Cinema has been long associated with France, dating back to 1895, when Louis and Auguste Lumi_re screened their works, the first public viewing of films anywhere. Early silent pioneers Georges MZli_s, Alice Guy BlachZ and others followed in the footsteps of the Lumi_re brothers and the tradition of important filmmaking continued throughout the 20th century and beyond. In Encyclopedia of French Film Directors, Philippe Rège identifies every French director who has made at least one feature film since 1895. From undisputed masters to obscure one-timers, nearly 3,000 directors are cited here, including at least 200 filmmakers not mentioned in similar books published in France. Each director's entry contains a brief biographical summary, including dates and places of birth and death; information on the individual's education and professional training; and other pertinent details, such as real names (when the filmmaker uses a pseudonym). The entries also provide complete filmographies, including credits for feature films, shorts, documentaries, and television work. Some of the most important names in the history of film can be found in this encyclopedia, from masters of the Golden Age_Jean Renoir and RenZ Clair_to French New Wave artists such as Fran_ois Truffaut and Jean-Luc Godard.

Some time in the 1840s, Narcisse, a young French sailor is abandoned on the coast of Australia and given up for dead by his shipmates. Seventeen years later he is found living among aboriginal peoples, having apparently forgotten everything of his original identity, including his native French language. Octave de Vallombrun, a well-meaning geographer, takes him under his wing and sets out to bring Narcisse, now known as the "white savage" back to civilisation and to find out what happened during those seventeen years.Observing Narcisse's struggle to adjust to the ways of the white man, Octave too begins to question his assumptions about what it means to be civilised, and to see in a new light the man known as the "white savage".

The Classic French Reader ... Or, Beauties of the French Writers ... London : J. Murray

"Moll Flanders is a novel by Daniel Defoe, first published in 1722. It purports to be the true account of the life of the eponymous Moll, detailing her exploits from birth until old age.By 1721, Defoe had become a recognised novelist, with the success of *Robinson Crusoe* in 1719. His political work was tapering off at this point,

due to the fall of both Whig and Tory party leaders with whom he had been associated; Robert Walpole was beginning his rise, and Defoe was never fully at home with the Walpole group. Defoe's Whig views are nevertheless evident in the story of Moll, and the novel's full title gives some insight into this and the outline of the plot"

Le petit bar des rhums arrangés Oxford University Press

In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

Le docteur Martin Hatch possède une île, Ragged Island, au large des côtes du Maine. La légende veut qu'un pirate y ait enterré son trésor au fond d'un puits. Aussitôt qu'on cherche à le forcer, celui-ci s'emplit d'eau de mer, balayant au passage hommes et machines. Le grand-père de Martin s'y est ruiné et son frère y est mort. Le directeur d'une société de récupération d'épaves convainc pourtant Martin de participer à son expédition. Celle-ci réunit les meilleurs scientifiques, bénéficie de fonds importants et, surtout, détient le journal codé de l'architecte qui, trois siècle plus tôt, a construit le puits pour le compte du pirate. Les premiers jours, le puits a l'air bien vulnérable face à toutes les machines et ordinateurs déployés sur l'île. Mais le code du journal de l'architecte résiste au décryptage. Et, dès que commencent les travaux d'assèchement, incidents puis accidents se succèdent. On finirait par croire le puits animé par un esprit démoniaque. La peur s'installe. Petit à petit, le piège de l'architecte se referme sur l'équipe...
