Nautical  
Travel journal and account book of an unidentified itinerant surveyor from German Flats, N.Y., documenting his travels and surveying work in New York State and Vermont in 1794. The author begins his travel narrative on leaf [8] of the notebook (counting from the back), as he leaves German Flats on June 7, 1794 for a surveying project near Kingston, Vermont. In Little Falls, N.Y., he is joined by John V.E. Wimple, perhaps a fellow surveyor, and the two men travel on to Schenectady and Albany, where the author receives 45 pounds from Major Delany to cover the expenses of surveying a tract of land near Kingston, Vt. Journal entries also describe stops in Watertown, Fort Edward, Fort Ann, and

Whitehall, N.Y., and Fair Haven, Castleton, Rutland, Hancock, and Kingston, Vt., mentioning the weather, means of transport, and lodgings. Also included are mathematical calculations; four sketches of land parcels; pencilled notes with survey descriptions and records of payment; and a list (dated erroneously June 7, 1793) of the author's travel expenses, as well as those of Wimple. Finally, one leaf describes lots surveyed on Nov. 1, 1794 in Staley's Patent in Herkimer County, N.Y., all with German owners. Of special interest is the author's mention of the iron works and and newly-constructed paper mill in Fair Haven, Vt.

 Maps capture data expressing the economic complexity of countries from Albania to

Zimbabwe, offering current economic measures and as well as a guide to achieving prosperity Why do some countries grow and others do not? The authors of The Atlas of Economic Complexity offer readers an explanation based on "Economic Complexity," a measure of a society's productive knowledge. Prosperous societies are those that have the knowledge to make a larger variety of more complex products. The Atlas of Economic Complexity attempts to measure the amount of productive knowledge countries hold and how they can move to accumulate more of it by making more complex products. Through the graphical representation of the "Product Space," the authors are able to identify each country's "adjacent possible," or potential new products, making it easier to find paths to economic diversification and growth. In addition, they argue that a country's economic complexity and its position in the product space are better predictors of economic growth than many other well-known development indicators, including measures of

competitiveness, governance, finance, and schooling. Using innovative visualizations, the book locates each country in the product space, provides complexity and growth potential rankings for 128 countries, and offers individual country pages with detailed information about a country's current capabilities and its diversification options. The maps and visualizations included in the Atlas can be used to find more viable paths to greater productive knowledge and prosperity. *The Company I Keep* Waterford Press

Mean Girls meets Life of Pi in this darkly humorous, compulsively readable teen novel that's perfect for fans of Libba Bray and Andrew Smith. A hilariously dark and twisted story that sparkles with a remarkably fresh voice, *The Lifeboat Clique* is Kathy Parks's irreverent yet insightful novel about how to survive in the most unthinkable

circumstances. Some people might say that Denver has a death wish. Why else would she dare to sneak into a Malibu beach party where she'd be surrounded by enemies? Oh yeah. Croix. Denver never thought in a million years he'd ask her out, but who is she to question this miracle of fate? Well, that isn't the only surprise fate has in store. During the party a tsunami hits the coast of California, and Denver and a handful of others escape death and are swept out to sea. Of course, one of her fellow castaways is none other than her ex-BFF, Abigail, who can barely stand the sight of her. Trapped on a small boat with the most popular kids in school and waiting to be rescued, Denver wonders what might kill her first—dehydration, sunstroke, or the girl she used to think of as a sister?
