For most
mathematicians and
many mathematical
physicists the name
Erich Kähler is strongly

tied to important geometric notions such as Kähler metrics, Kähler manifolds and Kähler groups. They all go back to a paper of 14 pages written in 1932. This, however, is just a small part of Kähler's many outstanding achievements which cover an unusually wide area: From celestial mechanics he got into complex function theory, differential equations, analytic and complex geometry with differential forms, and then into his main topic, i.e. arithmetic geometry where he constructed a system of notions which is a precursor and, in large parts, equivalent to the now used system of Grothendieck and Dieudonné. His principal interest was

in finding the unity in the variety of mathematical themes and establishing thus mathematics as a universal language. In this volume Kähler's mathematical papers are collected following a "Tribute to Herr Erich Kähler" by S. S. Chern, an overview of Kähler's life data by A. Bohm and R. Berndt, and a Survey of his Mathematical Work by the editors. There are also comments and reports on the developments of the main topics of Kähler's work, starting by W. Neumann's paper on the topology of hypersurface singularities, J.-P. Bourguignon's report on Kähler geometry and, among others by Berndt, Bost, Deitmar, Ekeland, Kunz and Krieg, up to A. Nicolai's

essay
"Supersymmetry,
Kähler geometry and
Beyond". As Kähler's
interest went beyond
the realm of
mathematics and
mathematical physics,
any picture of his work
would be incomplete
without touching his
work reaching into
other regions. So a
short appendix
reproduces three of his
articles concerning his
vision of mathematics
as a universal Theme
together with an essay
by K. Maurin giving an
"Approach to the
philosophy of Erich
Kähler".

Sinossi giuridica

"The aim of this study is to track De Rerum Natura along two paths of satire. One is the broad boulevard of satiric literature from the beginnings of Greek poetry to the plays, essays, and broadcast media of the modern world. The other is the narrower lane of Roman verse satire, *satura*, whose canon begins in the Middle Republic with Ennius and Lucilius and closes with Juvenal, an

author of the Flavian era. The first main portion of this book (chapters 2-3) focuses on Lucretius and Roman *satura*, while the following chapters broaden the scope to satiric elements of Lucretius more generally, but still with plenty of reference to the poets of Roman *satura* as satirists par excellence. By examining how Lucretius' poem employs the tools, techniques, and tactics of satire-by evaluating how and where in De Rerum Natura the speaker functions as a satirist-we gain, I argue, a fuller, richer understanding of how the poem works and how its poetry interacts with its purported philosophical program. Attention to the role of De Rerum Natura in

the more specific tradition of Roman verse satire demonstrates that Lucretius' poem stands as a detour on the genre's highway, a swerve in the trajectory of satira. The numerous satiric passages and frequently satiric narrator of *De Rerum Natura* draw on earlier Roman satire, and in turn the poem influences the later satiric verse of Horace, Persius, and Juvenal. While *De Rerum Natura* is not in and of itself a member of the Roman genre of satire, it is an important player in the genre's development"--
