In order to succeed in a construction business

you have to be able to mark up the price of your jobs to cover overhead expenses and make a decent profit. The problem is how much to mark it up. You don't want to lose jobs because you charge too much, and you don't want to work for free because you've charged too little. If you know how much to mark up you can apply it to your job costs and arrive at the right sales price for your work. This book gives you the background and the calculations necessary to easily figure the markup that is right for your business. Includes a CD-ROM with forms and checklists for your use.

FOR LICENSING

CONTRACTORS that handles licensing matters. A contractor license must be acquired first whenever the total contract amount is \$25,000 or more, inclusive of materials, labor, and profits, by the general contractor. Construction Managers are also required to have a contractor's license for projects costing \$25,000 or more. The exam covers a wide range of fundamental topics but this study notes will focus on topics related to accounting, finance, purchasing, cost control, human resources and the rules/regulations related to the building and construction profession. There is no way you can pass the exam without having solid real world

experience. Our notes give you knowledge, principles and concepts. To master the topics, you must be "in the field" - you need to go through the real world plans, the various contract documents and the various administrative paperworks all by yourself. And you need to know how the experts get things done. To succeed in the exam, you also need to read as many reference books as possible. There is no single book that can cover everything!

2018 International Plumbing Code Turbo Tabs, Loose-Leaf Version Craftsman Book Co

Every once in a while a book comes along that fits a need. This book provides specific, practical, accurate and informative answers to questions that impact almost every person, partnership or corporation that requires a contractor's license. These are the most relevant questions and answers from David's published

columns during the past decade. It has always been David Kalb's goal to "Simplify State Government" for contractors and construction businesses that must deal with State government agencies. While mediating problems for California's Governor, David specialized in helping contractors who were having problems with State government. In 1982, he started Sacramento based Capitol Services. Referred to as the "Rambo of Red Tape" by California Republic magazine, The Los Angeles Times featured David in their Business Section under the headline "Making a Living From Cutting Red Tape." It was natural to select cutredtape.com as his

Internet address. An excerpt from an article in Construction Data Magazine sums up Mr. Kalb. "He is not a construction man, yet the Pacific Coast Builder's Conference recognized him as an expert. Thousands of contractors across the country--many of them with little time to waste--have called Capitol Services to help them in California." Schoolhouse Planning Createspace Independent Publishing Platform Now in its 8th edition, MATHEMATICS FOR PLUMBERS AND PIPEFITTERS delivers the essential math skills necessary in the plumbing and pipefitting professions. Starting with a thorough math review to ensure a solid foundation, the book

progresses into specific on-the-job applications, such as pipe length calculations, sheet metal work, and the builder's level. Broad-based subjects like physics, volume, pressures, and capacities round out your knowledge, while a new chapter on the business of plumbing invites you to consider an exciting entrepreneurial venture. Written by a Master Plumber and experienced vocational educator, **MATHEMATICS FOR PLUMBERS AND PIPEFITTERS, 8th Edition** includes a multitude of real-world examples, reference tables, and formulas to help you build a rewarding career in the plumbing and pipefitting trade.
