Several million reported and unreported delinquent acts take place each year. In fact, according to the U.S. Department of Justice and the U.S. Bureau of Justice Statistics, juvenile delinquency, acting-out and oppositional behavior, illegal drugs, guns, and youth violence are pervasive throughout American society. Juvenile Justice Sourcebook is the first comprehensive volume devoted exclusively to the biopsychosocial assessment, police and juvenile court processing, and institutional and community-based treatment and rehabilitation of juvenile offenders. The overriding objective of this sourcebook is to trace the tremendous progress achieved toward resolving juvenile justice issues, dilemmas, and controversies, while providing futuristic visions for the juvenile justice field. Each chapter, authored by preeminent expert practitioners and researchers, explores topics ranging from innovative counseling and multisystemic programs, to restorative justice, to rehabilitation programs such as aggression replacement training, wilderness programs, family treatment, substance abuse treatment, restitution, and aftercare. This volume, grounded in history and exhaustive research, presents the latest evidence-based policies, programs, and innovative treatment alternatives. Examining the entire juvenile justice system, including juvenile law, policies, practices, and research, the Juvenile Justice Sourcebook will be invaluable to all juvenile justice practitioners, policy analysts, researchers, and students.

The working of the 1969 Children and Young Persons Act was the subject of much debate in the 1970s. Discussion had been strong on opinion and short on facts; this book, originally published in 1977, supplied some much-needed evidence, based on the results of a research project funded by the Home Office Research Unit. It also discusses the origins of the Act and its consequences for children and their families. The authors describe the way in which two groups of children were dealt with by the police, social workers, probation officers and juvenile courts during the first three months of 1972. Their findings depict a system which decides what to do with ‘children in trouble’ mainly on the basis of their offence behaviour rather than on assessments of their personal needs – a ‘judicial’ rather than ‘welfare’ system of the kind envisaged in the legislation. As a result of these observations, the authors conclude that ‘the idea of the juvenile court has been tried and found wanting, and that it suffers from the congenital defects which fresh applications of money or manpower will fail to cure.’ They recommend the abolition of the juvenile court and the raising of the age of criminal responsibility, proposing a number of controversial alternatives based on principles of non-intervention.

Where We Stand Field workers—scientists of animal (including human!) behavior in nature—have long been fascinated by wild chimpanzees. A person who once has studied wild chimpanzees will be eager to observe them again. A person who has studied them twice will make every effort to continue the study, unless prevented from doing so. In short, behavioral primatology is addictive! Many people, among them Jane Goodall, Richard Wrangham, and I, do not regret that they have dedicated their whole lives to the study of wild chimpanzees. This is because the apes’ behavior is always challenging: chimpanzees are cheerful, charming, playful, curious, beautiful, easygoing, generous, tolerant, and trustw- thy most of the time, but also are cautious, cunning, ugly, violent, ferocious, blo- thirsty, greedy, and disloyal at other times. We human beings share both the light and dark sides with our closest living relatives. For decades, we have documented huge across-population variation in behavior, as well as within-population variation. Cultural biology (now called cultural pri- tology), as proposed 60 years ago by Kinji Imanishi, recently has flourished.

The Routledge International Handbook of Juvenile Homicide is the definitive work on juvenile homicide. This volume provides an up-to-date, comprehensive, and in-depth exploration of what is known about juveniles involved in murder. Taking an interdisciplinary approach to juvenile homicide, this handbook brings together the leading experts in social sciences, mental health, and law from many countries. The volume covers the phenomenon of juvenile homicide from beginning to end, by addressing the questions “why do kids kill?” all the way to “how does society stop them from killing?”. The tough issues involved in sentencing youths who take the lives of others, often deliberately and in horrific ways, are confronted through chapters addressing the legal issues, child development factors, risk assessment, public attitudes, and ethical concerns. The volume brings together research specifically conducted for this volume, in addition to summaries and discussions of clinical and empirical findings. Each chapter ends with key takeaway points. Contributors include psychologists, psychiatrists, criminologists, sociologists, lawyers, economists, biologists, epidemiologists, and public health and public policy experts. Uniquely, they examine murder by juveniles across the globe. The volume includes research pertaining to the causes, correlates, and theoretical explanations of juvenile homicide offending. Moving beyond discussions of juvenile homicide offenders (JHOs) as a homogenous group, the volume includes research on specific types of JHOs and research investigating age and gender

differences among JHOs. In addition, it draws attention to the empirical factors associated with juvenile homicide offending, effective treatment of JHOs, recidivism, and prevention of violent behavior. The volume also makes recommendations for policy and practice, including how to shift government policy from punishing lawbreakers to saving lives. This volume is essential reading for scholars and students researching youth violence/juvenile homicide across a variety of disciplines including criminology, criminal justice, law, psychology, psychiatry, sociology, social work, public health, and education. It is also an invaluable reference for mental health professionals, practitioners in the juvenile and criminal justice systems, policymakers, and government leaders.

Sexual homicide is murder committed in tandem with either an overt sexual assault or sexually symbolic behavior. This type of murder carried out by youths is one of the rarest and most poorly understood crimes. How can young people carry out such horrific crimes? Do the offenders have anything in common? Do they show any warning signs? This book highlights groundbreaking research that begins to find the answers to these questions. Juvenile Sexual Homicide is the first book to take a comprehensive look at this specific type of crime and attempt to understand the young criminals involved. It is based on a 10-year study that evaluates a sample of juvenile sexual murderers and provides a revealing look at the psychopathology, personality, criminal, and behavioral characteristics of their offenses. Roger Blashfield, Mark Safarik, and Linda Monaco are contributing authors. Part I reviews the origins and framework of the research sample and provides a comprehensive overview of sexual homicide. Part II delves deeply into the criminal aspects of the sample study in relation to various mental disorders. Personal findings and psychopathy of the offenders are revealed in addition to the investigation into the role of anger in the crimes. Part III presents a more in-depth look at special issues and circumstances surrounding the juveniles and their crimes. The first in-depth study of juvenile sexual murderers A revealing look at the interaction between mental illness, personality function and crime characteristics

Over the last few decades, the racial and ethnic composition of the United States has changed dramatically. This seismic transformation has important implications for theory, research, policy, and public opinion – perhaps most crucially around the topic of race/ethnicity and our justice systems. Recent national events – from Ferguson, to ferocious public debate about racism, to media depictions of police violence – have reawakened the tense question of race relations in the 21st century. This edited collection of research aims to highlight contemporary issues surrounding the overrepresentation of racial and ethnic minorities throughout both the juvenile and adult criminal justice systems. Our contributors cover both formal sources of social control (e.g. police, courts, correction facilities) and perceptions and public opinions of the relationship between race/ethnicity and offending behaviors. As the intellectual sphere ignites with fresh debate, old questions redefined and new ones asked, this publication provides innovative insight into how race and ethnicity interconnect with all aspects of criminology and criminal justice. Furthermore it helps encourage directions for future research, practice, and public policy. This book was originally published as a special issue of the Journal of Crime and Justice.

There is an existing gap currently in the academic discourse pertaining to the treatment of juveniles before, during and after their conflict with the law. This book attempts to identify this lacuna in the Indian juvenile justice system and study its impact on our children. It remedies this crucial gap by juxtaposing 'what is' with 'what ought to be' by analysing the results of a study conducted in observation homes and special homes in the National Capital Territory of Delhi, Haryana and Punjab. The data was studied on parameters which reflect upon all aspects of the life and experiences of juveniles before their conflict with the law, inside the homes as well as their post-release prospects. This data was then tested vis-à-vis the requirements of the standard of living, reformation, rehabilitation and reintegration mandated under the Juvenile Justice Act, 2000, as well as the Juvenile Justice Act, 2015. Presenting a comprehensive account, the book further details the amendments in the juvenile justice laws after the Nirbhaya case and offers a critique to it on the grounds of both descriptive realities as well as the current normative understanding of juvenile justice.

Throughout his life, Louis Armstrong tried to explain how singing with a barbershop quartet on the streets of New Orleans was foundational to his musicianship. Until now, there has been no in-depth inquiry into what he meant when he said, "I figure singing and playing is the same," or, "Singing was more into my blood than the trumpet." *Creating the Jazz Solo: Louis Armstrong and Barbershop Harmony* shows that Armstrong understood exactly the relationship between what he sang and what he played, and that he meant these comments to be taken literally: he was singing through his horn. To describe the relationship between what Armstrong sang and played, author Vic Hobson discusses elements of music theory with a style accessible even to readers with little or no musical background. Jazz is a music that is often performed by people with limited formal musical education. Armstrong did not analyze what he played in theoretical terms. Instead, he thought about it in terms of the voices in a barbershop quartet. Understanding how Armstrong, and other pioneer jazz musicians of his generation, learned to play jazz and how he used his background of singing in a quartet to develop the jazz solo has fundamental implications for the teaching of jazz history and performance today. This assertive book provides an approachable foundation for current musicians to unlock the magic and understand jazz the Louis Armstrong way.

Austria's economy is characterized through small and medium sized enterprises. Solo entrepreneurs are considered a special form within SMEs and contribute a major share to Austria's economy besides being Austria's most popular legal form of organization within the micro firms. In 2020 every second of Carinthia's start-up businesses was established by a female entrepreneur. According to an entrepreneurship study presented by Volksbank in 2019, nearly half of all female entrepreneurs lived with children and juveniles. Two-thirds of women said they were solely responsible for family, childcare, and household and 71 percent of those female entrepreneurs specified that those circumstances caused difficulties for them. This book

investigated Carinthian female solo entrepreneurs and aims to find out how these hard-working women manage their business and private life while contributing to such great extent to the (federal) state's economy. The conceptual foundations were found in embeddedness and the contextual framework which supports the importance of numerous influences on different levels placed on the entrepreneur. The empirical section represents a primary research that evaluates self-collected data sets of Carinthian solo-entrepreneurs.

The 1940s saw a brief audacious experiment in mass entertainment: a jukebox with a screen. Patrons could insert a dime, then listen to and watch such popular entertainers as Nat "King" Cole, Gene Krupa, Cab Calloway or Les Paul. A number of companies offered these tuneful delights, but the most successful was the Mills Novelty Company and its three-minute musical shorts called Soundies. This book is a complete filmography of 1,880 Soundies: the musicians heard and seen on screen, recording and filming dates, arrangers, soloists, dancers, entertainment trade reviews and more. Additional filmographies cover more than 80 subjects produced by other companies. There are 125 photos taken on film sets, along with advertising images and production documents. More than 75 interviews narrate the firsthand experiences and recollections of Soundies directors and participants. Forty years before MTV, the Soundies were there for those who loved the popular music of the 1940s. This was truly "music for the eyes."
