These simple math secrets and tricks will forever change how you look at the world of numbers. *Secrets of Mental Math* will have you thinking like a math genius in no time. Get ready to amaze

your friends—and yourself—with incredible calculations you never thought you could master, as renowned “mathemagician” Arthur Benjamin shares his techniques for lightning-quick calculations and amazing number tricks. This book will teach you to do math in your head faster than you ever thought possible, dramatically improve your memory for numbers, and—maybe for the first time—make mathematics fun. Yes, even you can learn to do seemingly complex equations in your head; all you need to learn are a few tricks. You’ll be able to quickly multiply and divide triple digits, compute with fractions, and determine squares, cubes, and roots without blinking an eye. No matter what your age or current math ability, *Secrets of Mental Math* will allow you to perform

fantastic feats of the mind effortlessly. This is the math they never taught you in school.

Mental Maths Tests for Ages 10-11

Pascal Press

Mental Maths is the Maths we do in our heads without the use of calculators and without writing down the calculation.

Mental Maths strategies are the 'tricks', we use to do Maths in our heads. There are different ways of finding the answer to any Mental Maths problem, and such strategies are the focus of this series. Even though calculators and computers play an enormous role in the modern world, we still need to go back to the basics we do need to know how to check that the sales assistant at the counter is giving us the right change! Mental Maths has

become more important than ever and new primary Maths syllabuses in Australia are reflecting this. For example, NSW has placed an emphasis on Mental Maths in its primary syllabus, and even the Year 10 School Certificate examination has a compulsory non-calculator section. Features of this book include: 32 double-page units of Mentals are included % 8 units for each school term each unit is divided into four sets (A,B,C and D) of 15 questions each each numbered question covers particular Maths topics throughout the book: for example, Question 1 always covers addition, while Question 15 always covers geometry a special 'Help' section,, at the front of the book gives different strategies and explanations to help students solve Mentals problems .

These are also numbered so they link to the question numbers in each Mental Maths unit. A Fun Spot unit, containing fun activities, and a Revision unit are included at the end of each of the 8 units. Extra practice sections which reinforce particular strategies appear in the lower part of each page. Answers to all questions are in a lift-out section in the centre of the book.

The format of Mental Arithmetic differs from that of traditional mental arithmetic materials in that pupils read the questions themselves, use rough paper for workings out, and write down their answers. It provides intensive practice in

all areas of the maths curriculum.

100 Mental Maths Starters Ginn

Did you know that it's easier to add and subtract from left to right, rather than the other way round? And that you can be taught to square a three-digit number in seconds? In *Think Like A Maths Genius*, two mathematicians offer tips and tricks for doing tricky maths the easy way. With their help, you can learn how to perform lightning calculations in your head, discover methods of incredible memorisation and other feats of mental agility. Learn maths secrets for the real world, from adding up your shopping and calculating a restaurant tip, to figuring out gambling odds (or how much you've won) and how to solve sudoku faster.
