Hans Aporry, a resident of Yokohama from 1890 until 1896, lavished time and resources on amassing an incomparable collection of objects made of, or referring to, bamboo. This work celebrates the collection with photographs both old and new.

Bead International 2008 Harry N
Abrams Incorporated
Japanese Bamboo Baskets: Masterworks of Form and Texture surveys nineteenth- and twentieth-century baskets of Japan, their

place in history, and the elevation of bamboo craft work to an art form. It features more than 250 illustrations of selections from the largest known collection of Japanese flower baskets. This is the first book in English to examine bamboo baskets as modern sculptural masterpieces as well as chronicle the development of Japanese flower-arranging baskets from utilitarian containers through their subsequent transformation into art. At the heart of this volume are dramatic portraits of works in the Cotsen Collection. Full-page and double-page illustrations abound. Large-scale details and second views evoke the forms, textures and three-dimensionality Of the baskets, revealing their monumentality and the architecture

of their construction. The baskets illustrated were selected primarily for their visual qualities, and are organized by region. They rage from 1890s examples by the first basket maker who signed his work to 1990s creations by leading bamboo crafts artists. Pieces by all those who have been made Living National Treasures are included. This book is filled with new information and superlative works of art. It will be treasured by anyone who has known the joy of holding a rough-woven basket or admired the delicate tracery of bamboo strips in a contemporary work of bamboo art.

The Primary Structures of Fabrics UCL Press

"A homage to nature and to a long

tradition of Japanese craftsmanship, Godai is a large-scale temporary bamboo installation by Tanabe Chikuunsai IV. Like all the works of this artist, this new creation balances tradition with modernity. Like an organic architectural form, Godai emanates a keen positive energy, forcefully captured in the photographs of Tadayuki Minamoto, taken in Paris during the exhibition at the Musee national des Arts asiatiques." -- Book jacket.

The Bamboo Basket Art of Higashi Takesonosai Arnoldsche Verlagsanstalt GmbH

Born in 1915, Hiroshima Kazuo is a professional basketmaker in the Hinokage region on the Japanese island of Kyushu. This book celebrates the life of this master bamboo craftsman and integrates the story of his career with a chronicle of life and times in a now-rare mountain culture. Photographs illustrate scenic views of Hinokage, tools and materials essential to the professional basketmaker and a comprehensive collection of Hiroshima's baskets.

Bamboo in old Japan : art and culture on the threshold to modernity : the Hans Spörry collection in the Ethnographic

Museum of Zürich University Weatherhill, Incorporated
Bamboo's amazing versatility, strength, and beauty have given it a larger role in human culture than any other plant. Both sustainable and plentiful, it has been used for millennia to make objects ranging from clothing and housing to more exotic luxuries like phonograph needles and children's toys, to name but a few. This acclaimed sourcebook--part history, part illustrated catalog, part cultivation guide--details the myriad uses of bamboo, along with an immense bounty of information and lore on how to grow, maintain, and harvest this extraordinary plant; how to use it in craft and construction projects, including floors, fences, papers, and play equipment; and bamboo's place in the literary, visual, and musical arts. An encyclopedic roster of more than 1,200 bamboo species is a book in itself, as is author David Farrelly's A-to-Z catalog of artifacts made from bamboo: acupuncture needles, blowguns, bridges, kites, ships, violins, windmills, and a thousand other things. Strong, flexible, and beautiful in both its natural and finished states, bamboo is an abundant resource that

could beneficially replace many less sustainable materials currently in use, and continue to transform our culture in the process.

Japanese Bamboo Baskets Test Mentor
This is a fully illustrated guide to the art, craft and design of bamboo, as demonstrated by the Japanese. It demonstrates how to use inexpensive materials to create sophisticated effects in the home and garden. A list of bamboo collections, gardens and research sources is included. For centuries, bamboo has fascinated legions of craftspeople, plant lovers and devotees of the handcrafted object. And nowhere is bamboo used more elegantly and distinctly than in Japan. Its presence touches every part of daily life--art, crafts, design, literature, and food. Its beauty

Basketry Technology, first published in 1977, is the only comprehensive guide for archaeologists, anthropologists, art historians, and collectors for identifying and analyzing ancient baskets and basket fragments. Long out of print, this volume is again available with an extensive new

introduction by the original author that summarizes the extensive work done in this area over the past 35 years. The volume describes proper field and lab techniques for recovery of specimens and offers a systematic methodology for identifying and interpreting twined, coiled, and plaited basket samples. It then uses Canyon de Chelly as an example of how to process a large basketry assemblage properly. In addition to 200 illustrations, the book includes a variety of sample forms to use in describing and analyzing ancient baskets.

Hin University of Pennsylvania Press
Bamboo is present in nearly every aspect of traditional Japanese life, yet Japanese bamboo art, with its refined beauty and technical sophistication, has been little known in the West until recent years. This publication provides an overdue introduction to these exquisite works, which represent a cultural tradition stretching back hundreds of years. The works illustrated and discussed are exceptional for their broad representation of many notable bamboo masters, and highlight key stages in the modern history of Japanese bamboo art. p.p1 {margin:

A Basketmaker in Rural Japan Art Media Resources Limited

Although haiku is well known throughout the world, few outside Japan are familiar with its precursor, haikai (comic linked verse). Fewer still are aware of the role played by the Chinese Daoist classics in turning haikai into a respected literary art form. Bashō and the Dao examines the haikai poets' adaptation of Daoist classics, particularly the Zhuangzi, in the seventeenth century and the eventual transformation of haikai from frivolous verse to high poetry. The author analyzes haikai's encounter with the Zhuangzi through its intertextual relations with the works of Bashō and other major haikai poets, and also the nature and

characteristics of haikai that sustained the Zhuangzi's relevance to haikai poetic construction. She demonstrates how the haikai poets' interest in this Daoist work was rooted in the intersection of deconstructing and reconstructing the classical Japanese poetic tradition. Well versed in both Chinese and Japanese scholarship, Qiu explores the significance of Daoist ideas in Bashō's and others' conceptions of haikai. Her method involves an extensive hermeneutic reading of haikai texts, an in-depth analysis of the connection between Chinese and Japanese poetic terminology, and a comparison of Daoist traits in both traditions. The result is a penetrating study of key ideas that have been instrumental in defining and rediscovering the poetic essence of haikai verse. Bashō and the Dao adds to an increasingly vibrant area of academic inquiry—the complex literary and cultural relations between Japan and China in the early modern era. Researchers and students of East Asian literature, philosophy, and cultural criticism will find this book a valuable contribution to cross-cultural literary studies and comparative aesthetics.

Interlacing Metropolitan Museum of Art Irene Emery was one of America's leading authorities on ancient fabrics and textiles before her death in 1981. Her studies led her to become increasingly concerned with the haphazard and confusing terminology for describing fabrics in a precise way, and she began serious study of this problem at the Laboratory of Anthropology Santa Fe in 1947, and later at the textile museum in Washington D.C. This book is a result of these studies, recognised as a classic when first published in America. The book's essential strength is its universality: for the first time a definition of the actual structural make up, of fabrics and their component parts is clear and accessible to all, whether the purpose of study is an aspect of design, history, or cultural significance and whatever its scope chronologically or geographically.

This volume provides more than just a glimpse into Japanese bamboo basket making, it delves into the intriguing life of Higashi Takesonosai, one of Japan's most accomplished artists. Throughout the span of his life and career, Takesonosai's works were influenced by a variety of people

such as his family, friends, mentors, and artists. It is these influences that shape Takesonosai's personality and contributes to his present day success. With a fervor for artwork and painting, but limited resources and opportunity to pursue this passion, Takesonosai resorted to bamboo basket making, a job that would later turn into a lifelong career. Takesonosai's underlying love of art is used as a central theme for the construction of his bamboo baskets. Included in this book are color photographs of Takesonosai's masterpieces, which clearly exhibit his creative ingenuity. Each individually hand crafted basket produced by Takesonosai is a piece of art requiring long hours of labor, skill, and originality. Takesonosai's extraordinary talent and adroit ability to create such artwork transforms this hobby into a much-admired and highly praised profession.

Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design

that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and

dissemination of ideas.

This unique book combines two catalogs in one. *Bead International 2008 & Beyond Basketry* represents the best of two juried exhibitions held at the Dairy Barn Arts Center in Athens, Ohio. Considering any

pierced object to be a bead, pieces range in style from the traditional to the whimsical as they incorporate a variety of colors and materials. This vibrant collection will spark the reader's creativity and broaden his or her perspective. When the age-old art form of basketry is combined with contemporary visions and techniques, the result is the striking *Beyond Basketry*, a collection of sixty-five artworks created by forty-two artists from across the United States. All artworks are

vessels made of woven materials, but the pieces explore a variety of sizes, colors, shapes, and techniques
