Enter the "fascinating" and frightening world of modern forensic psychology as experienced by one of the most respected practitioners in the field today (Robert K. Tanenbaum, New York Times–bestselling author). At the heart of countless crimes lie the mysteries of the human mind. In this eye-opening book, Dr. Cheryl Paradis draws back the curtain on the fascinating world of forensic psychology, and revisits the most notorious and puzzling cases she has handled in her multifaceted career. Her riveting, sometimes shocking stories reveal the crucial and often surprising role forensic psychology plays in the pursuit of justice—in which the accused may truly believe their own bizarre lies, creating a world that pushes them into committing horrific, violent crimes. Join Dr. Paradis in a stark concrete cell with the indicted as she takes on the daunting task of mapping the suspect's madness or exposing it as fakery. Take a front-row seat in a tense, packed courtroom, where her testimony can determine an individual's fate—or if justice will be truly served. The criminal thought process has never been so intimately revealed—or so darkly compelling—as in this "excellent and entertaining" journey into the darkest corners of the human mind (Booklist).

A down-to-earth guide that syncs theology with technology. Today

Sunday morning worship competes with youth soccer, Starbucks, Facebook, and the allure of being "spiritual but not religious." To share the gospel in a world like this, Christians need to reach beyond the boundaries of concrete and virtual communities to become evangelists. That takes faith. It also requires skill with public relations, social media, traditional print materials and other techniques to increase church visibility. The authors, both recognized experts and consultants, walk readers through the theology of church communications and introduce steps to help us deliver clutter-busting messages to reach our technologically sophisticated and faith-challenged world.

Yeshua of Nazareth has two sisters: Damaris, married to a wealthy merchant's son, and Pheodora, married to a simple shepherd from Bethlehem. When Pheodora's husband suffers an unexpected reversal of fortune and is thrown into debtor's prison, she returns to Nazareth, where she pins her hopes on two she-goats who should give birth to spotless white kids that would be perfect for the upcoming Yom Kippur sacrifice. In the eighteen months between the kids' birth and the opportunity to sell them and redeem her husband from prison, Pheodora must call on her wits, her family, and her God in order to provide for her daughters and survive. But when every prayer and ritual she knows is about God's care for Israel, how can she trust that God will hear and help a lowly shepherd's wife?

"Informed by student data, *Experience Psychology* helps students understand and appreciate psychology as an integrated whole. The personalized, adaptive learning program, thought-provoking examples, and interactive assessments help students see psychology in the world around them and experience it in everyday life. *Experience Psychology* is about, well, experience-

our own behaviors; our relationships at home and in our communities, in school, and at work; and our interactions in different learning environments. Grounded in meaningful real-world contexts, *Experience Psychology's* contemporary examples, personalized author notes, and applied exercises speak directly to students, allowing them to engage with psychology and to learn verbally, visually, and experientially—by reading, seeing, and doing. Function is introduced before dysfunction, building student understanding by looking first at typical, everyday behavior before delving into the less common—and likely less personally experienced—rare and abnormal behavior. *Experience Psychology* places the science of psychology, and the research that helps students see the academic foundations of the discipline, at the forefront of the course. With *Experience Psychology*, students do not just "take" psychology but actively experience it!"

Konduru was first published in 1971. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions. This is a detailed anthropological description and analysis of life in Konduru, a village in the central part of southern India about one hundred miles south of Hyderabad. The study is based on field work done by Professor Hiebert over a period of several years when he lived in the village, spoke its language, Telugu, and became closely acquainted with the people and their culture. After sketching the geographic and historical setting of the village, Professor Hiebert describes and discusses the social structure, including the societal categories, the various castes, the social groups including family, patrilineage, associations, and communities, and hamlets, villages, and towns in the region. There are chapters on status and power, networks of interpersonal relationships, panchayats (the system of justice), and rituals. Finally, the author discusses changes which are taking place in the society and culture of Konduru and presents his conclusions. He points out that this study of Konduru illustrates the importance of the village within the social order but at the same time demonstrates that the village cannot be understood apart from the other social groups in which its members are involved and interrelated, and that these relationships are neither static nor simple. But, as he concludes, the village is, for the individual, the concrete expression of his society. The book is illustrated with photographs, maps, and drawings. E. Adamson Hoebel, Regents' professor of anthropology at the University of Minnesota, writes a foreword.

Unfamiliar Relations restores the family and its many forms and meanings to a central place in the history of South Asia between the seventeenth and nineteenth centuries. In her incisive introduction, Indrani Chatterjee argues that the recent wealth of scholarship on ethnicity, sexuality, gender, imperialism, and patriarchy in South Asia during the colonial period often overlooks careful historical analysis of the highly contested concept of family. Together, the essays in this book demolish "family" as an abstract concept in South Asian colonial history, demonstrating its exceedingly different meanings across temporal and geographical space. The scholarship in this volume reveals a far more complex set of dynamics than a simple binary between indigenous and colonial forms and structures. It approaches this study from the pre-colonial period on, rather than backwards as has been the case with previous scholarship. Topics include a British colonial officer who married a Mughal noblewoman and converted to Islam around the turn of the nineteenth century, the role gossip and taboo play in the formation of Indian family history, and an analysis of social relations in the penal colony on the Andaman Islands.
