An invaluable self-assessment tool for emergency medicine trainees in Australasia. *Emergency Medicine MCQs* is an essential resource for Australasia's emergency medicine trainees. A practical self-assessment tool, the book assists trainees as they expand and refine their knowledge of emergency medicine, and will ultimately help them pass the Australasian Emergency Medicine Fellowship examination (FACEM). The multiple-choice questions in *Emergency Medicine MCQs* cover both the core and non-core areas in the Australasian Emergency Medicine Fellowship. Using this text, trainees can revise alone or with their peers to identify the areas in which they need further development. The curriculum is divided into three main areas where trainees require expert level of knowledge, high level of knowledge and general level of knowledge. It covers important clinical problems encountered in everyday emergency medicine practice - from cardiovascular emergencies through to obstetric and gynaecology emergencies, disaster management and toxicology. As well as being ideal for emergency medicine trainees qualifying through AECM, the book is a useful resource for GPs taking the GEM qualification through ACEM and JMOs 'on call'. Plus, this emergency medicine text is accompanied by an app - a separate product containing 180 randomised multiple-choice questions on all the topics within the book.

Mastering Emergency Medicine is a concise, revision-focused textbook that covers everything that candidates need to know in order to pass the College of Emergency Medicine's (CEM) membership examination (MCEM) to enter training, and to the pass fellowship examination (FCEM) to complete the Certificate of Specialist Training. With over 100 OSCE scenarios designed to stimulate everyday emergency department clinical encounters, *Mastering Emergency Medicine* covers all the key areas of the CEM syllabus, including: clinical examinations and practical skills, communication skills, teaching and management. This book takes a practical approach to the subject - core facts are presented and common scenarios are explored using an OSCE style, as used in the Part C MCEM and the FCEM examinations - which makes it an invaluable blueprint for management of cases. Closely linked to the current CEM syllabus, each chapter comprises three parts: Core topics that supplement revision for Part A and B. Clinical scenarios, including data and relevant practical skills that can be used to prepare for Parts B and C. Mock 'Scoring Scenarios' that give specific guidance on how to perform in OSCEs. *Mastering Emergency Medicine* is a highly detailed revision guide for the OSCE examinations and an essential study guide for all those who are preparing for the MCEM or FCEM examinations. It will also be useful to those who are wishing to pursue a career in Acute Medicine.

With over 200 traces to test your knowledge, this book is a first class learning tool for emergency physicians. Basic student-level knowledge of ECGs is assumed, so the reader can move directly to learning about the more complex traces that occur in the emergency department. The level of difficulty is stratified into two sections for specialists in training and specialist emergency physicians. A minimum amount of information is given beneath each trace, as if in the real situation. The full clinical description is printed in a separate section to avoid the temptation of "looking".

Accompanied by learning points, and with the cases presented randomly, this book provides a rich source of information on the interpretation of ECGs - a core skill for all emergency department staff.
