(Educational Piano Library). This book is meant to assist teachers who wish to introduce their students to creative composition but have limited lesson time available and feel the need for some direction in starting and continuing the process successfully. The process involves devoting as little as five minutes of lesson time to composition, but at every lesson over a period of, for example, six to eight weeks. Suggestions in the concise Lesson Plans help bring about gradual changes or improvements from week to week that are enough to keep the piece developing, and, more importantly, to keep the student immersed and motivated in the process.

Sonic Signatures is devoted to the representation of sound patterns and sound structures across a diverse range of typologically distinct languages with the overall aim of understanding the nature of linguistic data structures from a principled balance between representational economy and the interfaces of phonology with other domains, including acoustic and visual. The volume embraces data spanning from Nivkh vowel harmony to Maxakalí sign language, and from the representation of consonant clusters in adult Laurentian French and to those found in child Greek and child Brazilian Portuguese. The volume strives towards concrete commitments to the theoretical understanding of empirical territory both familiar but with a novel take (English stress) and novel but with immediate relevance (Hungarian suffix allomorphy). With authors contributing from five continents, the book offers a range of perspectives on the representation of sound patterns, while nonetheless retaining a tight focus on the core questions of which characteristics and signatures are specifically encoded for these patterns in the phonological component of the language faculty.

Since the first commercial cruises began in the 1840s, ships have evolved into one of the world's most sophisticated, specialized, complex, and expensive type of vessel. The large modern purpose-built cruise ships of the 1930s, the German KdF ships Wilhelm Gustloff and Robert Ley emerged as prototypes for carrying a mass-market clientele. At the other end of the scale, the exquisite 1927-built Norwegian cruise yacht Stella Polaris represents a smaller, elite type of vessel offering the ultimate in luxury. In the postwar years, the two ends of the industry have expanded dramatically and the myriad of ships built are described in detail. Analyses of design influences, descriptions of interior layouts, exterior design, machinery requirements, and cruising grounds

Due to shifts in the contexts of the production and presentation of the music video, more and more people start to talk about a possible end of this genre. At the same time disciplines such as visual-, film- and media-studies, art- and music-history begin to realize that despite the fact that the music video obviously has come of age, they still lack a well defined and matching methodical approach for analyzing and discussing video clips. For the first time this volume brings together different disciplines as well as journalists, museum curators and gallery owners in order to take a discussion of the past and present of the music video as an opportunity to reflect upon suited methodological approaches to this genre and to allow a glimpse into its future.

This collection explores how situations of authority, governance, and influence were practised through both gender ideologies and affective performances in medieval and early modern England. Authority is inherently relational it must be asserted over someone who allows or is forced to accept this dominance. The capacity to exercise authority is therefore a social and cultural act, one that is shaped by social identities such as gender and by social practices that include emotions. The contributions in this volume, exploring case studies of women and men's letter-writing, political and ecclesiastical governance, household rule, exercise of law and order, and creative agency, investigate how gender and emotions shaped the ways different individuals could assert or maintain authority, or indeed disrupt or provide alternatives to conventional practices of authority.
