<b>Michelin Auvergne / Rhone-Valley</b> Michelin Local Maps From the renowned psychologist who introduced the world to "growth mindset" comes this updated edition of the million-copy bestseller—featuring transformative insights into redefining success, building lifelong resilience, and supercharging self-improvement. "Through clever research studies and engaging writing, Dweck illuminates how our beliefs about our capabilities exert tremendous influence on how we learn and which paths we take in life."—Bill Gates, GatesNotes "It's not always the people who start out the smartest who end up the smartest." After decades of research, world-renowned Stanford University psychologist Carol S. Dweck, Ph.D., discovered a simple but groundbreaking idea: the power of mindset. In this brilliant book, she shows how success in school, work, sports, the arts, and almost every area of human endeavor can be dramatically influenced by how we think about our talents and abilities. People with a fixed mindset—those who believe that abilities are fixed—are less likely to flourish than those with a growth mindset—those who believe that abilities can be developed. Mindset reveals how great parents, teachers, managers, and athletes can put this idea to use to foster outstanding accomplishment. In this edition, Dweck offers new insights into her now famous and broadly embraced concept. She introduces a phenomenon she calls false growth mindset and guides people toward adopting a deeper, truer growth mindset. She also expands the mindset concept beyond the individual, applying it to the cultures of groups and organizations. With the right mindset, you can motivate those you lead, teach, and love—to transform their lives and your own.

It is no secret that we humans have a special relationship with the animal world. According to statistics, 63 per cent of all households have at least one pet. In 2004 alone American pet-owners plunked down \$36 billion worth of pet product expenditures. More money was spent in 2004 on pet food than on baby food. In a recent survey about attitudes fully 70 per cent of respondents identified the family pet as a "œmember of the family." On the other hand, millions of cows and chickens are unceremoniously slaughtered each year to feed our unappeasable lust for "Whoppers" and "McNuggets." The world waits breathlessly transfixed on the latest news of a single whale foundering in the surf. Meanwhile millions of tons of fish are hauled from the ocean by commercial fishermen. As Erika Ritter explores in this fresh, fascinating and eye-opening new book, at the heart of this relationship is a paradox—a relationship that is almost schizophrenic in its absurdity: we humans are animals, too. How to account for how and why we have developed this odd relationship with our "œfellow" animals. Through interviews conducted around the world with philosophers, scientists, farmers, poets, pundits and commentators, Ritter makes her way through this strange maze of human contractions about our animal brethren to produce a work that reveals as much about "œus" as about "œthem."
