**Textbook of Operative Dentistry** Jaypee Brothers, Medical Publishers Pvt. Limited

This groundbreaking textbook intertwines the subjects of dental hygiene and dental therapy to provide a comprehensive resource for students of these courses, as well as those studying new degree programmes in oral health science. Clinical Textbook of Dental Hygiene and Therapy has been designed as a dedicated companion text for these disciplines and should enable students to streamline their primary reading. The opening section of the book is dedicated to relevant oral sciences: anatomy; histology; embryology; oral medicine and pathology. The clinical section contains fourteen chapters which provide coverage of the core syllabus for dental hygiene and therapy. The final section is dedicated to primary dental care services and law, ethics and professionalism. Each chapter features a revision section to reinforce learning. Following course developments and an expansion in the remit of both hygienists and therapists, this book has been written not only for students, but as a revision and updating manual for practicing hygienists and therapists.

This book reviews the available information on bacterial disinfection in endodontics, with emphasis on the chemical treatment of root canals based on current understanding of the process of irrigation. It describes recent advances in knowledge of the chemistry associated with irrigants and delivery systems, which is of vital importance given that chemical intervention is now considered one of the most important measures in eliminating planktonic microbes and biofilms from the infected tooth. Recommendations are made regarding concentrations, exposure times and optimal sequences. Possible complications related to the use of the different solutions are highlighted, with guidance on response. In addition, clinical protocols are suggested on the basis of both clinical experience and the results of past and ongoing research. Throughout, a practical, clinically oriented approach is adopted that will assist the practitioner in ensuring successful endodontic treatment.
