An Unfolding Case Study Review Elsevier Health Sciences Below-ground interactions are often seen as the 'dark side' of agroecosystems, especially when more than one crop is grown on the same piece of land at the same time. This book aims to review the amount of light the past decade of research has shed on this topic. It also aims to review how far we have come in unravelling the positive and negative aspects of these interactions and how, in dialogue with farmers, we can use the generic principles that are now emerging to look for site-specific solutions.
