of time. This is called "incremental development and continual review." Material is introduced in easily understandable pieces

(increments), allowing students to grasp one facet of a concept

before the next one is introduced. Both facets are then practiced together until another one is introduced. This feature is combined

with continual review in every lesson throughout the year. Topics are never dropped but are increased in complexity and practiced

every day, providing the time required for concepts to become

totally familiar. Algebra 1/2, third edition is made up of five

Examples with Complete Solutions, Practice of the Increment,

Daily Problem Set, and Cumulative Tests. Algebra 1/2 covers all
