NASH LAYLAH

Earth Science CRC Press

This book will provide a basis for an introductory course in the formation evaluation. It is designed to be supplemented by problems to point out the important concepts.

The Military Engineer CRC Press

"Directory of members, constitution and by-laws of the Society of American Military Engineers. 1935" inserted in v. 27.

Coring and Core Analysis Handbook

Copyright Office, Library of Congress
List of members in each volume.

Geophysical Abstracts Allied Publishers

These three works cover the entire field of formation evaluation, from basic concepts and theories, through standard methods used by the petroleum industry, on to new and exciting applications in environmental science and engineering, hydrogeology, and other fields. Designed to be used individually or as a set, these volumes represent the first comprehensive assessment of all exploration methodologies. No other books offer the breadth of information and range of applications available in this set. The first volume, *Introduction to Geophysical Formation Evaluation*, is the perfect introductory reference for environmental professionals without previous training in the field. It explains the fundamentals of geophysical exploration and analysis,

illuminates the underlying theories, and offers practical guidance on how to use the available methodologies. General information on material behavior, porosity, tortuosity, permeability, cores, resistivity, radioactivity, and more provides a solid foundation for more advanced studies. The second volume, *Standard Methods of Geophysical Formation Evaluation* builds on the basic precepts presented in the first work but can be used alone as a self-contained reference. It covers all the petroleum-oriented standard methods which, until recently, have comprised the majority of applications of geophysical formation evaluation. It also points out non-hydrocarbon uses of petroleum methods. This volume provides complete practical information and instructions on

using the standard exploration and evaluation methods. It presents comprehensive, painstakingly detailed instructions for resistivity, radiation, and acoustic methods. The third volume, *Non-Hydrocarbon Methods of Geophysical Formation Evaluation*, discusses uses of formation evaluation in environmental science and engineering, hydrogeology, and other fields outside the petroleum industry, and demonstrates how the standard methods can be adapted to these non-hydrocarbon purposes. Catalog of Copyright Entries, Third Series Vols. for 1871-76, 1913-14 include an extra number, The Christmas bookseller, separately paged and not included in the consecutive numbering of the regular series.

National Union Catalog

Includes the monographic collection of the 28 libraries comprising the Library System of the Environmental Protection Agency.

Geotimes

Includes entries for maps and atlases

Geophysics

These three works cover the entire field of formation evaluation, from basic concepts

and theories, through standard methods used by the petroleum industry, on to new and exciting applications in environmental science and engineering, hydrogeology, and other fields. Designed to be used individually or as a set, these volumes represent the first comprehensive assessment of all exploration methodologies. No other books offer the breadth of information and range of applications available in this set.

Introduction to Geophysical Formation Evaluation

1919/28 cumulation includes material previously issued in the 1919/20-1935/36 issues and also material not published separately for 1927/28. 1929/39 cumulation includes material previously issued in the 1929/30-1935/36 issues and also material for 1937-39 not published separately.

Geophysical Abstracts

Includes Part 1, Number 1: Books and Pamphlets, Including Serials and Contributions to Periodicals (January - June)

U.S. Environmental Protection Agency

Library System Book Catalog Holdings as of July 1973

The record of each copyright registration listed in the Catalog includes a description of the work copyrighted and data relating to the copyright claim (the name of the copyright claimant as given in the application for registration, the copyright date, the copyright registration number, etc.).

Standard Methods of Geophysical Formation Evaluation

A world list of books in the English language.

Formation Evaluation

Vols. 7- include "Abstracts" which, beginning with v. 9 form a separately paged section, and from v. 17 on, have separate title pages.

The Mining Magazine

Books in Print

Bibliography of North American Geology

Petroleum Engineer for Management

Catalog of Copyright Entries. Third Series
