*Strategic Management* McGraw-Hill/Irwin Contemporary research in strategic management, with an emphasis on conceptual tools and skills created by scholars and practitioners in the field are evident throughout *Strategic Management*, 12e. Pearce and Robinson have retained high level of academic credibility and market-leading emphasis on strategic practice with this edition. This text continues to have strong support from longtime adopters and growing support in schools with a desire to provide straightforward treatment of strategic management with a practical,

systematic approach. The 12th edition offers 30 cases with a mixture of small and large firms; start-ups and industry leaders; global and domestically focused companies; and service, retail, manufacturing, technology, and diversified activities. Pearce and Robinson continue to use a unique pedagogical model they created to provide logic and structure to its treatment of strategic management which in turn makes the material more easily organized by the instructor and learned by the student.

*Strategic Management* Irwin/McGraw-Hill Thompson/Strickland has always included the most recent research in strategy in a way that students can understand and apply it to business cases and problems. In addition, Thompson offers more coverage of strategy implementation than most other texts, which many instructors think is critical if students are to understand the how and not just the what and why. Thompson's coverage of Michael Porter's classic 5-forces model is clearer and more detailed than in other texts, according to reviewers. With this edition the market leader looks better than ever before, offering a new 4-color design, improved writing style, and two new chapters on global and e-commerce strategy. The Thompson and Strickland cases have always been another strong selling point. Over the years, this author team has developed a great network of case authors and is able to select from the cream of the crop. And, having taught the course themselves for many years, they are very experienced in selecting the types of cases that will spark student interest and generate lively classroom discussions. Many of the cases reflect high profile companies, products, and people that students will

have heard of, know about from personal experience, or can easily identify with. The new case line-up features an exciting collection of dot.com/New Economy companies such as America Online, WingspanBank.com, drkoop.com, Intel, EBay, CDNow, Dell, and Competition in the Electronic Brokerage industry. Cases are further selected to highlight other critical types of business and trends, such as non-U.S. companies, globalization, cross-cultural situations, relatively small, entrepreneurial firms, non-profit organizations, and more.

As with each of our new editions, there is an accompanying lineup of exciting new cases that bring the content to life and are sure to provoke interesting classroom discussions, deepening students' understanding of the material in the process. While this 23rd edition retains the 12-chapter structure of the prior edition, every chapter—indeed every paragraph and every line—has been reexamined, refined, and refreshed.
