This book brings together a collection of invited interdisciplinary perspectives on the recent topic of Object-based Image Analysis (OBIA). Its content is based on select papers from the 1 OBIA International Conference held in Salzburg in July 2006, and is enriched by several invited chapters. All submissions have passed through a blind peer-review process resulting in what we believe is a timely volume of the highest scientific, theoretical and technical standards. The concept of OBIA first gained widespread interest within the GIScience (Geographic Information Science) community circa 2000, with the advent of the first commercial software for what was then termed 'object-oriented image analysis'. However, it is widely agreed that OBIA builds on older segmentation, edge-detection and classification concepts that have been used in remote sensing image analysis for several decades. Nevertheless, its emergence has provided a new critical bridge to spatial concepts applied in multiscale landscape analysis, Geographic Information Systems (GIS) and the synergy between image-objects and their radiometric characteristics and analyses in Earth Observation data (EO).

History of Vocational Education and Training in Europe John Wiley & Sons

How and why did the early church grow in the first four hundred years despite disincentives, harassment, and occasional persecution? In this unique historical study, veteran scholar Alan Kreider delivers the fruit of a lifetime of study as he tells the amazing story of the spread of Christianity in the Roman Empire. Challenging traditional understandings, Kreider contends the church grew because the virtue of patience was of central importance in the life and witness of the early Christians. They

wrote about patience, not evangelism, and reflected on prayer, catechesis, and worship, yet the church grew--not by specific strategies but by patient ferment.

The Heart of the Leopard Children OECD Publishing Brunner sees St Paul's Epistle to the Romans as 'the chapter of destiny of the Christian Church'. Here, in Luther's words, is the 'purest gospel' upon which the very existence of the Christian faith depends and from which it draws its life. Concentrated, decisive and instructive, nothing within the New Testament is more closely argued both theological and personal. Out of his years of scholarly wisdom Brunner meditates on the great Question: What is wrong with the Churches? Brunner finds an answer in the contrast between the virile Spirit-filled fellowship of the New Testament and the institutions which are now called 'churches'. He writes in his preface: 'The title of the book, *The Misunderstanding of the Church*, is equivocal. Is it a question of a misunderstanding of which the Church is guilty, or of a misunderstanding of which it is the victim? Or is it that the Church itself, as such, is perhaps the product of a misunderstanding? The author is not responsible for this ambiguity; it is intrinsic in the theme itself.'

An illustrated exploration of colors and patterns in the animal kingdom, what they communicate, and how they function in the social life of animals. Are animals able to appreciate what humans refer to as "beauty"? The term scarcely ever appears nowadays in a scientific description of living things, but we humans may nonetheless find the colors, patterns, and songs of animals to be beautiful in apparently the same way that we see beauty in works of art. In *Animal Beauty*, Nobel Prize-winning biologist Christiane Nüsslein-Volhard describes how the colors and patterns displayed by animals arise, what they communicate, and how they function in the social life of animals. Watercolor drawings illustrate these amazing instances of animal beauty. Darwin addressed the topic of ornament in his 1871 book *The Descent of Man and Selection in Relation to Sex*, and did not hesitate to engage with criteria of beauty, convinced that animals experienced color and ornament as attractive and agreeable in the same way that we do, and that the role this played in mate

choice pointed to a “sexual selection” distinct from natural selection. Nüsslein-Volhard examines key examples of ornament and sexual selection in the animal kingdom and lays the groundwork for biological aesthetics. Noting that color patterns have not been a research priority—perhaps because they appeared to be nonessential luxuries rather than functional necessities—Nüsslein-Volhard looks at recent scientific developments on the topic. In part because of Nüsslein-Volhard's own research on the zebrafish, it is now possible to decipher the molecular genetic mechanisms that lead to production of colors in animal skin and its appendages and control its pattern and distribution.

The animals of the forest have assembled to discuss what is the most important thing: to have a trunk like an elephant, quills like a porcupine, or a long neck like a giraffe? Naturally, every animal is convinced that its particular trait is the most important one and that everyone should have it. But when the double pages open to show all the animals with the quills of a porcupine, the long neck of a giraffe, or the trunk or the elephant, everyone must agree that the true importance lies precisely in their collective 'diversity'. It is that which makes them all unique and essential to life of the forest. The Most Important Thing received a UNESCO honorable mention for peace and collaboration. An important message of diversity and inclusion delivered in the form of a charming modern fable.

By 2050, three-quarters of the world's 9.6-billion-strong population will be living in cities - inhabiting vibrant historic cores, commuting from new hinterlands via high-speed transit, or occupying informal urban settlements. Some cities will flourish while others will struggle to meet the demands of a growing population and a changing environment. It will take the collaborative expertise of various disciplines, gathered under the umbrella of good governance, to ensure our cities thrive in the future. Spencer de Grey, Head of Design at Foster + Partners, explores the role that architecture and urban design can play in this global endeavour. This is the tenth essay in the Big Ideas series created by the European Investment Bank. The EIB has invited international thought leaders to write about the most important issues of the day. These essays are a reminder that we need new thinking to protect the environment, promote equality and improve people's lives around the globe.

« Understanding today's Vocational Education and Training (VET) systems requires a comprehension of the rise and development, i.e. of the foundations of topical VET. This book is one of the first publications providing a comparative view of this development in Europe. Apart from older roots, the evolution of VET systems are one trigger of the modernization of economy, society and education itself. The 28 contributions, including countries like Austria, Britain, Denmark, Finland, France, Germany, Switzerland, Italy, Lithuania, Norway, Spain, Sweden and Switzerland of renowned authors and experts in this field are organized in three sections: Concepts which are discussing theoretical approaches towards this phenomenon. Cases which stress specific developments of VET in a certain country or region and Challenges which are contextualizing the historical perspective in a topical policy context. »--

Using his skills as a journalist, historian, and memoirist, Sebastian

Haffner (author of *The Meaning of Hitler*) traces the development of the German Empire (1871-1945) and the central role of warfare that characterized the Reich. Haffner contends that Germany's unfavorable geographic position had much to do with the state's belligerence and that, from its inception, created the conflicts that culminated in two world wars. “The fruit of decades of study, the moving and sometimes very personal testament of an author whose works more than any others have influenced public opinion and challenged academic historians.” — *Die Zeit* “A brilliant work from the top hat of a powerful historical magician.” — *Rudolf Augstein, Der Spiegel* “A thoroughly successful work.” — *Wiener Tagblatt* “A book with more historical insights than a whole pile of learned volumes.” — *Münchner Abendzeitung* “The history of the Third Reich in just 43 pages? Impossible to do more than discuss a few features superficially. But not with Sebastian Haffner. This brilliant thinker — a journalist turned historian — reveals the fundamental lines of development in a way that anyone can follow. The pages bristle with questions and unexpected answers. The 300 pages of ‘The Ailing Empire’ contain more clever and original insights into German history between 1871 and 1945 than many a weighty tome.” — *Dieter Wunderlich* “This illuminating survey by a German journalist focuses on the continuities and discontinuities of the modern German Reich ... Haffner argues that the founding of the state was never regarded as a climactic achievement but rather as a springboard for expansion, and that Germany's unfavorable geographic position had much to do with the state's armed belligerence. The author also contends that the Reich was self-destructive almost from the beginning, creating a host of enemies who brought it to its knees in two world wars and eventually divided it. He describes how Hitler accelerated the catastrophic finish of the Reich by inopportunely taking on both the Russians and Americans, then tried to turn military defeat into the annihilation of the German people with his Nero Directive of March 18-19, 1945.” — *Publishers Weekly* “[*The Ailing Empire*] tells the story of yesterday's Germans who made today. It is a story Americans must understand.” — *San-Diego Union* “Sebastian Haffner has written a book that traces the path of Germany's political self-destruction, and offers a realistic account of the war's real causes ... It is a highly readable analysis of the road from Bismarck to Hitler ... This book, based on many previously unpublished accounts, is a devastating portrait of human society.” — *Chattanooga Times* “This is a highly readable analysis of German history over the last century. A long-time journalist, Haffner asserts that the foundations of the German Reich were an inadequate basis for a modern nation state and contained the seeds of its own destruction. Though lacking documentation, Haffner's first-hand recollections of the Nazi era are most interesting. Particularly noteworthy are his observations on daily life during the regime and his judgment regarding those literary and artistic ‘antis’ who chose ‘internal emigration’ within the Hitler state.” — *Library Journal*

James Clarke & Co.

A nameless young man lives in the housing projects outside of Paris. When he was a child, his parents moved with him from the Congo to France, hoping in vain to escape poverty and violence. His best friend, Drissa, is in a psychiatric hospital and now Mireille, his girlfriend, the woman with whom he has shared his childhood and hopes, has left him to reconnect with her Jewish roots in Israel. During a night out to drown the pain of his heartache, there is a fight with a policeman, the policeman dies, and the young man is arrested and taken to jail. Between police beatings and abrupt interrogations, his memory becomes his sole ally to escape from the exiguous space in which he is confined.

Half-conscious and delirious, he reflects on his journey from the land of his ancestors to his life in the projects with Drissa and Mireille. In *The Heart of the Leopard Children*, N'Sondé explores the themes of love and pain, belonging and uprooting, desire and fear—all with an implacable and irresistible accuracy. Wilfried N'Sondé's first novel awakens the reader with an urban symphony of desire and lost love, attuned to the violence that accompanies the struggle for social ascension and a sense of belonging, and the paralyzing sentiment of betrayal that inhabits a young man caught between traditions and cultures. Awarded the Prix des Cinq Continents de la Francophonie and the Prix Senghor for the originality of his work, the author captures the sounds, rhythms and pleas of a young man who pulls on the alarm from his prison cell to warn against the multiple barriers of confinement that risk the future of certain sectors of French youth today.

This book comprises chapters featuring a state of the art of research on digital technology in mathematics education. The chapters are extended versions of a selection of papers from the Proceedings of the 13th International Conference on Technology in Mathematics Teaching (ICTMT-13), which was held in Lyon, France, from July 3rd to 6th. ICTMT-13 gathered together over one hundred participants from twenty countries sharing research and empirical results on the topical issues of technology and its potential to improve mathematics teaching and learning. The chapters are organised into 4 themed parts, namely assessment in mathematics education and technology, which was the main focus of the conference, innovative technology and approaches to mathematics education, teacher education and professional development toward the technology use, and mathematics teaching and learning experiences with technology. In 13 chapters contained in the book, prominent mathematics educators from all over the world present the most recent theoretical and practical advances on these themes. This book is of particular interest to researchers, teachers, teacher educators and other actors interested in digital technology in mathematics education.

Love as Passion European Investment Bank

In this important book Niklas Luhmann - one of the leading social thinkers of the late 20th century - analyses the emergence of 'love' as the basis of personal relationships in modern societies. He argues that, while family systems remained intact in the transition from traditional to modern societies, a semantics for love developed to accommodate extra-marital relationships; this semantics was then transferred back into marriage and eventually transformed marriage itself. Drawing on a diverse range of historical and literary sources, Luhmann retraces the emergence and evolution of the special semantics of passionate love that has come to form the basis of modern forms of intimacy and personal relationships. This classic book by Luhmann has been widely recognized as a work of major importance. It is an outstanding contribution to social theory and it provides an

original and illuminating perspective on the nature of modern marriage and sexuality.

Jeff Koons engages with distinguished art curator Sir Norman Rosenthal resulting in a revealing portrait of the life and art of the most foremost international working artist today. Here is what happens when Jeff Koons, one of the most important and controversial artists of the twenty-first century, sits down with distinguished art curator Sir Norman Rosenthal. Published to coincide with his 2014–2015 retrospective, this new book provides the most revealing portrait that exists of Jeff Koons' singular personality and artistic vision as he discusses works across his thirty-five-year career with his long-time friend and collaborator Rosenthal. Rosenthal's masterful interviews, conducted over three years, give unparalleled access to the thoughts of one of the most influential minds in contemporary culture, disclosing the artist undistorted and in his own words. As well as examining all his major series in depth, from his first inflatables to his latest series on antiquities, the interviews shed new light on the artist's interest in other artists' works, reveal the significance of his youth and family life on his art, and explain the key concepts of his practice, such as his ideas on self-acceptance, ecstasy and sex. A book of historic importance, extensively and comprehensively illustrated throughout, it will become the reference point for all who want to understand Koons and creativity in the twenty-first century.

Who Says Large Teams Can't Handle Agile Software Development? Agile or "lightweight" processes have revolutionized the software development industry. They're faster and more efficient than traditional software development processes. They enable developers to embrace requirement changes during the project deliver working software in frequent iterations focus on the human factor in software development. Unfortunately, most agile processes are designed for small or mid-sized software development projects—bad news for large teams that have to deal with rapid changes to requirements. That means all large teams! With *Agile Software Development in the Large*, Jutta Eckstein—a leading speaker and consultant in the agile community—shows how to scale agile processes to teams of up to 200. The same techniques are also relevant to teams of as few as 10 developers, especially within large organizations. Topics include the agile value system as used in large teams the impact of a switch to agile processes the agile coordination of several sub-teams the way project size and team size influence the underlying architecture Stop getting frustrated with inflexible processes that cripple your large projects!
