Manfred Lachs' famous treatise on the Law of Outer Space was originally published in 1972, yet it is still a classic and must-read text for space law students today. Issued on the occasion of the 50th anniversary of the International Institute of Space Law, of which Lachs was President, this volume reproduces the original text of Lachs' work in full, with a new preface, introduction and index supplied by the editors.

This book was conceived during the Workshop "Calibration and Orientation of Cameras in Computer Vision" at the XVIIth Congress of the ISPRS (International Society of Photogrammetry and Remote Sensing), in July 1992 in Washington, D. C. The goal of this workshop was to bring photogrammetry and computer vision experts together in order to exchange ideas, concepts and approaches in camera calibration and orientation. These topics have been addressed in photogrammetry research for a long time, starting in the second half of the 19th century. Over the years standard procedures have been developed and implemented, in particular for metric cameras, such that in the photogrammetric community such issues were considered as solved problems. With the increased use of non-metric cameras (in photogrammetry they are revealingly called "amateur" cameras), especially CCD cameras, and the exciting possibilities of acquiring long image sequences quite effortlessly and processing image data automatically, online and even in real-time, the need to take a new and fresh look at various calibration and orientation issues became obvious. Here most activities emerged through the computer vision community, which was somewhat unaware as to what had already been achieved in photogrammetry. On the other hand, photogrammetrists seemed to

ignore the new and interesting studies, in particular on the problems of orientation, that were being performed by computer vision experts.

This is the first-ever regional study of the geomorphology of the world's deserts, demonstrating why different deserts have special landscape features and land-forming processes. It explains the climatic and tectonic history of deserts, showing how the histories of the deserts have been long and complex, and how they have responded to global changes in climate, particularly over the course of the last few millions of years. Each of the major warm deserts of the world is treated in detail, and the book is extensively illustrated with numerous plates and figures. A large and comprehensive bibliography provides a guide to the international literature.

Offering a provocative alternative to the dominant approaches of Plato scholarship, the Tübingen School suggests that the dialogues do not tell the full story of Plato's philosophical teachings. Texts and fragments by his students and their followers—most famously Aristotle's *Physics*—point to an "unwritten doctrine" articulated by Plato at the Academy. These unwritten teachings had a more systematic character than those presented in the dialogues, which according to this interpretation were meant to be introductory. The Tübingen School reconstructs a historical, critical, and systematic account of Plato that takes into account testimony about these teachings as well as the dialogues themselves. The *Other Plato* collects seminal and more recent essays by leading proponents of this approach, providing a comprehensive overview of the Tübingen School for English readers.

This book is about the tumultuous and even passionate relationship between New Education and Educational Sciences, which are regarded as an inseparable «couple», intrinsically linked and surprisingly fruitful.

Yet they remain irreconcilable and are mutually contradictory in a number of their elements and characteristics. Do Educational Sciences offer a scientific base or ideological support for New Education? Do the numerous new educational initiatives and reforms provide a «laboratory» for Educational Sciences or alternatives to the new scientific paradigms? Is this at the risk of their merging? And what is the price of these tensions? Specialists in the history of Educational Sciences and New Education from various geographical, cultural and disciplinary horizons explore the complex links between this powerful reforming movement and the nascent disciplinary field that emerged during the first half of the 20th century. Cet ouvrage analyse les relations tumultueuses - passionnelles même - de l'Education nouvelle et des Sciences de l'éducation: un couple indissociable - intrinsèquement lié et d'une étonnante fécondité - autant qu'inconciliable, nombre de leurs présupposés et caractéristiques se contredisant mutuellement. Les Sciences de l'éducation offrent-elles la base scientifique ou l'appui idéologique de l'Education nouvelle ? Les nombreuses expériences et réformes éducatives constituent-elles des laboratoires des Sciences de l'éducation ou des alternatives aux nouveaux paradigmes scientifiques ? Au risque de leur fusion ? Au prix de quelles tensions ? Des spécialistes de l'histoire des Sciences de l'éducation et de l'Education nouvelle d'horizons géographiques, culturels et disciplinaires divers explorent les rapports complexes entre ce puissant mouvement réformiste et le champ disciplinaire naissant durant la première moitié du 20e siècle.

This book identifies, analyses and discusses the nexus of legal issues that have emerged in recent years around sexuality and gender. It audits these against specific human rights requirements and evaluates the outcomes as evidenced in the legislation and caselaw of six leading common law jurisdictions. Beginning with a snapshot of

the legal definitions and sanctions associated with the traditional marital family unit, the book examines the subsequently evolving key concepts and constructs before outlining the contemporary international framework of human rights as it relates to matters of sexuality and gender. It proceeds by identifying a set of themes, including the rights to identity, to form a family, to privacy, to equality and to non-discrimination, and undertakes a comparative evaluation of how these and other themes indicate areas of commonality and difference in the approaches adopted in those common law jurisdictions, as illustrated by the associated legislation and caselaw. It then considers why this should be and assesses the implications.

Although all advanced industrial societies have urban and regional development policies, such policy in the United States historically has taken on a very distinct form. Compared with the more top-down, centrally orchestrated approaches of Western European countries, US cities and, to a lesser degree, states, take the lead, spurred on by developers and those with interest in rent. This bottom-up policy creates conflict as one city battles with another for new investments and as real estate developers fight over the spoils, resulting in highly contentious politics. In *The Politics of Urban and Regional Development and the American Exception*, Cox addresses the question of why US policy is so unique. In doing so, he illustrates the essential characteristics of American regional development through a series of case studies including housing politics in Silicon Valley; the history of the Dallas-Fort Worth International Airport; and a major redevelopment project that was rebuffed in Columbus, Ohio. Cox contrasts these examples with Western Europe's tradition of centralized governmental involvement and stronger labor movements that historically have been more concerned with creating what he calls "the good geography" than profits for developers, whatever the shortfalls in policy outcomes might be. The differences illuminate the peculiar nature of political engagement and local competition in shaping the way US urban development has evolved.

Force Majeure and Hardship are commonly invoked in international trade when unforeseen events occur making

performance impossible or impracticable. Most national legislators provide rules to deal with these issues, but the specific solutions adopted in domestic laws vary substantially from one country to another. In recent years the growing complexity of trade in a globalized world has greatly increased the number of situations where a party can invoke force majeure or hardship. Parties need to be able to analyse the nature and characteristics of force majeure and hardship and look for contractual clauses which can regulate these issues in conformity with their needs. Written by international practitioners, this dossier explores the evolution of the rules on hardship, the ICC Clause on Hardship and the perspectives of contract adaptation by arbitrators. The section on Force Majeure includes an overview of recent arbitral case law (impediment beyond sphere of control and risk of the obligor; foreseeability; causation; notice requirement), analysis of the ICC 2003 Force Majeure Clause and an update on its revision. Two other important themes are included: the relationship between force majeure and applicable law, general principles of law and trade usages as well as the impact of economic sanctions.

About the publication *The African Charter on the Rights and Welfare of the Child* (African Children's Rights Charter) is the continental instrument for protecting and promoting the rights and welfare of the Child. The Children's Charter, adopted in 1990, forms part of the salient features of the African human rights system, complementing the parent human rights instrument, the African Charter on Human and Peoples Rights (African Charter). To give meaning and effect to its provisions, the African Children's Rights Charter in article 34 establishes an organ namely the African Committee of Experts on the Rights and Welfare of the Child (African Children's Rights Committee or Committee) to monitor implementation by member states, to advocate for children's rights and to hold state parties accountable to their obligations as state parties. Working collaboratively on the continent's human rights system, the organs comprising the African human rights, namely, the African Commission on Human and Peoples' Rights (Commission), the African Court on Human and Peoples' Rights (Court) and the African Children's Rights Committee, have undertaken to publish the African Human Rights Yearbook. This is an instrumental platform to highlight the mandate of the organs, to

foster collaboration and to illustrate Africa's commitment to uphold human rights. It is an important initiative that highlights various aspects of the norms and institutions relevant for human rights on the continent. This is the third volume of the Yearbook. It includes a focus on the 2019 theme of the African Union Refugees, Returnees and Internally Displaced Persons: Towards Durable Solutions to Forced Displacement in Africa. The African Children's Committee has at the same time undertaken and published a study on *Children on the Move* (2019), focusing not only on refugees, detainees and internally displaced persons, but also drawing inspiration from the protective mandate of the African Children's Rights Charter to draw the continent's attention to the protection and promotion of the rights and welfare of children who are on the move. The focus on themes of the African Union enables a critical analysis of the extent of their implementation and relevance to the human rights discourse in the continent. Furthermore, the special focus of the Yearbook on various groups of people in vulnerable situation, such as children and women, signals the need to enhance their protection and prioritise their plight. The role of academic writing in advancement of human rights deserves due notice and appreciation by human rights implementing bodies. Peer reviewed academic research provides credible and independent knowledge about human rights in a specific country or region, as well as in various contexts and thematic areas. Academia plays a major role in the development of a human rights resource base that enables sustainable enhancement of human rights protection and promotion. The African Human Rights Yearbook is an excellent example of the important role played by academia in strengthening human rights protection and promotion in Africa. The breadth of knowledge enveloped in the Yearbook is evidenced by the long list of highly established scholars that informed it. By questioning and analysing the institutional architecture and the work of the three human rights bodies, the Yearbook has an invaluable role of ameliorating their functioning as a collective system. For this reason, it is critical that the Committee, Commission and Court take note of the various recommendations stemming from the research and apply them when relevant, for better protection and promotion of human rights in Africa. Mrs. Goitseone Nanikie Nkwe Chairperson of the African Committee of Experts on the Rights and Welfare of the Child. *La Charte africaine des droits et du bien-être de*

l'enfant (Charte des droits de l'enfant) est l'instrument central en matière de protection et de promotion des droits et du bien-être de l'enfant en Afrique. Adoptée en 1990, elle fait partie intégrante des instruments clés du système africain des droits de l'homme et complète, à cet effet, la Charte africaine des droits de l'homme et des peuples, le traité fondateur du système africain des droits de l'homme. Pour mieux protéger les droits des enfants, le Comité africain d'experts sur les droits et le bien-être de l'enfant (Comité) fut créé à travers l'article 34 de la Charte des droits de l'enfant. Cet organe a pour mission de surveiller et de contrôler l'application et la mise en oeuvre de la Charte. Il veille que les Etats respectent et rendent compte de la mise en oeuvre des obligations qui leur incombent en vertu de la Charte. Travaillant en étroite collaboration dans le cadre de la protection des droits de l'homme en Afrique, la Commission africaine des droits de l'homme et des peuples, la Cour africaine des droits de l'homme et des peuples et le Comité africain d'experts sur les droits et le bien-être de l'enfant ont mis en place l'Annuaire africain des droits de l'homme. Cette initiative sert d'opportunité pour promouvoir les missions dévolues auxdits organes, raffermir les liens de collaboration entre eux et rappeler l'engagement pris par l'Afrique afin de protéger les droits humains. L'Annuaire est une initiative importante car elle met en exergue les différents aspects normatifs et institutionnels des droits de l'homme en Afrique. Ce troisième volume de l'Annuaire est dédié au thème que l'Union africaine a retenu pour l'année 2019; Année des réfugiés, des rapatriés et des personnes déplacées: Vers des solutions durables aux déplacements forcés en Afrique. En parallèle, le Comité a entrepris et publié une cartographie des enfants en mouvement en Afrique (2019) axée sur les réfugiés, les détenus et les déplacés internes. Tirant ses fondements du mandat de protection que confère la Charte des droits de l'enfant, la cartographie attire l'attention du continent sur la protection et la promotion des droits et du bien-être des enfants en mouvement. L'emphase sur les thèmes de l'Union africaine dans l'Annuaire permet d'examiner le degré de leur mise en oeuvre et leur importance au débat sur la question des droits de l'homme en Afrique. Par ailleurs, l'accent mis sur les catégories et groupes en situations de vulnérabilité dont les enfants et les femmes, sert à réitérer la nécessité de renforcer leur protection et de prioriser

leur infortune. Les organes de protection des droits de l'homme devraient reconnaître, à sa juste valeur, le rôle que jouent les travaux scientifiques dans la promotion des droits de l'homme. Les travaux de recherche scientifique relus et examinés par les pairs fournissent des connaissances crédibles et indépendantes sur les droits de l'homme dans un pays ou une région spécifique, ainsi que dans divers contextes et domaines thématiques. Les universités jouent un rôle prépondérant dans la mise en place des ressources adéquates en matière des droits de l'homme en vue de renforcer durablement leur protection et promotion. L'Annuaire africain des droits de l'homme est un parfait exemple de l'important rôle joué par les universités dans le renforcement de la protection et de la promotion des droits de l'homme en Afrique. La profondeur des connaissances que regorge l'Annuaire peut être illustrée de par la longue liste d'universitaires et des chercheurs qui le constituent. En interrogeant et en analysant l'architecture institutionnelle et le travail des trois organes de défense des droits de l'homme, l'Annuaire joue un rôle inestimable dans l'amélioration de leur fonctionnement en tant que système collectif. Pour cette raison, il est essentiel que le Comité, la Commission et la Cour prennent note des diverses recommandations découlant des recherches entreprises et les appliquent le cas échéant pour une meilleure protection et promotion des droits de l'homme en Afrique. This volume explores and explains sameness and difference between the United States and France in the matters of freedom of expression on the Internet, the management of the tensions that arise between freedom of expression and the right of privacy of public figures, the comparative role of interest groups in the regulation of Internet content in both countries, the intellectual property implications of the digitization and transfer of journalistic works from print to searchable electronic databases, how courts in the United States and France managed the copyright issues that were triggered by the Google Book Search project, as well as the clash between intellectual property rights and freedom of expression in the area of parody or "gripe" web sites on the Internet. The volume presents American exceptionalism and the French exception as functionally equivalent logics that lead to different freedom of expression outcomes. This book makes a significant contribution to comparative communication law studies, an area that has not received serious academic interest.

In 2004, the first same-sex couple married in Quebec. How did homosexuality ♦ an act that had for centuries been defined as criminal and abominable ♦ come to be sanctioned by law? In *Judging Homosexuals*, Patrice Corriveau finds answers in a comparative analysis of gay persecution in France and Quebec. By tracing over time how various groups ♦ family and clergy, doctors and jurists ♦ tried to manage people who were defined in turn as sinners, as criminals, as inverts, and as citizens deserving of protection, this book shows how the law helped construct the crime.

Written by leading experts in the field, this practical reference handbook offers an up-to-date, critical survey of the chemical vapor deposition (CVD) of nonmetals, a key technology in semiconductor electronics, finishing, and corrosion protection. The basics necessary for any CVD process are discussed in the introduction. In the following chapters, precursor requirements, with an emphasis on materials chemistry, common structures of reactants and substrates, as well as reaction control are discussed for a broad range of compositions including superconducting, conducting, semiconducting, insulating and structural materials. Technological issues, such as reactor geometries and operation parameters, are assessed and the viability of the method, both technically and economically, is compared with other techniques for the preparation of thin

films. Relevant materials and technical data are collected in tables throughout. An extensive glossary, list of abbreviations and acronyms, and over 1400 references round off this impressive work. The 'CVD of Nonmetals' offers a stimulating combination of basic concepts and practical applications. Materials scientists, solid-state and organometallic chemists, physicists, engineer, as well as graduate students will find this book of enormous value.
