 This  
 "gorgeously  
 written"  
 National Book  
 Award finalist  
 is a dazzling,  
 heart-rending  
 story of an oil  
 rig worker  
 whose closest  
 friend goes  
 missing,  
 plunging him  
 into isolation  
 and forcing  
 him to  
 confront his  
 past (NPR,  
 One of the

Best Books of  
 the Year). One  
 night aboard  
 an oil drilling  
 platform in  
 the Atlantic,  
 Waclaw  
 returns to his  
 cabin to find  
 that his  
 bunkmate and  
 companion,  
 Mátyás, has  
 gone missing.  
 A search of  
 the rig  
 confirms his  
 fear that  
 Mátyás has  
 fallen into the  
 sea. Grief-  
 stricken, he  
 embarks on  
 an epic  
 emotional and  
 physical  
 journey that  
 takes him to  
 Morocco, to  
 Budapest and  
 Mátyás's  
 hometown in

Hungary, to Malta, Italy, and finally to the mining town of his childhood in Germany. Waclaw's encounters along the way with other lost and yearning souls—Mátyás' s angry, grieving half-sister; lonely rig workers on shore leave; a truck driver who watches the world change from his driver's seat—bring us closer to his origins while also revealing the problems of a globalized economy dependent on waning

natural resources. High as the Waters Rise is a stirring exploration of male intimacy, the nature of memory and grief, and the cost of freedom—the story of a man who stands at the margins of a society from which he has profited little, though its functioning depends on his labor. Fly Casting Farrar, Straus and Giroux This volume brings together key findings of the long-term research project

'Religious Individualisation in Historical Perspective' (Max Weber Centre for Advanced Cultural and Social Studies, Erfurt University). Combining a wide range of disciplinary approaches, methods and theories, the volume assembles over 50 contributions that explore and compare processes of religious individualisation in different religious environments and historical periods, in

particular in Asia, the Mediterranean, and Europe from antiquity to the recent past. Contrary to standard theories of modernisation, which tend to regard religious individualisation as a specifically modern or early modern as well as an essentially Western or Christian phenomenon, the chapters reveal processes of religious individualisation in a large variety of non-Western and pre-modern

scenarios. Furthermore, the volume challenges prevalent views that regard religions primarily as collective phenomena and provides nuanced perspectives on the appropriation of religious agency, the pluralisation of religious options, dynamics of de-traditionalisation and privatisation, the development of elaborated notions of the self, the facilitation of

religious deviance, and on the notion of dividuality.

If animals could tell us about themselves, using our scientific knowledge, if they could tell us about the way they live, the special way they are made and many details about their individual design - what they would say would be unique praise to the Creator. Did you know that while in flight, the sparrow's heart can beat up to 760 times per minute? Or that a baby

blue whale grows at a rate of 7.28 pounds an hour while it's nursing, a grand total of 17 tons by the end of the nursing stage? How about that glow worms have a light output efficiency of 100% as compared to only 4% for our incandescent bulbs? Dr. Werner Gitt, one of the foremost creationist speakers in the world, uses his scientific expertise in this book to show the

unique design features of some of God's most captivating creations. All people, young and old, layperson or expert, will be able to understand and enjoy this straightforward book. Told from the perspective of the animals being described, *If Animals Could Talk* clearly shows the impossibility of life without design. Dr. Gitt uses simple language to provoke a sense of wonder and

awe at the marvelous design of the Creator.

He has ridden his motorbike

across the Sahara, the Namib, and the Atacama deserts; traversed the ice of Greenland and Spitsbergen by dog sledge; flown by helicopter to the South Pole and the pristine expanses of Antarctica; and reached the North Pole on skis. written by experts in a wide variety of fields.

Portobello Books  
From the National Book Award-winning author of *The Friend*, one of the most celebrated novelists of her generation, the story of a woman's experiences in the Vietnam War "After my first book was published, I received some letters." So begins Sigrid Nunez's haunting novel about the poignant

and unusual friendship between a writer and a retired army nurse who seeks her out decades after their childhood in the same housing project. Among the letters the narrator receives is one from a Rouenna Zycinski, recalling their old connection and asking if they can meet. Though fascinated by the stories Rouenna tells about her life as a combat nurse in Vietnam, the

narrator flatly declines her request that they collaborate on a memoir. It is only later, in the aftermath of Rouenna's shocking death, that the narrator is drawn to write about her friend--and her friend's war. Writing Rouenna's story becomes all-consuming, at once a necessity and the only consolation. For Rouenna, an unforgettable novel about truth, memory, and unexpected heroism by

one of the most gifted writers of her generation, is also a remarkable and surprising new look at war.

about the European eel, *Anguilla anguilla*. So little, in fact, that scientists and philosophers have, for centuries, been obsessed with what has become known as the “eel question”: Where do eels come from? What are they? Are they fish or some other kind of creature altogether? Even today, in an age of advanced science, no one has ever seen eels mating or

giving birth, and we still don’t understand what drives them, after living for decades in freshwater, to swim great distances back to the ocean at the end of their lives. They remain a mystery. Drawing on a breadth of research about eels in literature, history, and modern marine biology, as well as his own experience fishing for eels with his father, Patrik

Svensson crafts a mesmerizing portrait of an unusual, utterly misunderstood, and completely captivating animal. In *The Book of Eels*, we meet renowned historical thinkers, from Aristotle to Sigmund Freud to Rachel Carson, for whom the eel was a singular obsession. And we meet the scientists who spearheaded the search for the eel’s point of origin, including

Danish marine biologist Johannes Schmidt, who led research efforts in the early twentieth century, catching thousands upon thousands of eels, in the hopes of proving their birthing grounds in the Sargasso Sea. Blending memoir and nature writing at its best, Svensson's journey to understand the eel becomes an exploration of the human condition that delves into

overarching issues about our roots and destiny, both as humans and as animals, and, ultimately, how to handle the biggest question of all: death. The result is a gripping and slippery narrative that will surprise and enchant. **Deserts of the Earth** HarperCollins Enjoy food that's fresh from plot to plate, not flown halfway round the world The sweetest carrots, the juiciest tomatoes, the

about the true forest magic and the important place these trees have in it. Knowledge and joy."—Sara Maitland, author of *How to Be Alone* Joining the ranks of *The Hidden Life of Trees* and *H is for Hawk*, an evocative memoir and ode to one of the most majestic living things on earth—the oak tree—probing the mysteries of nature and the healing role it plays in our lives. Thrown into turmoil by the end of his

long-term relationship, Professor James Canton spent two years meditating [PA1]beneath the welcoming shelter of the massive 800-year-old Honeywood Oak tree in North Essex, England. While considering the direction of his own life, he began to contemplate the existence of this colossus tree. Standing in England for centuries, the oak would have been a sapling when the Magna

Carta was signed in 1215. In this beautiful, transportive book, Canton tells the story of this tree in its ecological, spiritual, literary, and historical contexts, using it as a prism to see his own life and human history. The Oak Papers is a reflection on change and transformation, and the role nature has played in sustaining and redeeming us. Canton examines our long-standing dependency on the oak,

and how that has developed and morphed into myth and legend. We no longer need these sturdy trees to build our houses and boats, to fuel our fires, or to grind their acorns into flour in times of famine. What purpose, then, do they serve in our world today? Are these miracles of nature no longer necessary to our lives? What can they offer us? Taking inspiration from the literary world—Henry
