Medieval French, usually analyzed as a null subject language, differs considerably from modern Romance null subject languages such as Spanish in the availability of non-expressed subject pronouns; specifically, it shows characteristics reminiscent of non-null, rather than null subject languages, such as the expression of expletive subject pronouns. The central goal of this book is to put forward an account of these differences. On the basis of the analysis of an extensive, newly established data corpus, the development of the expression of both expletive and referential subject pronouns until the 17th c. is determined. Following a thorough discussion of previous approaches, an alternative approach is presented which builds on the analysis of Medieval French as a non-null subject language. The non-expression of subject pronouns, licit in specific contexts in non-null subject languages, is shown to be restricted to configurations generally involving left-peripheral focalization. These configurations – and, concomitantly, non-expressed subject pronouns – are finally argued to be eventually lost for good in the wake of the initial observation by 17th c. writers of pertinent instructions campaigned for in highly influential works of language use. <i>audio CDs</i> CLE International

A Drifting Year finds Haitian expatriate Laferrière plagued by his recollections. In this short novel written in stanzas, the young exile arrives in the unfamiliar city of Montreal. Here, he quickly discovers all the things endemic to the Canadian immigrant experience; racism, poverty, and disorientation plague the budding writer. Here is an author at his best when fiction and memoir exploit each other. The dreamscape at the end of the longer novel easily eclipses the cold streets of Montreal and the stinking slums of Port-au-Prince. If A Drifting Year is exploratory surgery, Dead Men is life-saving trauma. Despite all advances in medicine, time will not be cheated. Only writers like Laferrière can hope to make the living walk the earth forever. -Excerpt from Hal Niedzvieck's review in Quill and Quire, November 1997

The classic Gothic novel that inspired the blockbuster musical There is a ghost in the Paris Opera House. Singers, dancers, and stagehands have all seen him lurking in the shadows of the set, and each describes his face differently. Some say it is on fire, others that it is bare bone, and a terrified few say that he has no face at all. Outsiders dismiss the stories as theatrical superstition, but soon	

the phantom will reveal himself—and the Opera will never be the same. A crew member is found hanged, and every denizen of the theater is quick to blame the phantom. More deaths follow, until the phantom is forced to make himself known in the most spectacular manner possible. But when the mysterious ghost begins to admire a beautiful singer, it is the beginning of something magnificent: a love story as heartfelt and tragic as any opera ever staged. This ebook features a new introduction by Otto Penzler and has been professionally proofread to ensure accuracy and readability on all devices. “The wildest and most fantastic of tales.” —The New York Times Book Review

Within the field of second language acquisition, interest in the acquisition of French as a second language has a long-standing tradition, especially in the European context. The aim of this book is to offer a synthesis of current research within this area. It contains contributions from different researchers in the field, including studies on the acquisition of grammar, formulaic language, lexis and pragmatic devices, and covering interlanguage development from beginner level up to very advanced, presumably near-native levels of proficiency. The learners in the studies reported in the volume represent different L1 backgrounds and age groups. The chapters shed light on current issues in research on second language acquisition from different theoretical perspectives, and contribute to a better understanding of L2 French and SLA in general. The volume should be of interest for students, teachers and researchers of L2 French and SLA. Originally published in *Language, Interaction and Acquisition* 3:1 (2012)

This is a complete Vietnamese language course designed for college or high school-level classroom use or self-study. Since its publication in 1998, Elementary Vietnamese has become the leading book for anyone wishing to learn Vietnamese, and an invaluable resource for people traveling, studying or working in Vietnam. This beginner Vietnamese book was originally developed for classroom use at Harvard University, where it has been field-tested for many years. This revised Third Edition has been thoroughly updated to reflect recent developments in Vietnamese speech patterns and culture over the past decade. The primary focus of Elementary Vietnamese is to assist learners in developing necessary skills in listening, speaking, writing and reading the language. It serves a secondary function as a general introduction to modern Vietnamese society and culture, with dialogues, cultural notes, exercises and readings drawn from contemporary life and popular media there. Elementary Vietnamese is designed for efficient self-study as well as for use in a college-level classroom. Features of the Third Edition include: Many hours of new audio recordings by native Vietnamese speakers. Innovative pronunciation drills to help you to achieve near-native pronunciation ability. New usage examples, cultural notes, and exercises along with photos showing life in Vietnam today. A guide for instructors ("New Edition Notes") detailing changes made in the Third Edition. The MP3 audio recordings which accompany this book are of native Vietnamese speakers. These recordings cover: All dialogues, narratives and vocabulary. Grammar and usage notes. Everyday Vietnamese idioms and expressions. A unique set of pronunciation drills to help you speak like a native. Commonly-used proverbs, to help you speak and understand colloquial Vietnamese.

Batchelor coins the term "chromophobia"—A fear of corruption or contamination through color—in a meditation on color in western culture. Batchelor analyzes the history of, and the motivations

behind, chromophobia, from its beginnings through examples of nineteenth-century literature, twentieth-century architecture and film to Pop art, minimalism and the art and architecture of the present day. He argues that there is a tradition of resistance to colour in the West, exemplified by many attempts to purge color from art, literature and architecture. Batchelor seeks to analyze the motivations behind chromophobia, considering the work of writers and philosophers who have used color as a significant motif, and offering new interpretations of familiar texts and works of art.

Genre has provided a key to understanding the varying literacy cultures of regions, disciplines, professions, and educational settings. **GENRE IN A CHANGING WORLD** provides a wide-ranging sampler of the remarkable variety of current work. The

twenty-four chapters in this volume, reflecting the work of scholars in Europe, Australasia, and North and South America, were selected from the over 400 presentations at SIGET IV (the Fourth International Symposium on Genre Studies) held on the campus of UNISUL in Tubarão, Santa Catarina, Brazil in August 2007—the largest gathering on genre to that date. The chapters also represent a wide variety of approaches, including rhetoric, Systemic Functional Linguistics, media and critical cultural studies, sociology, phenomenology, enunciation theory, the Geneva school of educational sequences, cognitive psychology, relevance theory, sociocultural psychology, activity theory, Gestalt psychology, and schema theory. Sections are devoted to theoretical issues, studies of genres in the professions, studies of genre and media, teaching and learning genre, and writing across the curriculum. The broad selection of material in this volume displays the full range of contemporary genre studies and sets the ground for a next generation of work.

*Ouvertures* uses culture as the organizing principle to its communicative approach in the teaching of speaking, reading, listening, and writing. It offers content-based instruction where a cultural theme serves as a unifying element within each chapter. It also promotes a contrastive approach to culture that encourages (self-)exploration rather than judgments. And, finally, *Ouvertures* seeks to provide a manageable amount of material while paying thorough and appropriately distributed attention to all five skills.

The Second Edition of *Contrastes*: *grammaire du français courant* remains what it originally set out

to be: a comprehensive French grammar review geared specifically to English-speaking students from the intermediate to the advanced levels. Written in French (with occasional footnotes and explanations in English), it is meant for those who have already acquired a foundation in French through contextual or communicative approaches, but who need to review and expand upon what they already know. *Contrastes* can be used as either a basic text or a grammar reference, and is designed specifically for instructors who prefer to use a straight-forward grammar textbook in tandem with their own choice of cultural or literary materials.

Forget the 10,000 hour rule— what if it's possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What's on your list? What's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills—time you don't have and effort you can't spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web . . . In *The First 20 Hours*, Josh Kaufman offers a systematic approach to rapid skill acquisition— how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself

to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, *The First 20 Hours* will help you pick up the basics of any skill in record time . . . and have more fun along the way.

*Think Level 1 Student's Book* McGraw Hill Professional

This new text in the McGraw-Hill Second Language Professional series brings together theory, research, and practice on structured input, an instructional technique that first emerged in the early 1990s in association with processing instruction. The author skillfully makes theoretical concepts and research accessible to the uninitiated reader while offering an abundance of examples of structured input activities in various languages. Researchers and instructors looking for more examples and clarification on structured input activities will welcome this new title.
