Old stones, however intriguing, are difficult to interpret, dusty, and do not fit well in the neatly ordered contents of a house of

learning. Archaean geology, which is the study of the Earth's history in the period from after 9 the end of planetary accretion (4.5-4.4 x 10 years ago) up to the beginning 9 of the Proterozoic (2.5 x 10 years ago) is much the same - a parcel of old stones seemingly impossible to understand. Yet these stones contain the history of our origins: they can tell us a story that is interesting not just to the geologist (for whom this book is primarily written) but instead

addresses the human condition in general. *General Science for Competitive Exams - SSC/ Banking/ Railways/ Defense/ Insurance* Random House India This literature-centered study offers an interdisciplinary approach to Romantic culture. It is pioneering in that it employs the complexity method of anthropology. Recent literary studies employ the complexity/chaos theory adapted from the natural sciences; however, here is presented for the first

time a complexity method taken from the social/human sciences. This complexity method is useful in mediating not only contradictions within Romanticism, but the chaos of contemporary theories concerning it. One of the intensifying literary debates is that between the so-called "Greens" and "Reds," naturalists and humanists. *Mediating Order and Chaos* not only traces the split between nature and man to Romantic Culture but finds there, too, a Spinozian vision of man

and nature in unity - thereby denying any naturalist/humanist split. This volume is of interest for those who wish to see essays in the holistic approach to culture. Centering on hydraulics, hydrology, and meteorology, this study examines literature, painting, music, economics, and the rhetoric of science, philosophy, and politics, it therewith demonstrates how the water cycle was transformed into a cosmic metaphor that mediated, in the form of several

complex adaptive systems, between the chaos of too much change and that of not enough.

Taking stock of the urban transport scenario in Indian cities, this is the first full-length study of the metro rail system in

India. In recent times the metro rail has come up as a favoured alternative of mass transport in urban spaces faced with growing population, heightened vehicular traffic, and increased pollution. Using data, analysis, and first-hand information, this book tells the story of metro rail as proposed and undertaken across India from Kolkata in the east and Mumbai in the west to Delhi and Jaipur in the north and Chennai, Bangalore, Hyderabad, and Kochi in the south. Focusing on the

complexities of project planning and contrasting the Indian experience with those of its global counterparts, this volume distils important lessons for future infrastructure projects. While the metro rail system has considerably improved inter-city connectivity, the metro story in India is an ongoing one. With a Foreword by E. Sreedharan setting the stage, this volume will appeal to anybody keen to know more about urban transport in India, as well as policymakers,

management professionals, and students and researchers of economics and business studies.

A superb storyteller who keeps his readers in thrall—Statesman It is said that if the smell of the Himalayas creeps into a man's blood, he will return to the hills again and again. Master storyteller Ruskin Bond shows how this love may persist to death and beyond. The agents of the supernatural may be gentle like the fairy folk in 'On Fairy Hill', or

malevolent like the well-dressed diners of 'The Prize'; humorous like the very proper witch, Miss Bellows, in 'The Black Cat', or tragic like the haunting Gulabi in 'Wilson's Bridge'. Bond aficionados will meet familiar faces in other stories and be thrilled by the gripping mystery, 'Who Killed the Rani?' This exciting collection, animated by the brooding presence of the Himalayas, establishes Bond as a connoisseur of the mysterious and macabre.
