Protagoras beansprucht, die Jugend erziehen zu können. Warum nicht? Wenn «Mensch Maß aller Dinge» ist, kann jeder jeden 'besser' machen... Für Plato geht das nicht auf. Was fehlt? Was ist das Maß des Menschen, wenn der Mensch Maß sein soll? Protagoras claims to be able to educate the young. Why not? If «Man is Measure of Everything», anybody can make everybody 'better'... To Plato, this doesn't add up. What's lacking? What is the measure of Man, if Man be measure?

Georg Philipp Telemann gave us one of the richest legacies of instrumental music from the eighteenth century. Though considered a definitive contribution to the genre during his lifetime, his concertos, sonatas, and suites were then virtually ignored for nearly two centuries following his death. Yet these works are now among the most popular in the baroque repertory. In *Music for a Mixed Taste*, Steven Zohn considers Telemann's music from stylistic, generic, and cultural perspectives. He investigates the composer's cosmopolitan "mixed taste"—a blending of the French, Italian, English, and Polish national styles—and his imaginative expansion of this concept to embrace mixtures of the old (late baroque) and new (galant) styles. Telemann had an equally remarkable penchant for generic amalgamation, exemplified by his pioneering role in developing hybrid types such as the sonata in concerto style ("Sonate auf Concertenart") and overture-suite with solo instrument ("Concert en ouverture"). Zohn examines the extramusical meanings of Telemann's "characteristic" overture-suites, which bear descriptive texts associating them with literature, medicine, politics, religion, and the natural world, and which acted as vehicles for the composer's keen sense of musical humor. Zohn then explores Telemann's unprecedented self-publishing enterprise at Hamburg, and sheds light on the previously unrecognized borrowing by J.S. Bach from a Telemann concerto. *Music for a Mixed Taste* further reveals how Telemann's style polonaise generates musical and social meanings through the timeless oppositions of Orient-Occident, urban-rural, and serious-comic.

This collection moves from COVID to Kairos, engaged with the legacy of Paul Tillich. Liminal spaces reflect ambiguous transitional moments in human consciousness and culture. In early 2020, cultures and states turned inward for protection, exacerbating intertwined health, political, racial justice, and economic crises. Tillich would have understood these overlapping challenges to be heralding a kairotic moment, reflecting simultaneous crises and opportunities. The collected essays reflect on the intersections of COVID and Kairos. Authors engage numerous ethical challenges precipitated by the current Kairos moment, thinking through and with Tillich. Other essays offer reflections on our cultural moment, engaging topics from public health to video games to hate speech. Reflecting on the cultural moment, this collection offers unique insight into the Tillichian legacy for the present and future.

This present volume aims to stimulate Bucer-research as it brings together a selection of the best of De Kroon's and Van't Spijker's articles some of which appear for the first time in English translation. In the first section Bucer is described as taking his

independent stand in the patristic and scholastic tradition. The next five articles go into the close personal and theological relation between Bucer and John Calvin and make clear how much of Bucer works through in Calvin and Calvinism. Bucer's efforts to bridge theological and ecclesiastical gaps brought him often in discussion with catholic as well as protestant theologians. How he dealt with this is the topic of the third section in this volume. The two following articles deal with his view on discipline and on the right of resistance. The next articles deal with Bucer's doctrinal legacy and the last section focuses on sanctification as one of the most important characteristics of his theology. The most important issues of contemporary Bucer-research and the outlines of his theology are convincingly presented in this volume by known experts for this topic.

This book examines what people mean when they say they are "spiritual". It looks at the semantics of "spirituality", the visibility of reasons for "spiritual" preference in biographies, in psychological dispositions, in cultural differences between Germany and the US, and in gender differences. It also examines the kind of biographical consequences that are associated with "spirituality". The book reports the results of an online-questionnaire filled out by 773 respondents in Germany and 1113 in the US, personal interviews with a selected group of more than 100 persons, and an experiment. Based on the data collected, it reports results that are relevant for a number of scientific and practical disciplines. It makes a contribution to the semantics of everyday religious language and to the cross-cultural study of religion and to many related fields as well, because "spirituality" is evaluated in relation to personality, mysticism, well-being, religious styles, generativity, attachment, biography and atheism. The book draws attention to the – new and ever changing – ways in which people give names to their ultimate concern and symbolize their experiences of transcendence.

One of the jewels in the crown of Johann Sebastian Bach's sacred music is its use of astonishingly subtle and complex allegorical and representational devices. But when similar devices appear in the context of one of Bach's untexted, secular, instrumental collections such as the Six Solos (sonatas and partitas) for violin, the question arises whether he might be intending to embed discernible theological significances there as well, thus infusing the secular with the sacred. Such designs would be reasonably

plausible within Bach's musical, cultural, and religious context. Shute carefully investigates the extent to which musical features of the Six Solos that seem to invite theological parallels might indeed have been intended to do so. Although the precise extent of Bach's intentions cannot be ascertained with certainty, the degree of correlation among strong potential signifiers would seem to suggest that they, and many other features of the Six Solos, are best explained as the product of extensive theological-allegorical designs on Bach's part, like those evident in his texted vocal music.
