 Research & Education Association Research & Education  
 Association (REA) is an organization of educators, scientists, and  
 engineers specializing in various academic fields. Founded in  
 1959 with the purpose of disseminating the most recently  
 developed scientific information to groups in industry,  
 government, high schools, and universities, REA has since  
 become a successful and highly respected publisher of study aids,  
 test preps, handbooks, and reference works. REA's Test  
 Preparation series includes study guides for all academic levels in  
 almost all disciplines. Research & Education Association publishes  
 test preps for students who have not yet completed high school,

as well as high school students preparing to enter college.  
 Students from countries around the world seeking to attend  
 college in the United States will find the assistance they need in  
 REA's publications. For college students seeking advanced  
 degrees, REA publishes test preps for many major graduate  
 school admission examinations in a wide variety of disciplines,  
 including engineering, law, and medicine. Students at every level,  
 in every field, with every ambition can find what they are looking  
 for among REA's publications. While most test preparation books  
 present practice tests that bear little resemblance to the actual  
 exams, REA's series presents tests that accurately depict the  
 official exams in both degree of difficulty and types of questions.  
 REA's practice tests are always based upon the most recently  
 administered exams, and include every type of question that can  
 be expected on the actual exams. REA's publications and  
 educational materials are highly regarded and continually receive  
 an unprecedented amount of praise from professionals,  
 instructors, librarians, parents, and students. Our authors are as  
 diverse as the fields represented
