Karin Bojs grew up in a small, broken family. At her mother's funeral she felt this more keenly than ever. As a science journalist she was eager to learn more about herself, her family and the interconnectedness of society. After all, we're all related. And in a sense, we are all family. My European Family tells the story of Europe and its people through its genetic legacy, from the first wave of immigration to the present day, weaving in the latest archaeological findings. Karin goes deep in search of her genealogy; by having her DNA sequenced she was able to trace the path of her ancestors back through the Viking and Bronze ages to the Neolithic and beyond into prehistory, even back to a time when Neanderthals ran the European show. Travelling to dozens of countries to follow the story, she learns about early farmers in the Middle East and flute-playing cavemen in Germany and France, and a whole host of other fascinating characters. This book looks at genetics from a uniquely pan-European perspective, with the author meeting dozens of geneticists, historians and archaeologists in the course of her research. The genes of this seemingly ordinary modern European woman have a truly fascinating story to tell, and in many ways it is the true story of Europe. At a time when politics is pushing nations apart, this book shows that, ultimately, our genes will always bind us together.

This book explores the relationships between education, lifelong learning and democratic citizenship. It emphasises the importance of the democratic quality of the processes and practices that make up the everyday lives of children, young people and adults for their ongoing formation as democratic citizens. The book combines theoretical and historical work with critical analysis of policies and wider developments in the field of citizenship education and civic learning. The book urges educators, educationalists, policy makers and politicians to move beyond an exclusive focus on the teaching of citizenship towards an outlook that acknowledges the ongoing processes and

practices of civic learning in school and society. This is not only important in order to understand the complexities of such learning. It can also help to formulate more realistic expectations about what schools and other educational institutions can contribute to the promotion of democratic citizenship. The book is particularly suited for students, researchers and policy makers who have an interest in citizenship education, civic learning and the relationships between education, lifelong learning and democratic citizenship. *Health Education: Critical perspectives* provides a socio-cultural and critical approach to health education. The book draws together international experts in the fields of health and education who deconstruct contemporary discourses and practices, and re-imagine a health education that both connects with young people and offers a way forward in addressing issues of health and wellbeing. Chapters within specifically link academic work on neoliberalism, healthism, risk and the body to wider discourses of health and health education. They challenge current practices and call for a re-thinking of current health programs in education settings. A unique feature of this book is the analyses of health education from both political and applied levels across a range of international contexts. The book is divided into three sections: the social and political contexts informing health education how individual health issues (sexuality, alcohol, mental health, the body and obesity, nutrition) articulate in education in complex ways alternative ways to think about health and health education pedagogy. The overall theme of the book offers a perspective that the current approach to health education – promoting a fear of ill health, self-surveillance and individual responsibility – can become a form of health fascism, and we need to be cognisant of this potential and its consequences for young people. The book will be of key interest to academics and researchers exploring the political context of health education.

This book captures the essence of modern family life. Much has changed since our own childhoods; the good old days. Today's parents are challenged by the need to invent their own parenting style. This can only happen from within, based on our personal values and boundaries. Jesper Juul puts it very clearly: The love we feel for our children and our partners does not in itself have

any value. It has no value at all until it is converted into loving behavior. Each chapter focuses on the values that form a solid platform on which to build a family: Equal dignity, Integrity, Authenticity and Responsibility. This makes family life more meaningful and parents avoid living frantically from conflict to conflict, desperately searching for quick solutions and trying to adapt to the most popular parenting technique of the day. A book full of everyday examples and practical ideas.

Drawing from the vast photography collection at the San Francisco Museum of Modern Art, *American Geography* charts a visual history of land use in the United States from the earliest photographic records of human habitation to the latest aerial and digital pictures, from almost uninhabited desert and isolated mountainous territories to suburban sprawl and densely populated cities, this compilation offers an increasingly nuanced perspective on the American landscape. Divided by region, these photographs address ways in which different histories and traditions of land use have given rise to different cultural transitions: from the Midwestern prairies and agricultural traditions of the South, to the riverine systems in the Northeast, and the environmental challenges and riches of the far West.

*American Geography* also looks at the evidence of older habitation from the adobe dwellings and ancient cultures of the Southwest to the Midwestern mounds, many of them prehistoric. SFMOMA's last photography exhibition to consider land use, *Crossing the Frontier* (1996), examined only the American West. At the time, this focus offered a different way to think about landscape, and a useful way to reconsider pictures of the region. *American Geography* expands upon the groundwork laid by

*Crossing the Frontier*, providing a complex, thought-provoking survey. Photographers include: Carleton E. Watkins, Barbara Bosworth, Lee Friedlander, Stephen Shore, Debbie Fleming Caffery, Mitch Epstein, An-My Lê, William Eggleston, Alec Soth, Mishka Henner, Trevor Paglen, Victoria Sambunaris, Emmet Gowin, Robert Adams, Terry Evans, Dorothea Lange and Mark Ruwedel, among others.

The many ideas, concepts and practical suggestions apply whether you are a parent or a professional working in the educational system. The title summarizes the essence of true dialogue and through plenty of everyday examples this book provides adults with alternatives to shouting, criticizing and blaming - while respecting the personal integrity of

everyone involved. Jesper Juul shows how to use personal language and thereby develop relationships built on equal dignity. Ultimately, this book helps adults become more authentic so children can be treated as real people.

Beginning in late 1945, the United States, Britain, China, Australia, France, the Netherlands, and later the Philippines, the Soviet Union, and the People's Republic of China convened national courts to prosecute Japanese military personnel for war crimes. The defendants included ethnic Koreans and Taiwanese who had served with the armed forces as Japanese subjects. In Tokyo, the International Military Tribunal for the Far East tried Japanese leaders. While the fairness of these trials has been a focus for decades, *Japanese War Criminals* instead argues that the most important issues arose outside the courtroom. What was the legal basis for identifying and detaining subjects, determining who should be prosecuted, collecting evidence, and granting clemency after conviction? The answers to these questions helped set the norms for transitional justice in the postwar era and today contribute to strategies for addressing problematic areas of international law. Examining the complex moral, ethical, legal, and political issues surrounding the Allied prosecution project, from the first investigations during the war to the final release of prisoners in 1958, *Japanese War Criminals* shows how a simple effort to punish the guilty evolved into a multidimensional struggle that muddied the assignment of criminal responsibility for war crimes. Over time, indignation in Japan over Allied military actions, particularly the deployment of the atomic bombs, eclipsed anger over Japanese atrocities, and, among the Western powers, new Cold War imperatives took hold. This book makes a unique contribution to our understanding of the construction of the postwar international order in Asia and to our comprehension of the difficulties of implementing transitional justice.

Politics was once a term with an array of broadly positive connotations, associated with public scrutiny, deliberation and accountability. Yet today it is an increasingly dirty word, typically synonymous with duplicity, corruption, inefficiency and undue interference in matters both public and private. How has this come to pass? Why do we hate politics and politicians so much? How pervasive is the contemporary condition of political

disaffection? And what is politics anyway? In this lively and original work, Colin Hay provides a series of innovative and provocative answers to these questions. He begins by tracing the origins and development of the current climate of political disenchantment across a broad range of established democracies. Far from revealing a rising tide of apathy, however, he shows that

a significant proportion of those who have withdrawn from formal politics are engaged in other modes of political activity. He goes on to develop and defend a broad and inclusive conception of politics and the political that is far less formal, less state-centric and less narrowly governmental than in most conventional accounts. By demonstrating how our expectations of politics and

the political realities we witness are shaped decisively by the assumptions about human nature that we project onto political actors, Hay provides a powerful and highly distinctive account of contemporary political disenchantment. *Why We Hate Politics* will be essential reading for all those troubled by the contemporary political condition of the established democracies.
