Your Federal Income Tax for Individuals

Change Your Habits, Change You Eager to change the world? Learn how you can have a greater social impact through your everyday purchases. The money we routinely spend on food, clothes, gifts, and even indulgences is an untapped superpower. What would happen if we slowed down to make more thoughtful decisions about what we buy? For "mom and pop" stores across the country, and artisan and agricultural communities around the world, every purchase matters. Consumers--whether individuals, small businesses, or corporations--are paying more attention than ever to how their goods are made; and retailers--large and small--are responding by investing in ethical and eco-friendly production. Yet figuring out which brands to support can feel

overwhelming. Jane Mosbacher Morris has devoted her career to creating economic opportunities for vulnerable communities around the world, and in this valuable book, she shares her passion and insights on how we, as consumers, can create positive change too. Covering topics that range from why not all factories are evil, to how our morning coffee can be the easiest way for us to use our purchasing power for good, *Buy the Change You Want to See* makes us better informed consumers. Morris tells inspiring stories about how victims of human trafficking and natural disasters have been empowered by economic opportunity, and she offers practical ideas about how we can support these communities through our purchases--whether it comes to jewelry

made from recycled materials in Haiti, sustainably grown and ethically sourced coffee and chocolate from farmers in some of the poorest regions of the world, or mass-produced jeans and shoes made in factories where workers are guaranteed decent working conditions and a fair wage.

"This book of reprinted articles from the journal "L'Année Psychologique" as a whole constitutes a complete history and exposition of the Measuring Scale as Binet left it. In Chapter I the authors show the origin of the Scale and their first methods of attacking the problem. Chapter II describes the first results--a series of test questions arranged in order of difficulty but not yet assigned to

definite years. An immense amount of work had been done on this series, and the authors may have been justly proud of what they had accomplished, though it was soon to be largely discarded for a much more useful plan. This was the so called "1905 Tests." Chapter III shows the laborious and painstaking methods of standardization. Nowhere does Binet more clearly show his genius. It is here that he has taught us the method which must be used in all extensions or revisions of the Scale, that lay any claim to scientific value. In Chapter IV he gives us the Measuring Scale for Intelligence--the so called 1908 Scale. It is the most complete statement of the Scale. Chapter V gives some of his later 1911 corrections and revisions--his last word on the subject. In making up this book

we have attempted to include everything Binet and Simon wrote explanatory of the Scale. The reader will find many repetitions and some contradictions, and the date of each article should be taken into account in deciding which is the authoritative statement. It has been thought best to include all of these repetitions and contradictions, in order to show the development of Binet's own thought in regard to his Scale. Only in this way does the marvelous work that he did on this subject become fully appreciated"--Introduction. (PsycINFO Database Record (c) 2006 APA, all rights reserved).

Do You Want to Make a Permanent Change? This Time Can Finally Be

Different! Making a permanent change often feels outright impossible. Making one attempt after another, you fail and continue to fail, and it seems there's no way to make the change stick for longer than a couple of weeks. Perhaps...

except some people somehow manage to stick to their resolutions in the long term and their lives do get better - permanently. What makes the difference between those superheroes and "mere mortals"? More importantly, can the "mortals" acquire those superpowers, or should they accept that they'll never be able to permanently change their lives?

Written by bestselling author, Martin Meadows, *This Time Will Be Different: A Short Book on Making Permanent Changes* goes through a 4-step process called STAR that will take you on a

journey, from the moment you introduce a new change, all the way to how to live your life after you've successfully implemented it. Designed to be a short read packed with practical advice, you can finish the entire book in just one or two sittings and quickly begin to implement it in your own life. Here are just some of the things you'll learn from the book: - One motivator you might not have thought about that can mean the difference between failure and success. Don't proceed any further until you learn about it... - What motivational links are and why they're crucial if you want to introduce permanent changes. This unique concept alone can be enough to successfully implement a change in the long term. - How to gain traction when implementing new changes. Discover

CCC, a 2-step process designed to help you undergo an identity shift that leads to a permanent change. - 5 tools to help you persevere when you're struggling to stick to your new resolution. That's when most people give up. Avoid their fate by applying the strategies discussed in this chapter. - 3 core principles to live your success. It's not only about reaching success; it's also about maintaining it, which is often trickier than achieving it. Learn how to ensure permanent, long-term success. If you're tired of consistently unsuccessful attempts and itch for a permanent positive change in your life, buy this book now and learn how to finally make this time different! *Bee the Change You Want to See in the World* Independently Published
