The demand for academic coursework and corporate training programs using the Internet and computer-mediated communication networks increases daily. The development and implementation of these new programs requires that traditional teaching techniques and course work be significantly reworked. This handbook consists of 20 chapters authored by experts in the field of teaching in the online environment to adult students enrolled in graduate university degree programs, corporate training programs, and continuing education courses. The book is organized to first lay a conceptual and theoretical foundation for implementing any online learning program. Topics such as psychological and group dynamics, ethical issues, and curriculum design are covered in this section. Following the establishment of this essential framework are separate sections devoted to the practical issues specific to developing a program in either an academic or corporate environment. Whether building an online learning program from the ground up or making adjustments to improve the effectiveness of an existing program, this book is an invaluable resource.--From Amazon.

From William Horton -- a world renowned expert with more than thirty-five years of hands-on experience creating networked-based educational systems -- comes the next-step resource for e-learning training professionals. Like his best-selling book *Designing Web-Based Training*, this book is a comprehensive resource that provides practical guidance for making the thousand and one decisions needed to design effective e-learning. *e-Learning by Design* includes a systematic, flexible, and rapid design process covering every phase of designing e-learning. Free of academic jargon and confusing theory, this down-to-earth, hands-on book is filled with hundreds of real-world examples and case studies from dozens of fields. "Like the book's predecessor (*Designing Web-based Training*), it deserves four stars and is a must read for anyone not selling an expensive solution. -- From *Training Media Review*, by Jon Aleckson, www.tmreview.com, 2007

Demonstrates how critical race theory can be useful in real-world situations. Rooted in the initial struggle of community members who staged a successful hunger strike to secure a high school in their Chicago neighborhood, David Omotoso Stovall's *Born Out of Struggle* focuses on his first-hand participation in the process to help design the school. Offering important lessons about how to remain accountable to communities while designing a curriculum with a social justice agenda, Stovall explores the use of critical race theory to encourage its practitioners to spend less time with abstract theories and engage more with communities that make a concerted effort to change their conditions. Stovall provides concrete examples of how to navigate the constraints of working with centralized bureaucracies in education and apply them to real-world situations.
