Hedgehog Rehabilitation Oxbow Books

"For five years Brian Jackman and Jonathan Scott followed the Marsh pride ... recording the daily drama of life and death in Kenya's finest big-game country. In time they came to regard many of the lions as old and familiar companions: the irascible Notch and her half-sister Shadow, the misfit Mkubwa and the majestic Scar. These lions are real individuals whose lives - intimately observed and ... illustrated - offer a unique insight into the ... world of the African plain. ..."--Back cover.

Bird Therapy Unbound Publishing

The New York Times–bestselling author’s classic guide to astrology: “What makes Sun Signs different is that much of the writing is done with humor” (The Boston Globe). Before 1968, astrology as we know it had a very limited following in the United States and around the world. The publication of Linda Goodman’s Sun Signs changed that forever. Newspapers began running astrology columns, and soon, an increasing number of people knew their sign (as well as yours) and began to study astrological tendencies. Linda Goodman’s Sun Signs quickly established itself as the worldwide introductory bible to astrology for beginner and expert alike. The book’s simple organizational technique made it easy for everyone to follow and understand themselves and others, sign-by-sign. This updated edition of the groundbreaking classic is an enjoyable way to discover the world of astrology today.

Bags for Life RosettaBooks

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Future Shock CSIRO PUBLISHING

Positive Psychology: The Scientific and Practical Explorations of Human Strengths comprehensively covers the science and application of positive psychology. Authors Shane J. Lopez, Jennifer Teramoto Pedrotti, and C. R. Snyder bring positive psychology to life by illustrating issues such as how psychological strength can help increase positive outcomes in school and the workplace and promote cooperative relationships among people. Furthermore, the book encourages readers to engage with concepts in order to understand positive emotions and strengths, such as empathy, altruism, gratitude, attachment, and love. Over 50 case studies grounded in practice, research, and the authors’ teaching experience reveal how positive psychological phenomena operate in the lives of real people.

Linda Goodman's Sun Signs Bradt Travel Guides

NEW YORK TIMES BESTSELLER • The classic work that predicted the anxieties of a world upended by rapidly emerging technologies—and now provides a road map to solving many of our most pressing crises. “Explosive . . . brilliantly formulated.” —The Wall Street Journal Future Shock is the classic that changed our view of tomorrow. Its startling insights into accelerating change led a president to ask his advisers for a special report, inspired composers to write symphonies and rock music, gave a powerful new concept to social science, and added a phrase to our language. Published in over fifty countries, Future Shock is the most important study of change and adaptation in our time. In many ways, Future Shock is about the present. It is about what is happening today to people and groups who are overwhelmed by change. Change affects our products, communities,

organizations—even our patterns of friendship and love. But Future Shock also illuminates the world of tomorrow by exploding countless clichés about today. It vividly describes the emerging global civilization: the rise of new businesses, subcultures, lifestyles, and human relationships—all of them temporary. Future Shock will intrigue, provoke, frighten, encourage, and, above all, change everyone who reads it.

Birds Bantam

"There is no scientist today whose books I look forward to reading with greater anticipation of enjoyment and enlightenment than Stephen Jay Gould."—Martin Gardner Among scientists who write, no one illuminates as well as Stephen Jay Gould doesthe wonderful workings of the natural world. Now in a new volume of collected essays—his sixth since Ever Since Darwin—Gould speaks of the importance of unbroken connections within our own lives and to our ancestralgenerations. Along with way, he opens to us the mysteries of fish tails, frog calls, and other matters, and shows once and for all why we must take notice when a seemingly insignificant creature is threatened, like the land snail Partula from Moorea, whose extinction he movingly relates.

Discourse in English Language Education RosettaBooks

- The stunning second book in the Remembering Wildlife charity series- The aim of the creators is to make the most beautiful photographic book ever seen on a species and to use that to raise awareness of the plight facing that animal and also funds to protect it- Features images generously donated by many of the world's top wildlife photographers- All profits from the sale of this book will be donated to projects working to protect rhinos in AfricaConservationists find themselves in an increasingly desperate race against time to save many species of wildlife from extinction. Though the global population explosion is a huge factor, all too often it is money and ignorance that are the main causes of the demise. Sadly, this is certainly the case when it comes to rhinos, whose horns, made of useless keratin, are worth their weight in gold on the black market. They are being poached towards extinction, often with brutal consequences.

Remembering Rhinos is the follow up to Remembering Elephants ISBN 9780993019319 and once again is born of the same vision - to bring the world of wildlife photography together to produce the most beautiful tribute to the species that we can, to raise both awareness of its plights and the funds to protect it. This book turns its attention to yet another species under attack, unwilling to sit back impotently and see it disappear on our watch. By purchasing a copy of this book, you will join us and our photographers in our efforts to play a role in turning the tide. We cannot just remember wildlife and rhinos in pictures.

The Publisher SAGE Publications

The Banksy of The Bird World shares simple wisdom to help the birds we love to thrive. Bestselling author and illustrator, Matt Sewell, is back with his most inspirational book yet. Save Our Birds is a celebration of our endangered birds and call to arms for bird-lovers of all ages to help protect them. Matt has created new, beautiful watercolour artworks of Britain's most loved birds, and their habitats, all of which are sadly on the Red List - the respected, international guide to endangered species. Sewell provides a wealth of practical advice on how we can protect them from extinction. Explore cities, coastlands, woodlands and farms, leaving no habitat unexplored around the British Isles. From bird-friendly window boxes to community projects, discover the steps you can take, actions both big and small, to save our birds.

A Cheetah's Tale Bradt Travel Guides

The New York Times bestseller that helps you explore whether romance is in the stars. Linda Goodman’s Love Signs addresses the question asked by everyone familiar with astrology: How do I relate to someone of another sign? Each sign is “related” to the twelve signs of the zodiac in a different and unique way. Each section addresses the differences for a male and a female with the same sign matches. This is an updated edition of Linda Goodman’s lively bestseller, which has introduced millions to the concept of astrological compatibility. “What seems to set Goodman’s books apart from other stargazing guides is their knowledgeable approach and comprehensive reach.” —Newsweek **Positive Psychology** Bradt Travel Guides

The book introduces the reader to the central areas of English linguistics. The main sections are: the English language and linguistics - sounds - meaning-carrying units - sentences: models of grammar - meaning - utterances - variation. Notably, the book is written from a foreign student's perspective of the English language, i.e. aspects relevant to foreign language teaching receive particular attention. A great deal of emphasis is put on the insights to be gained from the analysis of corpora, especially with respect to the idiomatic character of language (idiom principle, valency approach). In addition, the text offers basic

facts about the history of the language and elaborates on the differences between British and American English. The author demonstrates that a linguistic fact can usually be described in more than one way. To this end, each section contains a chapter written for beginners providing a broad outline and introducing the basic terminology. The remaining chapters in each section highlight linguistic facts in more detail and give an idea of how particular theories account for them. The book can be used both from the first semester onwards and as perfect study aid for final B.A.-examinations.

Surgery and Healing in the Developing World Robson Books Limited

This charming autobiographical tale from Princess Michael of Kent tells of a girl growing up and the incredible bond that can exist between people and animals. Beautifully written by a natural storyteller and packed with fabulous photographs, it is also a wonderful portrait of Africa - the cheetah version of Born Free - and will delight readers worldwide. In the early 1960s, Marie Christine von Reibnitz (who would later become HRH Princess Michael of Kent) lived with her father on his farm in Mozambique. Then just a teenager, Princess Michael was entranced by the African landscape, by the wildlife and by the people she met. It was one of the happiest times of her life and she recounts that it was an orphaned cheetah cub (called Tess) who played a huge part in making it so. The relationship between the young Princess Michael and Tess, whom she hand-reared and later successfully released into the wild having trained her to hunt and survive on her own, will touch every reader's heart. The events of that period have remained with Princess Michael for the rest of her life and in A Cheetah's Tale she recalls not just the tale of Tess, but also the realities of life in Africa: from waking up in the middle of the night to find her father had just shot a lioness that was about to eat her to discovering a deadly Black Mamba curled up inside the loo! Tess was the inspiration for Princess Michael's lifelong interest in cheetah conservation and the epilogue covers some of her work as Patron of the Endangered Species Centre in South Africa and of the Cheetah Conservation Fund in Namibia.

Twelve Years A Slave, Illustrated Edition Rizzoli Publications

How do children construct, negotiate and organize space? The study of social space in any human group is fraught with limitations, and to these we must add the further limits involved in the study of childhood. Here specialists from archaeology, history, literature, architecture, didactics, museology and anthropology build a body of theoretical and methodological approaches about how space is articulated and organized around children and how this disposition affects the creation and maintenance of social identities. Children are considered as the main actors in historic dynamics of social change, from prehistory to the present day. Notions on space, childhood and the construction of both the individual and the group identity of children are considered as a prelude to papers that focus on analyzing and identifying the spaces which contribute to the construction of children's identity during their lives: the places they live, learn, socialize and play. A final section deals with these same aspects, but focuses on funerary contexts, in which children may lose their capacity to influence events, as it is adults who establish burial strategies and practices. In each case authors ask questions such as: how do adults construct spaces for children? How do children manage their own spaces? How do people (adults and children) build (invisible and/or physical) boundaries and spaces?

English Linguistics Random House

Discourse in English Language Education is designed to introduce students to the major concepts and issues in discourse analysis and its applications to language education, drawing on the key research from a range of approaches. This will be essential reading for upper undergraduates and postgraduates with interests in applied linguistics, TESOL and mother tongue language education.

BBC Wildlife HarperCollins UK

How to Conserve Conservationists is an autobiographical journey through Jessie Panazzolo's experience in founding a global community of budding and burnt out conservationists. Sharing her personal stories, research and observations, she shares some care instructions with the reader to help them look after the conservationists in their lives. A thought-provoking read about language, relationships and mental health and how these topics impact the people who conserve our natural world.

National Genealogical Society Quarterly Walter de Gruyter

This volume traces the 300-year history of bird art in Australia, from the crudely illustrated records of the earliest European voyages of discovery to the diversity of artwork available at the start of the 21st century. It is a history inseparable from the

development of Australian ornithology. Against a background of establishment of the country itself, naval draftsmen, convicts, officers, settlers, naturalists, artists and scientists alike contributed both to the art and to science.

Endangered Species and Other Wildlife W. W. Norton & Company
Zoo Animals: Behaviour, Management, and Welfare is the ideal resource for anyone needing a thorough grounding in this subject, whether as a student or as a zoo professional.
 Sunset Oxford University Press

The Big Cat Man - wildlife autobiography of Jonathan Scott, holiday reads and travel literature, including the BBC's Big Cat Diary, Paramount's Wild Things, and Elephant Diaries. Also included are photographs and illustrations by Jonathan and Angela Scott, plus coverage of the Maasai Mara and Serengeti, Antarctica, and travels to India and Bhutan.

Science and Fruit Growing Hassell Street Press
 Kidnapped and sold into slavery in the American South, freeman Solomon Northup spent twelve years in bondage before being

freed. Twelve Years a Slave is Northup's moving memoir, revealing unimaginable details of the horrors he faced as a slave on Southern plantations, and his unshakable belief that he would return home to his family. Written in the year after Northup was freed and published in the wake of Harriet Beecher Stowe's Uncle Tom's Cabin, Northup's story was quickly taken up by abolitionist groups and news organizations as part of the fight against slavery, and continues to resonate more than a century after the end of the American Civil War.
