Judge Robert H. Bork will deliver the Barbara Frum Historical Lecture at the University of Toronto in March 2002. This annual lecture “on a subject of contemporary history in historical perspective” was established in memory of Barbara Frum and will be broadcast on the CBC Radio program Ideas. In *Coercing Virtue*, former US solicitor general Robert H. Bork examines judicial activism and the practice of many courts as they consider and decide matters that are not committed to their authority. In his opinion, this practice infringes on the legitimate domains of the executive and legislative branches of government and constitutes a judicialization of politics and morals. Should courts be used as a vehicle of social change even if the majority view weighs against the court’s ruling? And if we allow courts to make law, especially in a country like Canada where our Supreme Court judges aren’t even elected, then what does this mean for democratic government? “The nations of the West have long been afraid of catching the “American disease” — the seizure by judges of authority properly belonging to the people and their elected representatives. Those nations are learning, perhaps too late, that this imperialism is not an American disease; it is a judicial disease, one that knows no boundaries.” — Robert H. Bork, from *Coercing Virtue*

The first epic poem written in Italian is the Teseida delle nozze di Emilia (Theseid of the Nuptials of Emilia) by Giovanni Boccaccio, the well-known author of the Decameron. Conceived and composed during the Florentine author's stay in Naples, it combines masterfully both epic and lyric themes in a genre that may be defined as an epic of love. Besides its intrinsic literary value, the poem reflects the author's youthful emotions and nostalgia for the happiest times of his life.

Working medievalists are often the only scholar of the Middle Ages in a department, a university, or a hundred-mile radius. While working to build a body of focused scholarly work, the lone medievalist is expected to be a generalist in the classroom and a contributing member of a campus community that rarely offers disciplinary community in return. As a result, overtasked and single medievalists often find it challenging to advocate for their work and field. As other responsibilities and expectations crowd in, we come to feel disconnected from the projects and subjects that sustain our intellectual passion. An insidious isolation even from one another creeps in, and soon, even attending a conference of fellow medievalists can become a lonely experience. Surrounded by scholars with greater institutional support, lower teaching loads, or more robust research agendas, we may feel alienated from our work - the work to which we've dedicated our careers. The Lone Medievalist (the collaborative community and the book) is intended as an antidote to the problem of professional isolation. It is offered in the spirit of common weal that marks the ideals (if not always the realities) of so many of the communities we study - agricultural, professional, national, notional, and of course, monastic. The Ballad of the Lone Medievalist isn't only about scholarship, or teaching, or institutional life, or the pursuit of new learning - it's about all of them. The essays in this volume address all aspects of the professional and intellectual life of medievalists. Though many of us acknowledge and address the challenges in being Lone

Medievalists, these essays are not intended as voces clamantium; they are offered to provide strategies, camaraderie, and an occasional bit of inspiration. They are a call to action, a sharing of hard-won wisdom, and a helping hand - and, above all, a reminder that we are not alone.

M. C. Roco and W.S. Bainbridge In the early decades of the 21st century, concentrated efforts can unify science based on the unity of nature, thereby advancing the combination of nanotechnology, biotechnology, information technology, and new technologies based in cognitive science. With proper attention to ethical issues and societal needs, converging in human abilities, societal technologies could achieve a tremendous improvement outcomes, the nation's productivity, and the quality of life. This is a broad, cross cutting, emerging and timely opportunity of interest to individuals, society and humanity in the long term. The phrase "convergent technologies" refers to the synergistic combination of four major "NBIC" (nano-bio-info-cogno) provinces of science and technology, each of which is currently progressing at a rapid rate: (a) nanoscience and nanotechnology; (b) biotechnology and biomedicine, including genetic engineering; (c) information technology, including advanced computing and communications; (d) cognitive science, including cognitive neuroscience. Timely and Broad Opportunity. Convergence of diverse technologies is based on material unity at the nanoscale and on technology integration from that scale.

The only apology made for giving this book to the public, is the earnest desire which the author has to inspire young men of the race, and especially those of the Baptist faith, who were born and reared under much more favorable circumstances than he, to greater deeds of usefulness, and to leave to the denomination a written testimony of what was accomplished by the Negro Baptists of the United States in the first years of their separate effort at Christian work. The speeches and sermons contained in this volume are not given out as an exhibition of literary talent, nor is any claim made of perfection in their construction. But they are the promptings of a heart and mind full of love for the cause of the Master and for a race that has long been oppressed and is now struggling to improve its condition in every honorable way. The writer firmly believes in the possibilities of the race and has firmly advocated that the nearly two millions of colored Christians which God has added to the Baptist churches as a mass, are an heritage, and that it is the imperative duty of Negro Baptist leaders to develop this mighty force for the glory of God and the further redemption of the race. The facts presented will be more appreciated, when it is remembered that the wonderful development and unparalleled success of the denomination form the work of only a few years. But this is the most potent argument in favor of what can be done when a united effort is made at self-help. The author has great admiration for those friends of the race who have contributed so much for the educational and religious training of the same; but he believes that people who have been helped become very unworthy when they fail to make an effort to help themselves.

Introduction to Modern Economic Growth is a groundbreaking text from one of today's leading economists. Daron Acemoglu gives graduate students not only the tools to analyze growth and related macroeconomic problems, but also the broad perspective needed to apply those tools to the big-picture questions of growth and divergence. And he introduces the economic and

mathematical foundations of modern growth theory and macroeconomics in a rigorous but easy to follow manner. After covering the necessary background on dynamic general equilibrium and dynamic optimization, the book presents the basic workhorse models of growth and takes students to the frontier areas of growth theory, including models of human capital, endogenous technological change, technology transfer, international trade, economic development, and political economy. The book integrates these theories with data and shows how theoretical approaches can lead to better perspectives on the fundamental causes of economic growth and the wealth of nations. Innovative and authoritative, this book is likely to shape how economic growth is taught and learned for years to come. Introduces all the foundations for understanding economic growth and dynamic macroeconomic analysis Focuses on the big-picture questions of economic growth Provides mathematical foundations Presents dynamic general equilibrium Covers models such as basic Solow, neoclassical growth, and overlapping generations, as well as models of endogenous technology and international linkages Addresses frontier research areas such as international linkages, international trade, political economy, and economic development and structural change An accompanying Student Solutions Manual containing the answers to selected exercises is available (978-0-691-14163-3/\$24.95). In November 1991 the American flag was lowered for the last time at Clark Air Base in the Philippines. This act brought to an end American military presence in the Philippines that extended back over 90 years. It also represented the final act in a drama that began with the initial rumblings in April of that year of the Mount inatubo volcano, located about nine miles to the east of Clark. This book tells the remarkable story of the men and women of the Clark community and their ordeal in planning for and carrying out their evacuation from Clark in face of the impending volcanic activity. It documents the actions of those who remained on the base during the series of Mount Pinatubo' s eruptions, and the packing out of the base during the subsequent months. This is the story of the Ash Warriors, those Air Force men and women who carried out their mission in the face of an incredible series of natural disasters, including volcanic eruption, flood, typhoons, and earthquakes, all of which plagued Clark and the surrounding areas during June and July 1991.

In her book *Self-Inflicted Wounds*, comedian, actress, and cohost of CBS's daytime hit show *The Talk*, Aisha Tyler recounts a series of epic mistakes and hilarious stories of crushing personal humiliation, and the personal insights and authentic wisdom she gathered along the way. The essays in *Self-Inflicted Wounds* are refreshingly and sometimes brutally honest, surprising, and laugh-out-loud funny, vividly translating the brand of humor Tyler has cultivated through her successful standup career, as well as the strong voice and unique point of view she expresses on her taste-making comedy podcast *Girl on Guy*. Riotous, revealing, and wonderfully relatable, Aisha Tyler's *Self-Inflicted Wounds: Heartwarming Tales of Epic Humiliation* is about the power of calamity to shape life, learning, and success.

The term arthrogyriposis describes a range of congenital contractures that lead to childhood deformities. It encompasses a number of syndromes and sporadic deformities that are rare individually but collectively are not uncommon. Yet, the existing medical literature on arthrogyriposis is sparse and often confusing. The aim of this book is to provide individuals affected with arthrogyriposis, their families, and health care professionals with a helpful guide to better understand the condition and its therapy. With this goal in mind, the editors have taken great care to ensure that the presentation of complex clinical information is at once scientifically accurate, patient oriented, and accessible to readers without a medical background. The book is authored primarily by members of the medical staff of the Arthrogyriposis Clinic at Children's Hospital and Medical Center in Seattle, Washington, one of the leading teams in the management of the condition, and will be an invaluable resource for both health care professionals and families of affected individuals.

This open access book focuses on practical clinical problems that are frequently encountered in stroke rehabilitation. Consequences of diseases, e.g. impairments and activity limitations, are addressed in rehabilitation with the overall goal to reduce disability and promote participation. Based on the available best external evidence, clinical pathways are described for stroke rehabilitation bridging the gap between clinical evidence and clinical decision-making. The clinical

pathways answer the questions which rehabilitation treatment options are beneficial to overcome specific impairment constellations and activity limitations and are well acceptable to stroke survivors, as well as when and in which settings to provide rehabilitation over the course of recovery post stroke. Each chapter starts with a description of the clinical problem encountered. This is followed by a systematic, but concise review of the evidence (RCTs, systematic reviews and meta-analyses) that is relevant for clinical decision-making, and comments on assessment, therapy (training, technology, medication), and the use of technical aids as appropriate. Based on these summaries, clinical algorithms / pathways are provided and the main clinical-decision situations are portrayed. The book is invaluable for all neurorehabilitation team members, clinicians, nurses, and therapists in neurology, physical medicine and rehabilitation, and related fields. It is a World Federation for NeuroRehabilitation (WFNR) educational initiative, bridging the gap between the rapidly expanding clinical research in stroke rehabilitation and clinical practice across societies and continents. It can be used for both clinical decision-making for individuals and as well as clinical background knowledge for stroke rehabilitation service development initiatives.
