MARCO WHITEHEAD

Who is who in Kenya Rowman & Littlefield

Western-educated Elites in Kenya, proposes to conduct a critical examination of the emergence of the American-educated Kenyan elites (the Asomi) and their role in the nationalist movement and eventually their Africanization of the Civil and Private sectors in Kenya.

Fountain of Knowledge IGI Global

Fountain of Knowledge: History of the University of Nairobi 1952-2020 follows the development of the University from its origins as the Royal Technical College in 1952, to the World Class University it has become in 2020. As the 'mother' university in Kenya, its history also provides a narrative of the evolution of university education in Kenya over the same period. Major events, activities and policies changes that have shaped university education are presented in the context of the University of Nairobi's growth. Throughout the text, a large collection of photographs brings to life the development of the university over the past 68 years.

Soil Management of Smallholder Agriculture UJ Press

This book examines some of the major higher education reforms and policy shifts globally, particularly in the light of recent shifts in quality and standards-driven education and policy research. It critiques the neo-liberal ideological imperatives of current higher education and policy reforms, and illustrates the way that changes in the relationship between the state and higher education policy affect current trends in higher education reforms. Using diverse comparative education paradigms from critical theory to historical-comparative research, the chapters focus on globalisation, ideology and higher education reforms and

examine both the reasons and outcomes of higher education reforms and policy change. The book analyses and evaluates the policy shifts in methodological approaches to globalisation and higher education reforms, and their impact on education policy and pedagogy. The book contributes in a very scholarly way, to a more holistic understanding of the nexus between globalisation, comparative education research and higher education reforms.

Research and Development Progress in 3D Cadastral Systems Taylor & Francis

First Published in 1991. This volume, containing the proceedings of a Conference organised by the Science, Technology and Development (STD) Forum in association with the Developing Countries Research Unit (DCRU), University of Strathclyde, on 9-10 April 1990, is a modest attempt at advancing awareness concerning Third World development mainly in two inter-related areas: (a) the problems faced in the advancement of science and technology in the Third World and (b) the use of scientific and technological knowledge for promoting sustainable development of these countries. Given the multi-disciplinary character of the Conference and, in particular, the variety of approaches adopted by the contributors, any attempt to synthesise the papers in a brief introduction is likely to be futile. The best that can be done is to introduce some of the papers in a brief review. But before that a few words on the objectives of the Conference, and in particular on the need for North-South Cooperation in science, technology and development, may be helpful.

Western-Educated Elites in Kenya, 1900-1963 Rowman & Littlefield

Freedom in the World is the standard-setting comparative assessment of global political rights and civil liberties. The methodology of this survey is derived in large measure from the Universal Declaration of Human Rights, and these standards are

applied to all countries and territories.

Engineering Springer Science & Business Media

The Routledge Handbook of Language and Youth Culture offers the first essential grounding of critical youth studies within sociolinguistic research. Young people are often seen to be at the frontline of linguistic creativity and pioneering communicative technologies. Their linguistic practices are considered a primary means of exploring linguistic change as well as the role of language in social life, such as how language and identity, ideology and power intersect. Bringing together leading and cutting-edge perspectives from thought leaders across the globe, this handbook: • addresses how young people's cultural practices, as well as forces like class, gender, ethnicity and race, influence language • considers emotions, affect, age and ageism, materiality, embodiment and the political youth, as well as processes of unmooring language and place • critically reflects on our understandings of terms such as 'language', 'youth' and 'culture', drawing on insights from youth studies to help contextualise age within power dynamics • features examples from a wide range of linguistic contexts such as social media and the classroom, as well as expressions such as graffiti, gestures and different musical genres including grime and hip-hop. Providing important insights into how young people think, feel, act, and communicate in the complexity of a polarised world, The Routledge Handbook of Language and Youth Culture is an invaluable resource for advanced students and researchers in disciplines including sociolinguistics, linguistic anthropology, multilingualism, youth studies and sociology.

African ocean stewardship: Navigating ocean conservation and sustainable marine and coastal resource management in africa Syracuse, N.Y. : Syracuse University, Maxwell Graduate School of Citizenship and Public Affairs

The Kenya Gazette is an official publication of the government of the Republic of Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week.

Kenyan Public Universities in the Age of Internationalization IGI Global

This book highlights the pioneering roles of African women as leaders and role models in Kenya, providing examples taken from across education, health, business, and a range of other sectors. Drawing on authentic first-hand accounts and narratives from key women in leadership positions, and those who have lived with them, the book presents the life stories of women leaders over the last fifty years, aiming to preserve their contributions for posterity and to inspire young people with moral, ethical, and progressive role models. The book uses African knowledge production strategies that look at the human being holistically, in the prism of Ubuntu, in order to define leadership in Africa from an African perspective, one that celebrates the role of the mother figure and places women at the centre of African values and societal dynamics. This book will be of interest to researchers and students of African studies, gender studies, and Kenyan education and socio-political history.

ILCA Annual Report 1986/7 Taylor & Francis

The book illuminates the national imperatives and institutional level choices African IHEs must contend with in their efforts to carve their niche on a global stage. It is a great addition to the field of comparative international education which has traditionally been dominated by the experiences of IHEs in the developed world.

Adapting cities for transformative climate resilience: Lessons from the field Routledge

This book explores the role and place of popular, traditional and digital media platforms in the mediatization, representation and performance of various conflicts and peacebuilding interventions in the African context. The role of the media in conflict is often depicted as either 'good' (as symbolized by peace journalism) or 'bad' (as exemplified by war journalism), but this book moves beyond this binary to highlight the 'in-between' role that the media often plays in times of conflict. The volume does not only

focus on the relationship between mass media, conflict and peacebuilding processes but it broadens its scope by critically analysing the dynamic and emergent roles of popular and digital media platforms in a continent where the semi-literate and oral communities still rely heavily on popular communication platforms to get news and information. Whilst social media platforms have been hailed for their assumed democratic and digital dividends, this book does not only focus on these positive aspects but also shines a light on dark forms of participation which are fuelling racial, gender, ethnic, political and religious conflicts in highly polarized and stratified societies. Highlighting the many ways in which traditional, digital and popular media can be used to both escalate conflicts and promote peacebuilding, this volume will be a useful resource for students, researchers and civil society groups interested in peace and conflict studies, journalism and media studies in different contexts within Africa.

Impact of Global University Ranking Systems on Developing Countries Routledge

The implicit topology of international institutional complexes varies greatly across policy areas. In some areas, the lion's share of everyday policy cooperation is shaped by a single institution with alternative and more regional institutions operating in its shadow. In other policy fields, institutional structures appear to be different, seeing a range of non-hierarchical, decentralized, alternative institutions. The Institutional Topology of International Regime Complexes: Mapping Inter-Institutional Structures in Global Governance provides a systematic conceptualization and explanation of the evolution of these varying institutional topologies underlying regime complexes across five issue areas of Global Governance: Intellectual Property Protection, Tax Avoidance, Financial Stability, Development Aid, and Energy Governance. By providing an empirically grounded, network-based conceptualization and mapping of institutional topologies, as well as a theoretical explanation for their variation across policy space and time, the book offers a comprehensive analysis of both the empirical manifestation of inter-institutional structures across various policy fields of Global Governance and the issue specific factors that shape the varying institutional trajectories spurring (de-) centralization. Daßler combines quantitative network analyses with qualitative case studies to trace institutional decentralization processes across five highly relevant

issue areas of Global Governance. This volume shows how the nature of issue-specific cooperation problems translates into disparate structures among multilateral institutions occupying the same regime complex. In light of growing concerns about the future trajectories of Global Governance in times of heightened geopolitical tensions, Daßler offers a fresh perspective to comparatively capture the profoundly varying institutional landscapes across different issue areas and their associated challenges and benefits of multilateral cooperation.

Transformations in Governance is a major academic book series from Oxford University Press. It is designed to accommodate the impressive growth of research in comparative politics, international relations, public policy, federalism, and environmental and urban studies concerned with the dispersion of authority from central states to supranational institutions, subnational governments, and public-private networks. It brings together work that advances our understanding of the organization, causes, and consequences of multilevel and complex governance. The series is selective, containing annually a small number of books of exceptionally high quality by leading and emerging scholars. The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina, Chapel Hill, and Walter Mattli of the University of Oxford.

Daily Graphic Springer Nature

The emotive discourses on the subject of university rankings are directly linked to the effect of such rankings on the performance of universities throughout the world. It has been observed that the top-ranked universities attract major financial commitments from the industry, the best students, quality researchers, and a wide range of other quality endowments such as equipment, libraries, and laboratories. It is not surprising that the ranking of universities has gained popularity and become a significant factor shaping not only the reputation of universities but also the performance of said institutions around the world, including the developing countries. Impact of Global University Ranking Systems on Developing Countries presents a collection of perspectives from scholars and other stakeholders on the impact of the global ranking systems on developing countries. The book is an additional resource for discussion and discourse as far as the global university ranking systems are concerned and opens new frontiers for further research. Covering key topics such as

assessment, ethics, and academic freedom, this premier reference source is ideal for administrators, policymakers, researchers, scholars, academicians, practitioners, instructors, and students.

Kenya Gazette Taylor & Francis

Over the last ten years mobile payment systems have revolutionised banking in some countries in Africa. In Kenya the introduction of M-Pesa, a new financial services model, has transformed the banking and financial services industry. Giving the unbanked majority access to the financial services market it has attracted over 18 million subscribers which is remarkable given that fewer than 4 million people in Kenya have bank accounts. This book addresses the legal and regulatory issues arising out of the introduction of M-Pesa in Kenya and its drive towards financial inclusion. It considers the interaction between regulation and technological innovation with a particular focus on the regulatory tools, institutional arrangements and government decisional processes through the examination as a whole of its regulatory capacity. This is done with a view to understanding the regulatory capacity of Kenya in addressing the vulnerabilities presented by technological innovation in the financial industry for consumers after financial inclusion. It also examines the way that mobile payments have been regulated by criticising the piecemeal approach that the Central Bank of Kenya has taken in addressing the legal and regulatory issues presented by mobile payments. The book argues there are significant gaps in the regulatory regime of mobile banking in Kenya.

Inside Kenya Today Lexington Books

Viewing the plurality of creativity in music as being of paramount importance to the field of music education, *The Routledge Companion to Creativities in Music Education* provides a wide-ranging survey of practice and research perspectives. Bringing together philosophical and applied foundations, this volume draws together an array of international contributors, including leading and emerging scholars, to illuminate the multiple forms creativity can take in the music classroom, and how new insights from research can inform pedagogical approaches. In over 50 chapters, it addresses theory, practice, research, change initiatives, community, and broadening perspectives. A vital resource for music education researchers, practitioners, and students, this volume helps advance the discourse on creativities in music

education.

Unesco List of Documents and Publications Frontiers Media SA
Land Degradation and Desertification: Assessment, Mitigation, and Remediation reports research results in sustainable land management and land degradation status and mitigation in 36 countries around the world. It includes background papers with continental and international perspectives dealing with land degradation and desertification studies. The book assembles various topics of interest for a large audience. They include carbon sequestration and stocks, modern techniques to trace the trends of land degradation, traditional and modern approaches of resource-base conservation, soil fertility management, reforestation, rangeland rehabilitation, land use planning, GIS techniques in desertification risk cartography, participatory ecosystem management, policy analyses and possible plans for action. Various climatic domains in Africa, Asia, Europe and The Americas are covered. The book will be of interest to a variety of environmental scientists, agronomists, national and international policy makers and a number of organizations dealing with sustainable management of natural resources.

It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week.
Intercropping Systems in Sustainable Agriculture ILRI (aka ILCA and ILRAD)

The increasing complexity of infrastructures and densely built-up areas requires a proper registration of the legal status (private and public), which can only be provided to a limited extent by the existing 2D cadastral registrations. The registration of the legal status in complex 3D situations is investigated under the header of 3D Cadastres. This publication, containing 13 selected contributions on 3D Cadastre, addresses the following areas: 1. 3D Cadastre operational experiences (analysis, LADM based, learning from each other, discovering gaps), 2. 3D Cadastre cost-effective workflow for new/updated 3D parcels = 4D (part of whole chain: From planning/design/permit in 3D, to

registration/use in 3D), 3. 3D Cadastre web-based dissemination (usability, man-machine interfaces, including mobile/AR), 4. legal aspects for 3D Cadastre, best legal practices in various legislation systems, focus on large cities, including developing countries, 5. 3D data management, and 6. visualization, distribution, and delivery of 3D parcels.

The Black Collegian Frontiers Media SA

Nearly two billion people depend on hundreds of millions of smallholder farmers for food security. Yet, these farmers' lives also hang in the balance due to their extreme vulnerability to the risks of soil degradation and depletion, soil exhaustion, climate change, and numerous biotic and abiotic stresses. *Soil Management of Smallholder Agriculture* explores the potential smallholder agriculture hold for advancing global food security and outlines the challenges to achieving this goal. The book addresses the challenges and opportunities that resource-poor and small landholders face and provides recommended management practices to alleviate soil-related constraints, and increase and sustain crop yield and production. It discusses the cultural, economic, social, and technological aspects of sustainable soil management for smallholder farmers. It then examines soil-related and institutional constraints, principles of sustainable agriculture, soil quality improvement, nutrient and soil fertility management, soil carbon sequestration, soil security, efficient use of resources, and agronomic production. Edited by experts, the book makes the case for the adoption of proven technologies of sustainable intensification, producing more from less, both for advancing agronomic production and adapting to changing climate. It outlines a strategy that will usher in a soil-based Green Revolution by increasing the use efficiency of energy-based inputs such as fertilizers, pesticides, and irrigation to restore soil quality, and sequestering carbon in the terrestrial ecosystems. This strategy helps small farms narrow the gap between the actual and attainable crop yield.

Resources in Education Frontiers Media SA

Kenya has a long and complex history that began thousands of years ago. Indeed, some archaeologists contend that the country was the "cradle of mankind" or, at the very least, one of the places that was home to the earliest hominids. In later centuries, Kenya's strategic location astride the Indian Ocean and the East African littoral attracted numerous foreign peoples, some of the

most significant of which have been the Americans, Arabs, British, Chinese, French, Germans, and Portuguese. Additionally, Africans from throughout the subcontinent have settled in Kenya to escape conflict or political persecution, while others wanted an opportunity to begin a new life. As a result of being a gateway to the world, the country traditionally has been one of the most important business, cultural, diplomatic, and political centers in Africa. Although it has maintained this reputation during the post-independence period, Kenya, like most African countries, has been plagued by an increasing array of complex economic, political, and social problems. This third edition of Historical

Dictionary of Kenya provides a starting point for those interested in any of the phases of Kenya's historical evolution. This is done through a chronology, an introductory essay, appendixes, and an extensive bibliography. The dictionary section has 500 cross-referenced entries on important personalities, politics, economy, foreign relations, religion, and culture. This book is an excellent access point for students, researchers, and anyone wanting to know more about Kenya.

Land Degradation and Desertification: Assessment, Mitigation and Remediation CRC Press

Taking into consideration the variety of information being created, produced, and published, the acquisition and archiving of

e-resources by digital libraries is rapidly increasing. As such, managing the rights to these resources is imperative. The Handbook of Research on Managing Intellectual Property in Digital Libraries is a pivotal reference source for the latest scholarly research on strategies in which digital libraries engage in the management of increasing digital intellectual property to protect both the users and the creators of the resources. Featuring coverage on a broad range of topics such as copyright management, open access, and software programs, this book is ideally designed for academicians, researchers, and practitioners seeking material on property rights and e-resources.
