The groundbreaking account of the widespread misdiagnosis of attention deficit hyperactivity disorder—and how its unchecked growth has made ADHD one of the most controversial conditions in medicine, with serious effects on children, adults, and society. "ADHD Nation should be required reading" (The New York

Times Book Review). More than one in seven American children are diagnosed with ADHD—three times what experts have said is appropriate—meaning that millions of kids are misdiagnosed and taking medications such as Adderall or Concerta for a psychiatric condition they probably do not have. The numbers rise every year. And still, many experts and drug companies deny any cause for concern. In fact, they say that adults and the rest of the world should embrace ADHD and that its medications will transform their lives. "In this powerful, necessary book, Alan Schwarz exposes the dirty secrets of the growing ADHD epidemic" (Kirkus Reviews, starred review), including how the father of ADHD, Dr. Keith Conners, spent fifty years advocating drugs like Ritalin before realizing his role in what he now calls "a national disaster of dangerous proportions"; a troubled young girl and a studious teenage boy get entangled in the growing ADHD machine and take medications that backfire horribly; and big Pharma egregiously over-promotes the disorder and earns billions from the mishandling of children

(and now adults). While demonstrating that ADHD is real and can be medicated when appropriate, Schwarz sounds a long-overdue alarm and urges America to address this growing national health crisis.

"ADHD Nation is a necessary book. Schwarz has done a fine job on a maddening topic, and everyone who's interested in hyperactivity, attention spans, stimulants, and the current state of American health care should grab a copy" (New York magazine).

Epistemologies of the South AOSIS Dealing primarily with nursing in South Africa and the particular challenges that the country's nurses encounter, this book looks at the ethical questions confronting nurses as well as the moral philosophy behind those considerations. Ubuntu—the African notion that everyone in a community is responsible for the welfare of its members—plays a large part in the moral deliberations of the book, as do problems particular to South Africa. This second edition is updated with new case studies on the AIDS pandemic as well as new ethical questions stemming from the legalization of abortion in South Africa and the rise in the power of health worker unions. *Strategies to Sustain Small Businesses Beyond*

5 Years African Minds With support from the Open Society Institute International Palliative Care Initiative, Human Rights Watch released a groundbreaking report on the lack of access to pain relief medicines for millions of patients worldwide. The report, "Please Don't Make Us Suffer Anymore": Access to Pain Treatment as a Human Right, finds that countries can significantly improve access to pain medications by addressing the causes of their poor availability, which include the following: *Failure to put in place functioning supply and distribution systems *Absence of government policies to ensure medicine availability *Insufficient instruction for health care workers *Excessively strict drug-control regulations *Fear of legal sanctions among healthcare workers. "Please Don't Make Us Suffer Anymore" notes that international law requires states to make narcotic drugs available for the treatment of pain while preventing abuse, but that the strong international focus on preventing abuse of such drugs has led many countries to neglect that

obligation. The full report is available in PDF format. French, Russian, and Spanish versions are available on the HRW website.

Kidnapped and sold into slavery in the American South, freeman Solomon Northup spent twelve years in bondage before being freed. *Twelve Years a Slave* is Northup's moving memoir, revealing unimaginable details of the horrors he faced as a slave on Southern plantations, and his unshakable belief that he would return home to his family. Written in the year after Northup was freed and published in the wake of Harriet Beecher Stowe's *Uncle Tom's Cabin*, Northup's story was quickly taken up by abolitionist groups and news organizations as part of the fight against slavery, and continues to resonate more than a century after the end of the American Civil War.

In what ways does access to undergraduate education have a transformative impact on people and societies? What conditions are required for this impact to occur? What are the pathways from an undergraduate education

to the public good, including inclusive economic development? These questions have particular resonance in the South African higher education context, which is attempting to tackle the challenges of widening access and improving completion rates in a system in which the segregations of the apartheid years are still apparent. Higher education is recognised in core legislation as having a distinctive and crucial role in building post-apartheid society. Undergraduate education is seen as central to addressing skills shortages in South Africa. It is also seen to yield significant social returns, including a consistent positive impact on societal institutions and the development of a range of capabilities that have public, as well as private, benefits. This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues.

This is the first practical guide for nurses on how to incorporate the knowledge, skills, and tools of Strength-Based Nursing Care (SBC) into everyday practice. The text, based on a model developed by the McGill University Nursing Program, signifies a paradigm shift from a deficit-based model to one that focuses on individual, family, and community strengths as a cornerstone of effective nursing care. The book develops the theoretical foundations underlying SBC, promotes the acquisition of fundamental skills needed for SBC practice, and offers specific strategies, techniques, and tools for identifying strengths and harnessing them to facilitate healing and health. The testimony of 46 nurses demonstrates how SBC can be

effectively used in multiple settings across the lifespan.

While there is a general acknowledgement within the church itself that the Church was initially slow to respond to the magnitude of the problem of HIV and AIDS, during the recent past, as the effects of HIV and AIDS within the congregations and communities of the church have become progressively more evident, the Catholic

Church has emerged as an increasingly central role-player in a range of initiatives to combat the pandemic. This publication describes the work of the 'Choose to Care' initiative and the way it has been successfully scaled-up through the diocesan and parish network so that programmes are formed by local needs but work with common guidelines and can draw on central support.

Integrating Mental Health Into Primary Care
Simon and Schuster

This book explores the concept of 'cognitive injustice': the failure to recognise the different ways of knowing by which people across the globe run their lives and provide meaning to their existence. Boaventura de Sousa Santos shows why global social justice is not possible without global cognitive justice. Santos argues that Western domination has profoundly marginalised knowledge and wisdom that had been in existence in the global South. She contends that today it is imperative to recover and valorize the epistemological diversity of the world. Epistemologies of the South outlines a new kind of bottom-up cosmopolitanism, in which conviviality, solidarity and

life triumph against the logic of market-ridden greed and individualism.

As a journalist, Kevin Bloom had witnessed and reported on the rising tide of violence in post-Apartheid South Africa. But when his own cousin was killed in a vicious random attack, the questions he'd been asking about the troubling political and social changes in his country

took on a sickeningly personal urgency. Suddenly, it felt as though this South Africa was no longer the place he'd grown up in or the place which felt like home. Still stunned by the loss, Bloom begins to trace the path of violence from the murder of his cousin in the hills of Zululand to the fatal shooting of the historian David Rattray, linking these individual crimes to the riven political landscape, and

the riots and xenophobic attacks of 2008. Visceral, complicated and compassionate, *Ways of Staying* is an eloquent account of how the white community is coping with black majority rule, and in particular how one family is coping in the aftermath of their own private tragedy.
