This book focuses on the important work of Karl Mannheim by demonstrating how his theoretical conception of a reflexive sociology took shape as a collaborative empirical research programme. The authors show how contemporary work along these lines can benefit from the insights of Mannheim and his students into both morphology and genealogy. It returns Mannheim's sociology of knowledge inquiries into the broader context of a wider project in historical and cultural sociology, whose promising development was disrupted and then partially obscured by the expulsion of Mannheim's intellectual generation.

This inspired volume will appeal to sociologists concerned with the contemporary relevance of his work, and who are prepared for a fresh look at Weimar sociology and the legacy of Max Weber.

An Invitation to Critical Sociology Routledge

This volume traces the origins, contradictions and consequences of Marx's teaching on his followers. He uses Marx to speak against the rigid dogmatism inherent in much of Marxism and concentrates on the interpretations of Marx's work by Max Weber.

This is a key text in modern interpretations of alienation in Marxist theory and rationalization in Weber's sociology. It remains the best student introduction to the differences and comparisons between these two essential thinkers.

Perspectives on

Capitalism Routledge

Giddens's analysis of the

writings of Marx,

Durkheim and Weber has

become the classic text

for any student seeking to

understand the three

thinkers who established

the basic framework of

contemporary sociology.

The first three sections of the book, based on close textual examination of the original sources, contain separate treatments of each writer. The author demonstrates the internal coherence of their respective contributions to social theory. The concluding section discusses the principal ways in which Marx can be compared with the other two authors, and discusses misconceptions of some conventional views on the subject.

Discovering Sociology (RLE Social Theory)

Bloomsbury Publishing

Of the five major

sociologists whose views on Indian society are assessed in this work, originally published in 1979, Marx and Weber made a special study of the subject and had something definite to say about the future of Indian society. Herbert Spencer was primarily concerned with the effects of colonial rule on India's progress, while Durkheim and Pareto tended to observe Indian society from a comparative point of view. However, as this study shows, all five sociologists touched on two special aspects of Indian society - Indian religion and the caste system. The other features of Indian society which they discussed in their various writings range widely from marriage and family structure, through village communities and the social structure of cities, to political organization, the educational system, economic conditions, and the future progress of Indian society. Dr Madan demonstrates the correctness of Marx's contention that the political subordination of India was the one great hindrance to the future progress of Indian Society. He points out, though, that Marx failed to see

clearly the effects of the caste system on economic development, and shows that this aspect was more correctly assessed by Max Weber. On the other hand, in Dr Madan's view, Weber's observation that Indian religion was 'other-worldly' and therefore a great obstacle to progress in Indian society lacked incisiveness. By focusing on a neglected aspect of the writings of five of the great figures in sociology, the book gives a new insight into their work, and at the same time highlights many hitherto unrecognized facets of India's complex social structure.

Conflicting Interpretations of the Rise of Capitalism

SAGE Publications Limited
Praise for the First Edition:

'Totally reliable... the authors have produced a book urgently needed by all those charged with introducing students to the classics... quite indispensable' - Times Higher Education Supplement
This is a fully updated and expanded new edition of the successful undergraduate text. Providing a lucid examination of the pivotal theories of Marx, Durkheim and Weber, the authors submit that these figures have decisively shaped the discipline.

They show how the classical apparatus is in use, even though it is being directed in new ways in response to the changing character of society. Written with the needs of undergraduates in mind, the text is essential reading for students in sociology and social theory.

Capitalism and Modernity
Cambridge University Press

Essay from the year 2003 in the subject Sociology - Classics and Theoretical Directions, grade: 2.1 (B), Oxford University (New College), 5 entries in the bibliography, language: English, abstract: The study of capitalism is a predominant theme in both Marx's and Weber's writings. In conjunction with Marx's "Capital", "The Protestant Ethic and the Spirit of Capitalism" by Weber constitutes one of the two great theories of capitalism. However, one has to note that both have written a great deal on the theories of capitalism. Both writers focus on the historical and causal forces shaping capitalist society, but where Marx believed in "economic determinism", Weber also believed in so-called "non-economic" factors of capitalism. He based his analysis on a

number of interconnections he saw between capitalist development and the influences of various spheres of society such as religion, law and political institutions. I am going to give an overview of the two different explanations for the origin of capitalism by Marx and Weber. Further I am going to investigate who of the two was right or whether the two theories can be synthesised. [...]

Classical Social Theory and Modern Society

Psychology Press
Karl Marx, Emile Durkheim, and Max Weber are indispensable for understanding the sociological enterprise. They are among the chief founders of the discipline and among the foremost theorists of modernity, and their work can stimulate readers to reflect on their own identities and worldviews. *Classical Social Theory and Modern Society* introduces students to these three thinkers and shows their continued relevance today. The first chapter sets the stage by situating the work of Marx, Durkheim, and Weber in the context of three modernizing revolutions: the Enlightenment, the French

Revolution of 1789, and the industrial revolution. Three overview chapters follow that summarize the key ideas of each thinker, focusing on their contributions to the development of sociology and their conceptions of modern society. The last portion of the book explores the thinking of Marx, Durkheim, and Weber on four themes—the pathologies of modern society, the predicament of the modern individual, the state and democracy, and socialism versus capitalism. These thematic chapters place Marx, Durkheim, and Weber in dialogue with one another, offering students the opportunity to wrestle with conflicting ideas on issues that are still significant today. Classical sociology is essential to the teaching of sociology and also an invaluable tool in the education of citizens.

Max Weber and Karl Marx Ashgate Publishing, Ltd.

"An Invitation to Critical Sociology is an eloquent introduction to some of the crucial issues in contemporary society. Linking the works of three prominent classical sociologists, George Herbert Mead, Karl Marx,

and Max Weber, Hansen presents the central theme of critical sociology -- the nature of individual consciousness and its relations to society. The central ideas and issues addressed by these men are examined in terms of involvement, criticism, and exploration, the elements of critical sociology. Concerned with the fate of the individual in industrializing societies, each emphasizes a different element: Mead, involvement through self-and-other awareness; Marx, social criticism; and Weber, the joining of critical involvement and social criticism to explore life's possibilities and limitations. Through historical illustration Hansen demonstrates the significance of each theory. An Invitation to Critical Sociology stimulates thought, raises questions and arguments, and suggest new ways of looking at man and society." -- Back of cover. Mappers of Society GRIN Verlag

Despite their role in founding and defining the discipline of sociology, the field's classical theorists typically receive only cursory attention in standard introductory texts. Written specifically for undergraduate

students, this supplemental text, Fred Pampel's *Sociological Lives and Ideas* brings to life the fundamental ideas of Karl Marx, Emile Durkheim, Max Weber, Georg Simmel, George H. Mead, and W.E.B. DuBois by placing them in the context of each theorists' biography. By exploring the lives and times of these key figures, students will gain a richer understanding of their intellectual legacies, as well as of the ways in which their work can be applied to current issues.

Sociological Lives and Ideas Routledge

This collection of selected essays by Werner J. Cahnman brings together out of scattered dispersion his writings about Max Weber, Ferdinand Toennies, and historical sociology. The great theoretical range and depth of his intellect and mastery of sociological thinking is apparent as he discusses the impact of romanticism on modern thought, and how Weber and Toennies both analyzed and reacted to modernity. Cahnman places Weber (1864-1920), the dominant figure in twentieth-century sociology, in the midst of the methodological

controversies so characteristic of contemporary social science, and he fully discusses the overarching importance of Weberian ideal-type theory. Although less well-known than Weber, Toennies (1855-1936) was also a sociologist of the first rank. He is best remembered for his enormously influential twin concepts, *Gemeinschaft* and *Gesellschaft*, which contributed to our understanding of the historical and sociological basis for the change from premodern to modern societies. The essays in this volume establish Toennies' intellectual connections to Karl Marx, Max Weber, Emile Durkheim, and Herbert Spencer, and clarify his influence upon American sociology. Cahnman stood against strict separations between history and sociology, and his essays are all informed by a wonderful admixture of the theoretical and the concrete. They demonstrate how a genuine historical sociology, not unlike that of Weber and Toennies, can find and explain linkages between seemingly disparate events spanning time and

place. This volume will be of interest to sociologists, political scientists, and intellectual historians.

Ideology and the Development of Sociological Theory

Routledge

Marx, Marginalism and Modern Sociology offers an original interpretation of Marx's critique of political economy as the basis of a critique of modern economics and sociology. The core of the book is an account of Marx's theory of alienated labour as the basis of Marx's work as a whole. The critical implications of this theory are developed through an analysis of the historical development of liberal social theory from political economy to the modern disciplines of economics and sociology. *Marx Against Marxism*
University of Toronto Press

'This is an excellent introduction to classical social theory. For most students it is the only book on the subject that they will need. The expositions are clear and comprehensive, outlining with almost alarming clarity ideas with which many of us have to struggle' - Alan Bryman, The Management Centre, University of Leicester
This is a thoroughly

revised, expanded version of the best selling student text in classical social theory. The book provides an authoritative, accessible undergraduate guide to the three pivotal figures in the classical tradition. Readable and stimulating, the book explains the key ideas of these thinkers and situates them in their historical and philosophical contexts. The student gains an immediate understanding of what is distinctive and relevant about these giants of sociology. The book includes a glossary with over 150 entries. For a decade, the book has been required reading on undergraduate degree programmes. This new edition, refines the material, extends the analysis and enhances our appreciation. It is a nugget in its field.

Max Weber and Karl Marx

Macmillan

Classic and Contemporary Readings in Sociology introduces the reader to sociological issues, theories and debates, providing extracts of primary source material, from both classical and contemporary theorists. Theorists are examined within their historical and sociological framework and the text provides an

analysis of developments in sociological thought and research. The text is divided into four main sections: Part One, Origins and Concepts, surveys the history of the discipline of sociology and examines key themes which have influenced sociological theorising and investigation, in particular, social control, culture and socialisation. Parts Two and Four, Sociological Theories and Sociological Research, include a number of readings from the founding theorists and investigators, including Auguste Comte, Emile Durkheim, Karl Marx, Max Weber and Charles Booth, and also include more recent theoretical writing and research approaches. The focus on theory and research is extended by a selection of readings centred around the theme of Differences and Inequalities (Part Three); these readings provide students with examples of work from an area where sociological theorising and research has been widely applied.

Marx, Durkheim, Weber

BRILL

A collection of the most relevant and noteworthy works of classical sociological thinkers in one single volume Over

the years, many textbooks have been written about the troika of sociological geniuses, Marx, Durkheim, and Weber. Too often, however, these works have been mere distillations of the views of the great thinkers. They did not intend nor could they hope to capture the subtleties and nuances of the original texts. With the publication of Ian McIntosh's *Classical Sociological Theory: A Reader*, extracts of the most relevant and noteworthy works of the classical sociological thinkers are available for the first time in a single volume. Here we find lengthy excerpts from Marx's *Communist Manifesto* and *The German Ideology*, Weber's *Protestant Ethic and the Spirit of Capitalism*, Durkheim's *The Division of Labour in Society* and *Suicide: A Study in Sociology*. Generous

portions of fifteen other texts are included here, as well as selected correspondence of Karl Marx. Each extract is prefaced by an introduction which provides the reader with essential background information on each author's *Weltanschauung*, without telling the student what to think or encapsulating the excerpt to follow. Brief biographies of the principals and guides for further reading provide the student with a frame of reference for the texts. *Classical Sociological Theory: A Reader* is not a replacement for the full texts in the original. It is, however, an enticement, whetting the appetite for further exploration of the masters of sociological thought. *Max Weber and Value Free Sociology* SAGE Essay from the year 2012 in the subject Philosophy - Philosophy of the 19th Century, University of

Bremen, language: English, abstract: Karl Marx and Max Weber are the classics of German sociology of the end of 19th and the beginning of 20th centuries. This paper provides a brief overview on Marx' and Weber's perception and definition of the notion of 'capitalism' as well as their further comparison. Capitalism in the theories of these two prominent sociologists is represented from the different points of view, thus, the comparison promises to be significant. As the main sources for this research it is planned to use main works of Karl Marx and Max Weber on capitalism, particularly: "Capital: A Critique of Political Economy" and "The Protestant Ethic and the Spirit of Capitalism" along with analytics and criticisms of their theories, which have been done by other sociologists.
