OCONNOR MADDEN

Smith and Williams' Introduction to the Principles of Drug Design and Action Elsevier Health Sciences

This book questions whether the institutions and practices of the emerging EU diplomatic system conform to established standards of the state-centric diplomatic order; or whether practice is paving the way for innovative, even revolutionary, forms of diplomatic organisation.

Index-catalogue of the Library of the Surgeon-General's Office, United States Army Routledge

Not so long ago, class actions were considered to be a textbook example of American exceptionalism; many of their main features were assumed to be incompatible with the culture of the civil law world. However, the tide is changing; while there are now trends in the USA toward limiting or excluding class actions, notorious cases like Dieselgate are moving more and more European jurisdictions to extend the reach of their judicial collective redress mechanisms. For many new fans of class actions, collective redress has become a Holy Grail of sorts, a miraculous tool that will rejuvenate national systems of civil justice and grant them unprecedented power. Still, while the introduction of various forms of representative action has virtually become a fashion, it is anything but certain that attempting to transplant American-style class action will be successful. European judicial structures and legal culture(s) are fundamentally different, which poses a considerable challenge. This book investigates whether class actions in Europe are indeed a Holy Grail or just another wrong turn in the continuing pursuit of just and effective means of

protecting the rights of citizens and businesses. It presents both positive and critical perspectives, supplemented by case studies on the latest collectivization trends in Europe's national civil justice systems. The book also shares the experiences of some non-European jurisdictions that have developed promising hybrid forms of collective redress, such as Canada, Brazil, China, and South Africa. In closing, a selection of topical international cases that raise interesting issues regarding the effectiveness of class actions in an international context are studied and discussed.

D?at de S?rac (1872-1921) is best known for his piano music but his compositions included orchestral and vocal works, including opera, cantata and incidental music. Claude Debussy described S?rac's music as "exquisite and rich with ideas." The early works were influenced by Impressionist harmonies, church modes, cyclic techniques, folk-like melodies and Andalusian motives. S?rac's style changed dramatically in 1907 when he left Paris and began to include Catalan elements in his compositions - a transition that has hitherto gone unrecognized. Robert Waters provides a much-needed study of the life and works of S?rac, focusing on the composer's regionalist philosophy. S?rac's engagement with folk music was not a patriotic gesture in the vein of nationalistic composers, but a way of expressing regional identity within France to counter the restrictive styles sanctioned by the Paris Conservatory. His musical philosophy mirrored larger social and political debates regarding anti-centralist positions on education, politics, art and culture in fin de si?e France. Such debates involved political and social leaders whom S?rac knew and

personally admired, including the writer Maurice Barrès and the poet Frédéric Mistral. The book will appeal to those specializing in French music, European ethnic musics, piano music and French music history.

Class Actions in Europe Springer

PhD in Economics at the University of Toulouse I, France, and PhD in Business management at the University Jaume I of Castelló de la Plana, Spain. He likes to name himself as touristologist. He is an assistant professor at the Faculty of Tourism of the University of Girona and settled in Business Organization Management and Product Design Department. He is the co-director of Organisational Networks, Innovation and Tourism (ONIT) research group, deputy vice-rector for International Policy at the University of Girona, Executive Board member of the PRIME network of Universities, and member of the Tourism Research Institute INSETUR. He published several books and papers in prestigious tourism journals, and prestigious academic editorial brands having as main research topic Tourism Destination Management. This broad topic helped mainly to work under tourism innovation management, product development, and territorial management, among others. He manages and participates actively in national and international research projects under the same topics, and consequently generated the interest of other universities to have him teaching or doing research with. For instance he did long research periods abroad in Denmark, Netherlands, and UK, and teaching periods in Belgium, Austria, Estonia, Italy, and France, among others.

Dat de Sac BRILL

In our daily experiences, we feel, perceive, designate, invoke or comment on a plurality of beings: people, artifacts, technologies, institutions, projects, animals, divinities, emotions, cultures,

ideologies or opinions that are part of our world. While these beings are all part of our world, they present various forms of existence. Echoing recent developments in existential anthropology, Communication as Constitutive of Organization (CCO) research, and Actor Network Theory, here scholars from a variety of disciplines discuss how they study the types of beings that have been at the core of their respective research. Reflecting on the specific mode of existence, presence and action of the being they follow, they reveal the methodological innovations they deploy in order to analyze excerpts of field notes, filmed interactions, conversations, pictures, newspapers, narratives, etc.
