Women's Life Writing and Early Modern Ireland provides an original perspective on both new and familiar texts in this first critical collection to focus on seventeenth-century women's life writing in a specifically Irish context. By shifting the focus away from England—even though many of these writers would have identified themselves as English—and making Ireland and Irishness the focus of

their essays, the contributors resituate women's narratives in a powerful and revealing landscape. This volume addresses a range of genres, from letters to book marginalia, and a number of different women, from now-canonical life writers such as Mary Rich and Ann Fanshawe to far less familiar figures such as Eliza Blennerhassett and the correspondents and supplicants of William King, archbishop of Dublin. The writings of the Boyle sisters and the Duchess of Ormonde—women from the two most important families in seventeenth-century Ireland—also receive a thorough analysis. These innovative and nuanced scholarly considerations of the powerful influence of Ireland on these writers' construction of self, provide fresh, illuminating insights into both their writing and their broader cultural context.

The letter is a powerfully evocative form that has gained in resonance as the habits of personal letter writing have declined in a digital age. But faith in the letter as evidence of the intimate

thoughts of individuals underplays the sophisticated ways letters functioned in the past. In *Cultures of Correspondence in Early Modern Britain* leading scholars approach the letter from a variety of disciplinary perspectives to uncover the habits, forms, and secrets of letter writing. Where material features of the letter have often been ignored by past generations fixated on the text alone, contributors to this volume examine how such elements as handwriting, seals, ink, and the arrangement of words on the manuscript page were significant carriers of meaning alongside epistolary rhetorics. The chapters here also explore the travels of the letter, uncovering the many means through which correspondence reached a reader and the ways in which the delivery of letters preoccupied contemporaries. At the same time, they reveal how other practices, such as the use of cipher and the designs of forgery, threatened to subvert the surveillance and reading of letters. The anxiety of early modern letter writers over the vulnerability of correspondence is testament to the deep dependence of the culture on the letter. Beyond the letter as a material object, *Cultures of Correspondence* sheds light on textual habits. Individual chapters study the language of letter writers to reveal that what appears to be a personal and unvarnished expression of the writer's thought is in fact a deliberate, skillful exercise in managing the conventions and expectations of the form. If letters were a prominent and ingrained part of the cultural life of the early modern period, they also enjoyed textual and archival afterlives whose stories are rarely told. Too often studied only in the case of figures already celebrated for their historical or literary significance, the letter in *Cultures of Correspondence* emerges as the most vital and wide-ranging material, textual form of the early modern period. Contributors: Nadine Akkerman, Mark Brayshay, Christopher Burlinson, James Daybell, Jonathan Gibson, Andrew Gordon, Arnold Hunt, Lynne Magnusson, Michelle O'Callaghan, Alan Stewart, Andrew Zurcher.

This volume provides new insights into the nature of the Early Modern English discourse markers marry, well and why through the analysis of three corpora (A Corpus of English Dialogues, 1560-1760, the Parsed Corpus of Early English Correspondence, and the Penn-Helsinki Parsed Corpus of Early Modern English). By combining both quantitative and qualitative approaches in the study of pragmatic markers, innovative findings are reached about their distribution throughout the

period 1500-1760, their attestation in different speech-related text types as well as similarities and differences in their functions. Additionally, this work engages in a sociopragmatic study, based on the sociopragmatically annotated Drama Corpus of almost a quarter of a million words, to enhance our understanding about their use by characters of different social status and gender. This volume

therefore constitutes an essential piece of the puzzle in our attempt to gain a full picture of discourse marker use.
