influence the future development of European private law on the EU

Wpływają również bezpośrednio na sytuację jednostek - adresatów niekonstytucyjnych regulacji. W książce poruszono szereg fundamentalnych zagadnień dla doktryny i praktyki prawniczej: - Czym jest niekonstytucyjność prawa i jakie są jej przejawy? - W jaki sposób stwierdza się niekonstytucyjność prawa, na czym polega specyfika kontroli konstytucyjności norm prawa prywatnego, a także czy dopuszczalna jest w Polsce rozproszona kontrola zgodności prawa z Konstytucją? - Jakie są skutki wyroków TK dla systemu prawa i podmiotów prawa? Czy stwierdzenie niekonstytucyjności norm prawnych wpływa na

ważność czynności prawnych oraz skuteczność nabycia praw majątkowych? - Na czym polega restytucja konstytucyjności w stosunkach cywilnoprawnych po wyroku TK, a zwłaszcza jakie środki prawne mogą wykorzystać jednostki w celu ochrony swych wolności i praw? Rozprawa zawiera całościowe i wyczerpujące omówienie problematyki niekonstytucyjności prawa i jej skutków w sferze prawa cywilnego oraz w istotny sposób wzbogaca dorobek doktryny prawa konstytucyjnego i cywilnego. Kodeks cywilny Wydawnictwo Temida 2 This volume presents national reports describing the legal instruments that are available to prevent the payment of bribes for acquiring contracts. Anti-corruption is one of the preeminent issues in the modern global commercial order and is tackled with the help of criminal law and contract law in different ways in different countries. The reports included in this volume, from very diverse parts of the world, represent a unique and

rich compilation of court decisions, doctrinal discussions and a pool of suggested solutions. The central theme is the enforceability of three problematic types of contracts: the bribe agreement, whereby a bribe payer promises the agent of his business partner a personal benefit in exchange for favourable contract terms; the agreement between a bribe payer and an intermediary (a "bribe merchant"), where the latter offers his expertise to help funnel bribes to agents of the business partner; and finally, the contract between the bribe payer and his business partner which was obtained by means of bribery. The analysis is tailored toward commercial contracts, which can also include contracts with state-owned enterprises. The examination and comparison of international and national initiatives included in this volume advance the discussion on the most appropriate remedies in corruption cases, and show how to get past the boundaries of criminal, private and contract law. *Kodeks cywilny* Kluwer Law International B.V.  Defining where the needs of contracting parties end, and where the mistreatment of animals begins is especially difficult in contract law, where protecting animals is not a basic premise. Thus, although animal law is a widely discussed topic, the position of animals under civil law has not been discussed

comprehensively before. The first chapters of the book set the background for subsequent civil law considerations given that the object of a contractual obligation is an animal, and the impact this has on the conclusion, performance and consequences of non-performance of a contract. It constitutes a unique interdisciplinary and comparative work focused mainly on animals in contractual relations (e.g. sale, donation, lease, tenancy, commission, agency, safe-keeping, training contracts).
Tort Law in Poland, Germany and Europe
 Kluwer Law International B.V.
 This book examines the implications of Article 12 of the UN Convention on the Rights of Persons with Disabilities (CRPD), its resulting standard of protection for persons with disabilities and the way it is understood and implemented in its diverse signatory states. Its overarching theme is to assess the impact of CRPD Article 12 on the private law concept of legal capacity and its limitations, the significance of which carries over into the realm of penal law regulations.

Its impact is analysed primarily from the legal point of view, but with due regard for its psychological and psychiatric ramifications. Recognising the importance of these disciplines is important when implementing CRPD Article 12 into domestic law, as they contribute to the determinants in creating a qualificatory legal framework for all, persons with disabilities in particular, to exercise their rights to legal capacity without let or hindrance. As active legal capacity is a notion rooted in and coming from private law, this forms the main research perspective. The first section discusses the foundational concepts constituting the CRPD Article 12 standard from domestic private law and international law perspectives. The work shows that the concepts adopted in private law interact with the protection of persons with disabilities as victims provided for in criminal law. In addition, where relevant, authors also look at public law institutions that are connected with the private law solutions. The volume will be an essential reference for academics, researchers

and policy-makers working in the areas of private law, criminal law, mental health law, human rights, discrimination law as well as psychology and psychiatry.

Property and Trust Law in Poland Taylor & Francis

History is no longer the exclusive domain of historians, but is now often used as a tool for politics. It is not without reason that the term “state historical policy” has been coined, which must be a kind of aberration for those who believed that the role of history is to objectively determine the course of events. The fact is, however, that the distortion of historical facts, the concealment of crimes is now part of the “information war”.

Therefore, new acts of public international law, EU law and national law are introduced in order to combat public condonation, denial or gross trivialisation of the core international crimes which are certain forms and expressions of racism and xenophobia. States have to determine for themselves how they understand “denial” or “gross trivialization”, which may lead to abuse. In many cases, when

introducing criminal law provisions, States wish to decree historical truth, to establish once and for all the general facts and determine who was the victim, and who was the perpetrator. This does not have to be the result of bad will, but of a desire to exclude the possibility of nuance, which could turn into dangerous trivialisation. The aim of this publication is to specify the reasons for holding accountable for denial of international crimes, indicate legal obligations in this respect, look at the Polish case, both in terms of criminal provisions (partly repealed) and standards of a civil law nature, and compare the Polish regulation with the legal systems of other states, which were chosen because of the region (Central and Eastern Europe) or due to having current problems with denial of crimes or doubts about prosecution on this account.

Comparative Succession Law Walter de Gruyter

The contributions focus on succession and obligation law norms shaping the legal status of an heir and their comparison within Polish and German law systems. They analyse the

impact of the instruments of contract law on the status of an heir. The adopted methodology combining the internal-national and external-comparative perspective allows the authors to present “similarities in dissimilarities” within institutions of the German and Polish succession law. The broad analyses of legal doctrine and jurisprudence can serve as a source of knowledge and points of reference for legal practitioners, courts and legislators.

Intestate Succession

The regulation on defects of consent loses its usefulness and should be replaced by special regulations, more suited to the requirements of consumer e-commerce. The study’s main objective is to verify whether, due to the evolution of the concept of the declaration of intent, the emergence of non-individual consumer protection instruments, and technological developments the code regulation of defects in the declaration of will remains useful in the case of contracts concluded by consumers on the Internet. The impact of the development of the Internet environment on

the applicability and effectiveness of this traditional private institution is analyzed. Mechanisms that, in practice, displace the regulation of vice of consent are indicated.

Family and Succession

Law in Poland Kluwer Law International B.V. Intestate Succession is the second volume in the Comparative Succession Law series which examines the principles of succession law from a comparative and historical perspective. This volume discusses the rules which apply where a person dies either without leaving a valid will, or leaving a will which fails to dispose of all of the person's assets. Among the questions considered are the following: What is the nature of the rules for the disposal of the deceased's assets? Are they mechanical or is there an element of discretion? Are particular types of property dealt with in particular ways? Is there entitlement to individual assets (as opposed to money)? Do the rules operate in a parentelic system or a system of some other kind? Are spouses treated more favourably than children? What provision is made for extra-marital children,

for adopted children, for step-children? Does cohabitation give rise to entitlement? How are same-sex couples treated? Broader questions also arise of a historical and comparative nature. Where, for example, do the rules in intestate succession come from in particular legal systems? Have they been influenced by the rules in other countries? How are the rules explained and how are they justified? To what extent have they changed over time? What are the long-term trends? And finally, are the rules satisfactory, and is there pressure for their reform? As in the first volume, this book will focus on Europe and on countries which have been influenced by the European experience such as Australia, New Zealand, South Africa, the United States of America, Quebec, and the countries of Latin America. Further chapters are devoted to Islamic Law and Nordic law. Opening with a discussion on Roman law and concluding with an assessment of the overall development of the law in the countries surveyed, this book will provide a wider reflection on the nature and purpose of the law of intestate succession.

Wydawnictwo Naukowe Scholar
Derived from the renowned multi-volume International Encyclopaedia of Laws, this book provides ready access to how the legal dimension of prevention against harm and loss allocation is treated in Poland. This traditional branch of law not only tackles questions which concern every lawyer, whatever his legal expertise, but also concerns each person's most fundamental rights on a worldwide scale. Following a general introduction that probes the distinction between tort and crime and the relationship between tort and contract, the monograph describes how the concepts of fault and unlawfulness, and of duty of care and negligence, are dealt with in both the legislature and the courts. The book then proceeds to cover specific cases of liability, such as professional liability, liability of public bodies, abuse of rights, injury to reputation and privacy, vicarious liability, liability of parents and teachers, liability for handicapped persons, product liability, environmental liability, and liability connected

with road and traffic accidents. Principles of causation, grounds of justification, limitations on recovery, assessment of damages and compensation, and the role of private insurance and social security are all closely considered. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable resource for lawyers in Poland. Academics and researchers will also welcome this very useful guide, and will appreciate its value not only as a contribution to comparative law but also as a stimulus to harmonization of the rules on tort.

 How should a landowner

respond when a squatter occupies their land? This book discusses the issues focussing on vindicatio, possessory remedies and trespass, but also explores administrative procedures for their removal. In many cases, these actions derive from Roman laws, which are expertly explored in an introductory chapter. Also included is a chapter exploring human rights interventions in such actions. Twelve case studies offer an extensive and comparative analysis across sixteen European jurisdictions. The basic defendants covered are squatters taking over a home, environmental protesters, licensees and former tenants. The case studies include, amongst others, self-help; restitution; competing claims to ownership (and the relevance of registration systems to claims to ownership); adverse possession; neighbours; nuisance and encroachment.
Kodeks cywilny Centrum Naukowo-Badawcze Ochrony Przeciwpozarowej im. Józefa Tuliszkowskiego Państwowy Instytut Badawczy
 Derived from the renowned multi-volume International

Encyclopaedia of Laws, this practical analysis of the law of contracts in Poland covers every aspect of the subject - definition and classification of contracts, contractual liability, relation to the law of property, good faith, burden of proof, defects, penalty clauses, arbitration clauses, remedies in case of non-performance, damages, power of attorney, and much more. Lawyers who handle transnational contracts will appreciate the explanation of fundamental differences in terminology, application, and procedure from one legal system to another, as well as the international aspects of contract law. Throughout the book, the treatment emphasizes drafting considerations. An introduction in which contracts are defined and contrasted to torts, quasi-contracts, and property is followed by a discussion of the concepts of 'consideration' or 'cause' and other underlying principles of the formation of contract. Subsequent chapters cover the doctrines of 'relative effect', termination of contract, and remedies for non-performance. The second part of the book,

recognizing the need to categorize an agreement as a specific contract in order to determine the rules which apply to it, describes the nature of agency, sale, lease, building contracts, and other types of contract. Facts are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying

contexts will fully grasp their meaning and significance. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in Poland will welcome this very useful guide, and academics and

researchers will appreciate its value in the study of comparative contract law.
