ALANNAH KIRBY

[The Responsive University and the Crisis in South Africa](#) Springer
Over the last two decades, South Africa has accomplished enormous social progress by bringing to millions of citizens access to key public services. Nevertheless, growth has trended down markedly recently due to constraints on the supply side. Low growth has led to the stagnation of GDP per ...

Institutional Research in South African Higher Education BRILL

A series of essays taking an account of the milestones of South African democracy in order to give a multidimensional perspective of South Africa. The death of Nelson Mandela on 5 December 2013 was in a sense a wake-up call for South Africans, and a time to reflect on what has been achieved since 'those magnificent days in late April 1994' (as the editors of this volume put it) 'when South Africans of all colours voted for the first time in a democratic election'. In a time of recall and reflection it is important to take account, not only of the dramatic events that grip the headlines, but also of other signposts that indicate the shape and characteristics of a society. The New South African Review looks, every year, at some of these signposts, and the essays in this fourth volume of the series again examine and analyse a broad spectrum of issues affecting the country. They tackle topics as diverse as the state of organised labour; food retailing; electricity generation; access to information; civil courage; the school system; and - looking outside the country to its place in the world - South Africa's relationships with north-east Asia, with Israel and with its neighbours in the southern African region. Taken together, these essays give a multidimensional perspective on South Africa's democracy as it turns twenty, and will be of interest to general readers while being particularly useful to students and researchers.

Vocational Education and Training in Times of Economic Crisis African Books Collective

This book explores the student discontent a year after the start of the 2015 South African #FeesMustFall revolt. #FeesMustFall, the student revolt that began in October 2015, was an uprising against lack of access to, and financial exclusion from, higher education in South Africa. More broadly, it radically questioned the socio-political dispensation resulting from the 1994 social pact between big business, the ruling elite and the liberation movement. The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness politics and social movements of the international left. Yet, its objectives are more complex than those of earlier struggles. The student movement has challenged the hierarchical, top-down leadership system of university management and its 'double speak' of professing to act in workers' and students' interests yet entrenching a regressive system for control and governance. University managements, while on one level amenable to change, have also co-opted students into their ranks to create co-responsibility for the highly bureaucratized university financial aid that stands in the way of their social revolution. This book maps the contours of student discontent a year after the start of the #FeesMustFall revolt. Student voices dissect colonialism, improper compromises by the founders of democratic South Africa, feminism, worker rights and meaningful education. In-depth assessments by prominent scholars reflect on the complexities of student activism, its impact on national and university governance, and offer provocative analyses of the power of the revolt.

Breaking a Rainbow, Building a Nation Emerald Group Publishing
Breaking a Rainbow, Building a Nation is a first-hand account of the university protests that gripped South Africa between 2015 and 2017, widely better known as the #FeesMustFall. Chikane outlines the nature of student politics in the country before, during and after the emergence of #MustFall politics, exploring the political dynamics that informed and drove the student protests, and the effect that these #MustFall movements have had on the nature of youth politics in the country. Chikane looks at how the current nature of youth politics is different from previous youth upheavals that have defined South Africa, specifically due to the fact that the protests were being led by so-called coconuts, who are part of the black elite. Breaking a Rainbow, Building a Nation poses the provocative question, can coconuts be trusted with the revolution?

[Homeschooling High School](#) Springer

This state-of-the-art reference collection addresses the major themes, theories and key concepts related to higher education policy and governance on an international scale in one accessible volume. Mapping the field and showcasing current research and

theorizations from diverse perspectives and authoritative scholars, this essential guide will assist readers in navigating the myriad concepts and themes involved in higher education policy and governance research and practice. Split into two sections, the first explores a range of policy concepts, theories and methods including governance models, policy instruments, institutionalism and organizational change, new public management and multi-level governance. The second section addresses salient themes such as institutional governance, funding, quality, employability, accountability, university rankings, widening participation, gender, inequalities, technology, student involvement and the role of higher education in society. Global in its perspective and definitive in content, this one-stop volume will be an indispensable reference resource for a wide range of academics, students and researchers in the fields of education, education policy, sociology, social and public policy, political science and leadership.

Socio-Economic Perspectives on Vocational Skill Development: Emerging Research and Opportunities World Bank Publications
The second volume of the African Higher Education Dynamics Series brings together the research of an international network of higher education scholars with interest in higher education and student politics in Africa. Most authors are early career academics who teach and conduct research in universities across the continent, and who came together for a research project and related workshops and a symposium on student representation in African higher education governance. The book includes theoretical chapters on student organising, student activism and representation; chapters on historical and current developments in student politics in Anglophone and Francophone Africa; and in-depth case studies on student representation and activism in a cross-section of universities and countries. The book provides a unique resource for academics, university leaders and student affairs professionals as well as student leaders and policy-makers in Africa and elsewhere.

[South Africa Can Work](#) IGI Global

This is a guide to recommended practices for crime scene investigation. The guide is presented in five major sections, with sub-sections as noted: (1) Arriving at the Scene: Initial Response/Prioritization of Efforts (receipt of information, safety procedures, emergency care, secure and control persons at the scene, boundaries, turn over control of the scene and brief investigator/s in charge, document actions and observations); (2) Preliminary Documentation and Evaluation of the Scene (scene assessment, "walk-through" and initial documentation); (3) Processing the Scene (team composition, contamination control, documentation and prioritize, collect, preserve, inventory, package, transport, and submit evidence); (4) Completing and Recording the Crime Scene Investigation (establish debriefing team, perform final survey, document the scene); and (5) Crime Scene Equipment (initial responding officers, investigator/evidence technician, evidence collection kits).

[The Palgrave International Handbook of Higher Education Policy and Governance](#) Pan Macmillan South africa

This book asks how governments in Africa can use evidence to improve their policies and programmes, and ultimately, to achieve positive change for their citizens. Looking at different evidence sources across a range of contexts, the book brings policy makers and researchers together to uncover what does and doesn't work and why. Case studies are drawn from five countries and the ECOWAS (west African) region, and a range of sectors from education, wildlife, sanitation, through to government procurement processes. The book is supported by a range of policy briefs and videos intended to be both practical and critically rigorous. It uses evidence sources such as evaluations, research synthesis and citizen engagement to show how these cases succeeded in informing policy and practice. The voices of policy makers are key to the book, ensuring that the examples deployed are useful to practitioners and researchers alike. This innovative book will be perfect for policy makers, practitioners in government and civil society, and researchers and academics with an interest in how evidence can be used to support policy making in Africa. The Open Access version of this book, available at <https://doi.org/10.4324/9781003007043>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license

[Higher Education for Good](#) NYU Press

In what ways does access to undergraduate education have a transformative impact on people and societies? What conditions are required for this impact to occur? What are the pathways from an undergraduate education to the public good, including inclusive economic development? These questions have particular resonance in the South African higher education context, which is

attempting to tackle the challenges of widening access and improving completion rates in a system in which the segregations of the apartheid years are still apparent. Higher education is recognised in core legislation as having a distinctive and crucial role in building post-apartheid society. Undergraduate education is seen as central to addressing skills shortages in South Africa. It is also seen to yield significant social returns, including a consistent positive impact on societal institutions and the development of a range of capabilities that have public, as well as private, benefits. This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues.

[Student Politics in Africa](#) OECD Publishing

This book explores the evolution and current state of the scholarly field of comparative and international education over 200 years of development. Experts in the field explore comparative and international education in each of the major world regions.

Getting Skills Right: South Africa Chandos Publishing
This book is a collection of chapters based on original research dealing with issues of discipline and disciplinary practices in educational institutions. The aim of the book is to provide a scholarly and scientific perspective on the current state of discipline and disciplinary practices in schools and tertiary education settings. The issue of discipline is investigated from diverse paradigmatic and methodological perspectives, presenting empirical as well as also philosophical research. The empirical perspective includes quantitative (positivistic), qualitative (interpretive) and mixed methods (pragmatic), designs and worldviews. This book offers a ground-breaking contribution to the field of learner and student discipline, with insights into disciplinary practices and issues in educational institutions not hitherto researched, such as Technical Vocational Education and Training colleges and universities.

[New South African Review 4](#) AFRICAN SUN MeDIA

The Cape Peninsula University of Technology (CPUT) is one of four Universities of Technology established by the South African government in 2005 with a focus on vocational training. This book presents faculty experiences of CPUT's innovative, work-integrated learning and teaching model, as well as findings from practice-based research being done in the institution. The purpose of this volume is to be a resource for other institutions in South Africa that wish to try similar strategies, as well as a to trigger a community of practice with vocationally oriented institutions outside of South Africa.

[Twenty Years of Education Transformation in Gauteng 1994 to 2014](#) OECD Publishing

The goal of Perspectives on Student Affairs in South Africa is to generate interest in student affairs in South Africa. The papers contained herein are based on best practice, local experience and well-researched international and local theories. The papers in this book deal with matters pertaining to international and national trends in student affairs: academic development, access and retention, counselling, and material support for students coming from disadvantaged backgrounds. They are linked to national and international developments, as described in the first two papers. This publication will assist both young and experienced practitioners as they grow into their task of developing the students entrusted to them. All contributors are South Africans with a great deal of experience in student affairs, and all are committed to the advancement of student affairs in South Africa. The editors are former heads of student affairs portfolios at two leading South African universities.

[Faculty Perspectives on Vocational Training in South Africa](#) Multilingual Matters

In spite of the increasing attention attributed to the rise in prominence of the BRICS (Brazil, Russia, India, China and South Africa) countries, few studies have looked at the ways in which broader social expectations with respect to the role of higher education across the BRICS have changed, or not, in recent years. Our point of departure is that, contrary to the conventional wisdom focusing on functionalistic perspectives, higher education systems are not just designed by governments to fulfill certain functions, but have a tendency for evolving in a rather unpredictable fashion as a result of the complex interplay between a number of internal and external factors. In reality, national higher education systems develop and change according to a complex process that encompasses the expectations of governmental agencies, markets, the aspirations of the population for the benefits of education, the specific institutional traditions and cultures of higher education institutions, and, increasingly so, the interests and strategies of the private firms entering and offering services in the higher education market. This basically means that it is of utmost importance to move

away from conceiving of "universities" or "higher education" as single, monolithic actors or sector. One way of doing this is by investigating a selected number of distinct, but nonetheless interrelated factors or drivers, which, taken together, help determine the nature and scope of the social compact between higher education (its core actors and institutions) and society at large (government, industry, local communities, professional associations).

[Financing Higher Education in Africa](#) Unisa Press

The training and development of human capital in Sub-Saharan Africa (SSA) will help countries in the region diversify their economies, carry out economic transformation, and support sustainable growth. Higher education plays a key role in training qualified individuals who will be able to implement new technologies and use innovative methods to establish cost-efficient and effective enterprises and institutions. However, in order for SSA to reap the benefits of this investment in human capital, higher education institutions must secure financing to provide quality training and sound professional prospects to their students. Currently, tertiary education development is unsustainable as resources per student are declining and the quality of education is affected. These issues are particularly pressing in times of financial global crisis, when available resources for tertiary education tend to diminish. The impact of the crisis that started in 2008 provides a clear illustration of the need to explore innovative ways to diversify and secure financing for higher education in SSA. 'Financing Higher Education in Africa' provides a comprehensive overview of higher education financing in SSA. The book begins with an explanation of the fundamental problems faced by higher education institutions and students in SSA, namely the combined pressure of a rapid growth in demand and a growing scarcity of public resources, and it presents the dramatic consequences of these trends on quality. The book then turns to analyzing and comparing the current funding policies in SSA countries and it provides recommendations for improvement. Finally, the book examines the alternatives to the status quo and the policy tools needed to both diversify resources and allocate them based on performance. It will be of great interest to governments, universities, research institutions, and international organizations throughout the region.

[Access to Success and Social Mobility through Higher Education](#) MIT Press

Reflections of South African Student Leaders 1994-2017 brings together the reflections of twelve former SRC leaders from across the landscape of South African universities. Reviews of the previous volume, 1981-2014 suggested that it contributed significantly to a better understanding of the stringent demands of visionary and transformative leadership required by university leaders in the fastchanging and increasingly complex public higher education sector. This volume is based on comprehensive

interviews with former student leaders, each of whom provided a personal account in their own words of their experience in the position of student leadership. The interviewees are from different backgrounds and of diverse political persuasions. The book is important for current and future leaders of higher education institutions as it provides insights into the thinking, aspirations, desires, fears and modus operandi of student leaders. Such insight can contribute to developing and implementing appropriate strategies for achieving meaningful and constructive engagement with current and future student leaders.

[A scholarly inquiry into disciplinary practices in educational institutions](#) Springer

This report finds that, when compared internationally, England achieves a high rate of student retention. However the variation between retention rates of different institutions and the worsening of some institution's continuation rates shows that there is scope for further improvement. This will be increasingly important as access to further education is broadened, bringing in students who are likely to need more support. Amongst the recommendations are: the monitoring of retention at student, faculty and course level; the use of early-leaver surveys when problems are identified; more positive student support that emphasises ways to improve grades; identification of students eligible for Disabled Students' Allowances; the adoption of good practice from other institutions.

[Quarterly Bulletin](#) Penguin Random House South Africa

As the twenty-first century unfolds, African universities, and indeed universities everywhere, are undergoing unprecedented change and confronting multiple challenges brought about by the vast and complex processes of globalisation and technological change. Powerful internal and external forces - political, pecuniary and paradigmatic - are reconfiguring all aspects of university life constituted around the triple mission of teaching, research and service. The need for redefining the role and defending the importance of universities has never been greater. How are African universities trying to balance the demands of autonomy and accountability, expansion and excellence, equity and efficiency, diversification and differentiation, internationalisation and indigenisation in the face of liberalisation and privatisation, and as they address the new challenges of knowledge production and dissemination, of Africanising global scholarship and globalising African scholarship? What innovative approaches can they adopt to facilitate the sustainable development of African economies, societies and polities? The two volumes in the Codesria Book Series address these issues. They articulate new values and missions for African universities, and define effective strategies to meet the challenges. Written by some of Africa's leading educators, Volume I examines the implications of the neo-liberal reforms and the new information technologies on African higher education, while Volume II interrogates the changing social dynamics of knowledge production, university

organisation, and public service and engagement.

[Comparative and International Education](#) UNESCO

Wide-ranging essays demonstrate how the consequences of inequality extend throughout society and the political economy. Despite the transition from apartheid to democracy, South Africa is the most unequal country in the world. Its extremes of wealth and poverty undermine intensifying struggles for a better life for all. The wide-ranging essays in this sixth volume of the New South African Review demonstrate how the consequences of inequality extend throughout society and the political economy, crippling the quest for social justice, polarising the politics, skewing economic outcomes and bringing devastating environmental consequences in their wake. Contributors survey the extent and consequences of inequality across fields as diverse as education, disability, agrarian reform, nuclear geography and small towns, and tackle some of the most difficult social, political and economic issues. How has the quest for greater equality affected progressive political discourse? How has inequality reproduced itself, despite best intentions in social policy, to the detriment of the poor and the historically disadvantaged? How have shifts in mining and the financialisation of the economy reshaped the contours of inequality? How does inequality reach into the daily social life of South Africans, and shape the way in which they interact? How does the extent and shape of inequality in South Africa compare with that of other major countries of the global South which themselves are notorious for their extremes of wealth and poverty? South African extremes of inequality reflect increasing inequality globally, and The Crisis of Inequality will speak to all those general readers, policy makers, researchers and students who are demanding a more equal world.

[Reflections of South African Student Leaders: 1994 to 2017](#) African Sun Media

Prospective homeschoolers are parents looking for an alternative to the mainstream educational system for their offspring. But homeschooling children at high school level strikes fear into even the most dedicated of homeschoolers. They need information and answers to their questions. And with the current educational and unemployment problems in South Africa, young people need clear direction and guidance to help them achieve their goals. In addition to exploring the popular ways to gaining a recognised matric certificate outside the formal school system, Homeschooling High School also challenges readers to rethink their values, particularly the value they place on certification, and to consider some unconventional or alternative paths to success. In a clearly presented format, the book includes advice on legal matters, identifying appropriate courses, sourcing study material, tips on entrepreneurship, financing tertiary studies and the testimonies of successful homeschooled graduates. Homeschooling High School is a comprehensive guide to plotting a path through high school and beyond.
