Placement tests are rapidly joining the ranks of high-stakes testing and college freshmen are required to take mathematics placement exams to determine their first mathematics course upon entering college. Unfortunately, these exams tend to place students in a lower-level or remedial course. As a result, additional expenses are incurred; degree programs are extended; and scholarships, awards, and external funding are less likely. Helping Student Prepare for College Mathematics Placement Tests: A Guide for Teachers and Parents includes two sample placement tests, a guide that shows what entry course a student will be assigned with a given score, and explanations on material that students might have forgotten or never quite understood.

This guide is sure to help students excel!

Virginia Math Placement Test Practice Answers Explained Springer Science & Business Media

The purpose of this qualitative study was to examine the perceptions that students and advisors/administrators had regarding the mathematics placement process at a two-year branch campus of a large urban, mid-western university. Participants in the study were 20 advisors/administrators and 15 students. Qualitative data were collected from face-to-face, semi-structured interviews and focus groups, placement test observations, and placement test documents. The student participants were students who had taken the Compass/ESL® computer-adaptive math placement test and successfully completed a college level math course at the institution, as well as students who had just recently taken the test. The advisors/administrators all had some level of involvement in the mathematics placement process at the institution. Therefore, this research offered a unique opportunity to focus on the current mathematics placement process. The results suggested that students want and need an opportunity to practice before they take the test. This may encourage them to take the test more seriously. Furthermore, the use of an entrepreneurial placement testing system should require that the recommendations made by them as to the procedures for administering the test be

followed. Finally, the institution is interested in implementing mandatory placement in mathematics. This would include a well-defined mathematics placement appeal process for students who believe they are not correctly placed by the test, as well as the use of multiple measures to determine the placement of students in a mathematics course.
