The Namibian Constitution entrenches fundamental rights and freedoms, and provides for their vertical and horizontal application in any criminal process. However, since Independence in 1990, Namibia has developed its own criminal jurisprudence. Criminal procedure and law are taking new shape. Namibian courts have pronounced on criminal issues, and legislation has been passed to keep up with the demands, aspirations, spirit, and vision of the Namibian Constitution and its people. CLEVER MAPAURE, NDJODI NDEUNYEMA, PILISANO MASAKE, FESTUS WEYULU and LOIDE SHAPARARA have written an invaluable book that deals with these developments. It explains the rights of individuals, the duties of law enforcement officers, and the procedures of the courts in criminal cases. The Law of Pre-Trial Criminal Procedure in Namibia introduces readers to the fundamental principles and values underlying Namibian criminal law, through a systematic examination of the provisions of the Criminal Procedure Act, 1977 (Act No. 51 of 1977) as amended, which was originally passed by the legislature of South Africa, and still regulates criminal procedure in Namibia, the amendments to it since 1990, and relevant Namibian Case Law. The book captures and discusses the law relating to the pre-trial criminal process in Namibia in detail, from the roles of the prosecutor and the police, search, seizure and forfeiture, interrogation, notices and summons, arrest, court appearance, bail, criminal charges, disclosure, diminished capacity, right to assistance, to pleas and plea-bargaining.

**Criminal Law Casebook** Stanford University Press

The highly anticipated Second Edition of Criminal Law introduces students to the underlying

principles, legal doctrine, and rules regarding crimes, defenses, and punishment in substantive criminal law. Innovative in its case study approach, this thoroughly updated revision will help students develop analytical skills, while learning the content and context of substantive criminal law. Now with a more student-friendly format, this text guides students through theory and practice, using a blend of old and new materials to foster understanding of what the law is, how it evolved, the principles on which it is based, and how it applies to various circumstances.

Specifically designed and written for use on the advanced criminal litigation option on the Bar Vocational Course, this manual adopts a pragmatic approach to its treatment of criminal law and focuses specifically on those areas of criminal law which are most important to the junior criminal practitioner and which they are most likely to encounter during their first years in practice. Split into three distinct parts, the first part of the manual deals with the crucial procedural aspects of criminal law which will be encountered in practice, including the scope of legal powers to enter and search premises, and abuse of process. Part II covers selected areas of the substantive law, which are particularly relevant to the junior practitioner, including public order offences, dangerous drugs, offensive weapons, and drink driving and road traffic offences. The final section features an extended case study focusing on features which the practitioner will commonly encounter in practice, including police witnesses, custody records and conflicts of interest between defendants. Including realistic case papers and typical exhibits, this section also features a set of tasks to perform and a sample answer offering trainee barristers the opportunity to practise applying their skills in a criminal litigation context.

**Crime, Mental Health and the Criminal Justice System in Africa** Anderson Publishing Company (OH)

This book is a scientific treatise on the principle of legality in criminal law. It explores the relation between the principle of legality and the general theory of criminal law and contains definite rules emphasized for practitioners as well as academia.

This is a reprint of a book first published by Little, Brown in 1978. George Fletcher is working on a new edition, which will be published by Oxford in three volumes, the first of which is scheduled to appear in January of 2001. Rethinking Criminal Law is still perhaps the most influential and often cited theoretical work on American criminal law. This reprint will keep this classic work available until the new edition can be published.

**The Ethics of Total Confinement** Unisa Press

The fallout from the financial crisis of 2007-8, HSBC Suisse in 2015, and the Panama Papers in 2016 has generated calls for far more vigorous and punitive responses to tax evasion and greater international co-operation against mechanisms for giving anonymity to the ownership of property. One mechanism to ensure compliance is the use of the criminal justice system. The announcement in 2013 by the then Director of Public Prosecutions, Keir Starmer, of a policy of increasing rates of prosecution for tax evasion raised squarely the issue of whether increased involvement of criminal law and criminal justice in tax evasion would be justifiable or not. The relationship between tax evasion and the proceeds of crime is taking on increasing importance: treating the 'proceeds of criminal tax evasion' as falling within the 'proceeds of crime' regime inevitably expands the scope of both. In this book, Peter Alldridge considers the development of the offences and the relationship between tax evasion offences and other criminal offences; the relevant rules of evidence; prosecution structures, decision-making processes, and alternatives to prosecution. Specific topics include offshore evasion and the relationship of tax evasion with other crimes and aspects of the criminal justice system. A topical and lively discussion of a heated debate.

*Wrongful Conviction and Criminal Justice Reform* is an important addition to the literature and teaching on innocence reform. This book delves into wrongful convictions studies but expands upon them by offering potential reforms that would alleviate the problem of wrongful convictions in the criminal justice system. Written to be accessible to students, *Wrongful Conviction and Criminal Justice Reform* is a main text for wrongful convictions courses or a secondary text for more general courses in criminal justice, political science, and law school innocence clinics.

The authors analyse central aspects of criminal law in the context of the assumptions surrounding it, and employ a number of critical approaches, including a feminist perspective, to give insights into the current state of the law.

**Rethinking Criminal Law** Pearson Higher Ed

In three parts, this volume in the AP-LS series explores the phenomena of captivity and risk management, guided and informed by the theory, method, and policy of psychological jurisprudence. The authors present a controversial thesis that demonstrates how the forces of captivity and risk management are sustained by several interdependent "conditions of control." These conditions impose barriers to justice and set limits on citizenship for one and all. Situated at the nexus of political/social theory, mental health law and jurisprudential ethics, the book examines and critiques constructs such as offenders and victims; self and society; therapeutic and restorative; health; harm; and community. So, too, are three "total confinement" case law data sets on which this analysis is based. The volume stands alone in its efforts to systematically "diagnose" the moral reasoning lodged within prevailing judicial opinions that sustain captivity and risk management practices impacting: (1) the rights of juveniles found competent to stand criminal trial, the mentally ill placed in long-term disciplinary isolation, and sex offenders subjected to civil detention and community re-entry monitoring; (2) the often unmet needs of victims; and (3) the demands of an ordered society. Carefully balancing sophisticated insights with concrete and cutting-edge applications, the book concludes with a series of provocative, yet practical, recommendations for future research and meaningful reform within institutional practice, programming, and policy. *The Ethics of Total Confinement* is a thought-provoking and timely must-read for anyone interested in the ethical and legal issues regarding madness, citizenship, and social justice. "It has become clear that there is no criminological exit from embrace of degrading punishments and practices to which our increasingly distorted risk perception commits us. Instead, the path forward must run through a return to the ethical and psychological roots of security and justice. *The Ethics of Total Confinement* is a quantum step forward in defining and advancing that path."--Jonathan Simon, Adrian A. Kragen Professor of Law, Jurisprudence and Social Policy Program, UC Berkeley School of Law "This book boldly calls for a total transformation in the way the law deals with people who are confined because of their perceived depravity or dangerousness. It focuses on three outcast groups--juveniles tried as adults, people with mental illness subjected to hospitalization, and sex offenders committed as dangerous--and, based on an innovative analysis of the relevant caselaw and empirics, shows why current practices not only visit substantial harm on these people but also brutalize those who deprive them of liberty and damage the rest of us by feeding our basest, most uninformed fears. Relying on Aristotelian philosophy, therapeutic and restorative principles, and commonsense justice, the book persuasively argues that we must reorient the training and thinking of all major players in the system if our goal is to promote the maximum amount of human flourishing."--Christopher Slobogin, Milton Underwood Professor of Law, Vanderbilt University Law School "The Ethics of Total Confinement: A Critique of Madness, Citizenship, and Social Justice deepens our understanding of how our legal system justifies its treatment of those it confines. By bridging gaps among relevant

disciplines, the book clarifies to an interdisciplinary audience just how inadequate those justifications turn out to be when measured by psychological, ethical, or justice-based standards. The book's provocative conclusions and recommendations offer much food for thought and suggest potential directions for action."--Dennis Fox, Emeritus Associate Professor of Legal Studies and Psychology, University of Illinois at Springfield "The Ethics of Total Confinement shows how captivity diminishes the keepers and the kept. It is a book that synthesises in creative new ways reformist visions of justice, virtue and the cultivation of habits of character. This is profound work that opens new paths to dignity, healing and social justice."--John Braithwaite, Australian Research Council Federation Fellow, Australian National University "The Ethics of Total Confinement offers a useful and wide-ranging perspective grounded in psychological jurisprudence. With its emphasis on the harm done to those most vulnerable to extremes of risk-management, this volume makes a welcome addition to the literature on confinement."--Lorna Rhodes, Professor, Department of Anthropology, University of Washington "The provocative thesis of this book develops psychological jurisprudence to conceptualize the ethics of existing total confinement practices, aspiring to greater justice and human flourishing for all. A timely intervention of this kind is most welcome."--George Pavlich, Associate Vice-President (Research), Professor of Law and Sociology, University of Alberta

The 2008 eighth edition of *Cases and Comments on Criminal Law* continues the format of subject-matter structure that was introduced several editions before and has proven successful and eminently workable in the classroom. At the same time, the eighth edition strikes several new themes designed to modernize the book and make it more meaningful in today's justice system as well as more accessible to the students. Some older cases have been removed and new cases added to address conceptual issues in a contemporary setting. For example, the 7th and 8th editions have added thirteen new cases to Chapter 2 (four in the 8th edition) including recent United States Supreme Court decisions that have impressed themselves onto the national legal framework. The Notes and Questions have been updated where desirable to reflect variations on the principal cases in modern factual circumstances. Additionally, problems (with citations to the cases they reflect) have been added to the Notes to permit exploration of conceptual nuances in a context less directive than case analysis. Most importantly, in the 8th edition we have added a new chapter on "Crimes Against Governmental Authority." Although the impetus for this chapter was provided by the government's response to the recent terrorist threat, the chapter covers how the state historically has dealt with both physical and sociopolitical challenges to its authority and the welfare of its citizens. After a brief history of governmental acts to defend itself, beginning with sedition at the end of the 18th Century, the chapter covers how traditional crimes have been used by the state in this capacity, and then takes up statutes that have been enacted explicitly to deal with threats to governmental authority, such as crimes aimed at communism, the USA PATRIOT Act, and at material support of terrorist organizations. We have developed this chapter to provide a contemporary setting for showing how the criminal law is utilized to combat threats in a nontraditional area of the first-year course of criminal law, and we hope it appeals to those who prefer both the contemporary and the nontraditional. As in the past, our book starts with a brief outline of criminal procedure. We believe it essential that a beginning student have an insight into the criminal justice process as a

prerequisite to a proper understanding of the cases on substantive criminal law. As in prior editions, the book ends with an Appendix containing pertinent provisions of the United States Constitution and its Amendments. Since these provisions are liberally referred to in many cases, the student has ready access to their precise wording.

Written by a lawyer/criminologist with teaching experience in both criminology and law, Criminal Law, Fifth Edition provides the most comprehensive, up-to-date criminal law text available, covering all traditional areas of law and illustrating them with recent current events. This fifth edition includes coverage of the newest topics, such as three strikes you're out, hate crimes, home invasion, posttraumatic stress disorders as defenses and truth in sentencing. Traditional topics, such as murder, are updated with recent changes such as those regarding definition of death, and inclusion of a fetus as a "person." Unlike most criminal law texts, this text covers misdemeanors as well as felonies.
