Beloved, best-selling science writer Mary Roach's "acutely entertaining, morbidly fascinating" (Susan Adams, Forbes) classic, now with a new epilogue. For two thousand years, cadavers - some willingly, some unwittingly - have been involved in science's boldest strides and weirdest undertakings. They've tested France's

first guillotines, ridden the NASA Space Shuttle, been crucified in a Parisian laboratory to test the authenticity of the Shroud of Turin, and helped solve the mystery of TWA Flight 800. For every new surgical procedure, from heart transplants to gender confirmation surgery, cadavers have helped make history in their quiet way. "Delightful—though never disrespectful" (Les Simpson, Time Out New York), Stiff investigates the strange lives of our bodies postmortem and

answers the question: What should we do after we die? "This quirky, funny read offers perspective and insight about life, death and the medical profession. . . . You can close this book with an appreciation of the miracle that the human body really is." —Tara Parker-Pope, Wall Street Journal "Gross, educational, and unexpectedly sidesplitting." —Entertainment Weekly

 This volume explores new

frontiers in the linguistic study of iconic lexemes known as ideophones, mimetics, and expressives. A large part of the literature on this long-neglected word class has been dedicated to the description of its sound symbolism, marked morphophonology, and grammatical status in individual languages. Drawing on data from

Asian (especially Japanese), African, American, and European languages, the twelve chapters in this volume aim to establish common grounds for theoretical and crosslinguistic discussions of the phonology, morphology, syntax, semantics, pragmatics, acquisition, and variation of iconic lexemes. Not only researchers who are

interested in linguistic iconicity but also theoretical linguists and typologists will benefit from the updated insights presented in each study. *Chakras W. W. Norton & Company*
