The Eclectic Medical Journal Elsevier Health Sciences

The ultimate aim of any teaching system is to produce the best scholars & the best professionals in the today's scenario with futuristic approach so that when given a chance they must be able to exhibit their past knowledge. To verify or quantify this knowledge the student/scholar has to undergo certain exam. Nowadays the best exams are supposed to be those having Multiple Choice Questions i.e. MCQ's as integral part because of two important reasons, First easy to conduct & uniform evaluation for all students, that is no bias, Second MCQ's checks memory/recall memory/reasoning & ability to be precise in terms of reading /understanding and speed with ability to record answers with accuracy too. The book on this subject "Exam Success Review ANATOMY MCQ's- Volume-1, Head Neck & Brain for Medical Students - MBBS 1st Prof & PG Entrance" will be helpful as a companion for fast revision during examination and will help them certainly to secure full marks in the Multiple Choice Questions in examination. These MCQ's make about 20% to 40% of total marks in the 1st prof. MBBS exam and anybody who knows the concepts and art to answer the MCQ's is going to be winner not only at MBBS level but also at various Postgraduate entrance Examinations at national & state level to get the PG Course of their choices.

Edinburgh Medical Journal Scientific Publishers

OphthoBook is the printed version of the amazing OphthoBook.com online book and video series. The combination of this text, along with the online video lectures, creates the most informative and easy-to-understand ophthalmology review ever written. It is geared toward medical students, optometry students, and non-ophthalmologists who want to learn more about the eye without getting bogged down with mindless detail. The book is broken down into ten chapters: 1. Eye History 2. Anatomy 3. Glaucoma 4. Retina 5. Infection 6. Neuroophthalmology 7. Pediatric Ophthalmology 8. Trauma 9. Optics 10. Lens and Cataract Each chapter also includes "pimp questions" you might be asked in a clinic. Also, an entire chapter of ophthalmology board-review questions, flashcards, and eye abbreviations. Perhaps most useful, each chapter corresponds to the 20-minute video lectures viewable at OphthoBook.com. And lots of fun cartoons!

standard NCLEX format. A free CD-ROM with 150 NCLEX format questions is packaged with each title in the series. A Volume in the Rollant Nursing Review Series (Includes FREE CD-ROM)

Medical Times Simon and Schuster

Geared to LPNs/LVNs, this quick-reference pocket book provides an easy-to-understand guide to ECG interpretation and features over 200 clearly explained ECG rhythm strips. Following a refresher on relevant cardiac anatomy, physiology, and electrophysiology, the book presents the 8-step method for reading any rhythm strip. Subsequent chapters explain various cardiac rate and rhythm abnormalities, including sinus node arrhythmias, atrial arrhythmias, junctional arrhythmias, ventricular arrhythmias, and atrioventricular blocks. Arrhythmias are covered in a consistent format—causes, significance, ECG characteristics, signs and symptoms, and interventions. Coverage also includes ECG characteristics of disorders, drugs, pacemakers, and implantable cardioverter-defibrillators and a chapter on basic 12-lead electrocardiography.

First multi-year cumulation covers six years: 1965-70.

Nursing Pharmacology Scientific Publishers

Clinical Case Studies for the Family Nurse Practitioner is a key resource for advanced practice nurses and graduate students seeking to test their skills in assessing, diagnosing, and managing cases in family and primary care. Composed of more than 70 cases ranging from common to unique, the book compiles years of experience from experts in the field. It is organized chronologically, presenting cases from neonatal to geriatric care in a standard approach built on the SOAP format. This includes differential diagnosis and a series of critical thinking questions ideal for self-assessment or classroom use.

Pathophysiology for the Boards and Wards Blackwell Pub

Pathophysiology for the Boards and Wards, Fifth Edition offers the information most tested on the USMLE Step 1 in a systematic, outline manner. This essential guide eases the transition from classroom to wards and works well as a companion on rotations, covering the information you need to master your clerkships in a concise, handy pocket reference. The book includes clinical cases with board-formatted questions and answers. Numerous tables, illustrations, and "buzzwords" aid in retention of facts. Pathophysiology for the Boards and Wards, Fifth Edition is perfect for medical students. Physician assistants, nurse practitioners, and related health professionals will also find Boards and Wards valuable.

Current List of Medical Literature Lippincott Williams & Wilkins

Includes proceedings of the Association, papers read at the annual sessions, and list of current medical literature.

Pediatric Primary Care - E-Book New York : H.W. Wilson

Get an in-depth look at pediatric primary care through the eyes of a Nurse Practitioner! Pediatric Primary Care, 6th Edition guides readers through the process of assessing, managing, and preventing health problems in infants, children, and adolescents. Key topics include developmental theory, issues of daily living, the health status of children today, and diversity and cultural considerations. This sixth edition also features a wealth of new content and updates — such as a new chapter on pediatric pharmacology, full-color design and illustrations, new QSEN integration,

updated coverage of the impact of the Affordable Care Act, a refocused chapter on practice management, and more — to keep readers up to date on the latest issues affecting practice today. Comprehensive content provides a complete foundation in the primary care of children from the unique perspective of the Nurse Practitioner and covers the full spectrum of health conditions seen in the primary care of children, emphasizing both prevention and management. In-depth guidance on assessing and managing pediatric health problems covers patients from infancy through adolescence. Four-part organization includes 1) an introductory unit on the foundations of global pediatric health, child and family health assessment, and cultural perspectives for pediatric primary care; 2) a unit on managing child development; 3) a unit on health promotion and management; and 4) a unit on disease management. Content devoted to issues of daily living covers issues that are a part of every child's growth — such as nutrition and toilet training — that could lead to health problems unless appropriate education and guidance are given. Algorithms are used throughout the book to provide a concise overview of the evaluation and management of common disorders. Resources for providers and families are also included throughout the text for further information. Expert editor team well is well-versed in the scope of practice and knowledge base of Pediatric Nurse Practitioners (PNPs) and Family Nurse Practitioners (FNPs).

Cumulated Index to the Books R. R. Bowker

This Third Edition of Boards and Wards: A Review for USMLE Steps 2&3 offers the information necessary to conquer the USMLE. This essential review book, written in a succinct, high-yield outline format, features board-formatted questions and answers with detailed explanations, and covers each discipline of medicine appearing on the USMLE Steps 2 and 3, including dermatology, radiology, and ophthalmology. Numerous tables, illustrations, and "buzzwords" aid in retention of facts. Boards and Wards: A Review for USMLE Steps 2&3, Third Edition is perfect for medical students. Physician assistants, nurse practitioners, and related health professionals will also find Boards and Wards valuable.

New York Journal of Homœopathy

Fully updated for a third edition, Training in Ophthalmology remains the indispensable guide to address the Royal College of Ophthalmologists (RCOphth) syllabus for trainee ophthalmologists, and is essential for all those studying ophthalmology, optometry, and orthoptics. As a theoretical and practical aid, it guides the reader through postgraduate Ophthalmic Specialist Training. Emphasis is placed on the practical assessment and management of key ophthalmic conditions. Clearly laid out and highly illustrated in full colour throughout, each condition is discussed in two to three pages, beginning with general explanations of pathophysiology and clinical evaluation, followed by differential diagnoses and treatment options. This new edition has been fully revised to increase emphasis on instilling an understanding of the rationale of current practice from first principles, with summary tables of seminal studies and distilled guidelines from the RCOphth and NICE. This text will appeal to foundation doctors, specialist trainees in ophthalmology, candidates preparing for the Fellowship of the Royal College of Ophthalmology examination, and consultants and allied practitioners looking for a comprehensive yet accessible guide to the subject.
