Questions and Answers (MCQs)

Scientific Publishers - Competition Tutor

The book entitled "Basic Concepts of Plant Biotechnology (with MCQs)" has been publishing when the recombinant

DNA and sequencing of human and many plant genomes have been completed. This book contains almost 3000 multiple choice questions as well as fill in the blanks with answers covering all aspects of molecular biological systems of prokaryotes and eukaryotes. In writing the first edition, the aim is to provide all simple and difficult questions for weak students in plant molecular biology that have no more knowledge and have more problems in solving the questions. Therefore, in this book we included questions belongs to all basic concept of molecular biology which will provide strong knowledge to students preparing for competitive exams of life science like CSIR-NET, DBT-JRF, ICMR-JRF, ICAR-NET, ARS, PSC, graduate and post-graduate

exams.

Microbiology Arihant Publications India limited

It is specifically designed to boost the cutting edge knowledge of students and improve their focus on the next generation developmental skills on Microbiology for making it as their carrier. This book can bring a light for the students, those are going to write in the CSIR-UGC NET, ICMR-NET, DBT-JRF, PG-Combined entrance exams, ICAR-NET, ASRB-NET, GATE, SLET, SAUs and other combined entrance examinations. All the questions of this book are assembled from standard textbooks of microbiology covering all the area of microbiology. The authors hope this book will surely assist the young minds to crack the examinations in a easy and

simple way and will definitely useful to the researchers to clarify the doubts that often come during the research work. We also request and welcome our judging audience (readers) to send their valuable suggestions for further improvement of this book.

One can use this book as a study guide, knowledge test questions bank, practice test kit, quiz book, trivia questions . . . etc. The strategy used in this book is the same as that which mothers and grandmothers have been using for ages to induce kids in the family to sip more soup (or some other nutritious drink). The children are told that some cherries (their favourite noodles or cherries) are hidden somewhere in the bowl, and that serves as an incentive for drinking the soup. In joint families, by the time the children are old enough to know the trick played by their grandma, there is usually another group of kids ready to fall for it! They excite the kids, but the real nutrition lies not in the noodles but in the soup. The problems given in this

book are like those noodles/cherries while solving all these problems are nutritious soup. Now it is your choice to drink the nutritious soups or not!!!.
