*IGCSE Geography* Hodder Education

*Trends in Geography: An Introductory Survey* reviews trends in geography, including physical geography, human geography, and applied geography. Topics covered include progress in geomorphology, meteorology, climatology, hydrology, historical geography, transport geography, and industrial geography, along with the geography of rural settlements and the ecology of agricultural systems. The importance of geography in area studies is also discussed. This book is comprised of 26 chapters and begins by tracing developments in the field of geography, followed by a discussion on the study of soils in geography and the economic geography of agriculture. The following chapters explore the diversity of urban geography; the role of geography in physical planning and economic planning; planning studies in rural areas; and geographical research on local government. A cultural and historical perspective in area studies is presented by citing the case of Latin America. The final chapter is devoted to geographical studies of developing areas, focusing on the case of tropical Africa. This monograph will be of interest to teachers, students, and practitioners of geography.

*The CIA World Factbook 2010* Leckie & Leckie

To President George W. Bush, PM Tony Blair, and the European Union: "lift Zimbabwe's sanctions!"

It is designed for guided, shared and independent reading in the library, classroom and at home. There is a two-page glossary included for the more complex vocabulary. Super Sandcastle is an imprint of ABDO Publishing Company.

**Skills and Techniques for Geography A-Level** Hodder Murray

The book represents a contribution to policy formulation and design in an increasingly knowledge economy in Zimbabwe. It challenges scholars to think about the role of education, its funding and the egalitarian approach to widening access to education. The nexus between education, democracy and policy change is a complex one. The book provides an illuminating account of the constantly evolving notions of national identity, language and citizenship from the Zimbabwean experience. The book discusses educational successes and challenges by examining the ideological effects of social, political and economic considerations on Zimbabwe's colonial and postcolonial education. Currently, literature on current educational challenges in Zimbabwe is lacking and there is very little published material on these ideological effects on educational development in Zimbabwe. This book is likely to be one of the first on the impact of social, political and economic meltdown on education. The book is targeted at local and international academics and scholars of history of education and comparative education, scholars of international education and development, undergraduate and graduate students, and professors who are interested in educational development in Africa, particularly Zimbabwe. Notwithstanding, the book is a valuable resource to policy makers, educational administrators and researchers and the wider community. Shizha and Kariwo's book is an important and illuminating addition on the effects of social, political and economic trajectories on education and development in Zimbabwe. It critically analyses the crucial specifics of the Zimbabwean situation by providing an in depth discourse on education at this historical juncture. The book offers new insights that may be useful for an understanding of not only the Zimbabwean case, but also education in other African countries. Rosemary Gordon, Senior Lecturer in Educational Foundations, University of Zimbabwe Ranging in temporal scope from the colonial era and its elitist legacy through the golden era of populist, universal elementary education to the disarray of contemporary socioeconomic crisis; covering elementary through higher education and touching thematically on everything from the pernicious effects of social adjustment programmes through the local deprofessionalization of teaching, this text provides a comprehensive, wide ranging and yet carefully detailed account of education in Zimbabwe. This engagingly written portrayal will prove illuminating not only to readers interested in Zimbabwe's education specifically but more widely to all who are interested in how the sociopolitical shapes education- how ideology, policy, international pressures, economic factors and shifts in values collectively forge the historical and contemporary character of a country's education. Handel Kashope Wright, Professor of Education, University of British Columbia

**Outpost** Gilad James Mystery School

**Conservation and the Commons**

Zimbabwe is a landlocked country in southern Africa, bordered by South Africa to the south, Botswana to the west, Zambia to the north, and Mozambique to the east. The country has a population of approximately 14.4 million people, with the majority living in rural areas. Zimbabwe gained its independence from British colonial rule in 1980 and has been governed by the Zimbabwe African National Union - Patriotic Front (ZANU-PF) since then. Zimbabwe's economy has faced many challenges in recent years, including hyperinflation, a shortage of foreign currency, and political instability. Agriculture is the largest sector of the economy, with the majority of the population engaged in subsistence farming. The country is also rich in minerals such as gold, platinum, and diamonds. Despite its economic struggles,

Zimbabwe remains a popular tourist destination, known for its wildlife, natural beauty, and historical landmarks such as Great

Zimbabwe, a 15th-century stone city that is now a UNESCO World Heritage site.
