The Commentaries on the Minor Epistles of Paul Society of Biblical Lit

Seneca, Lucius Annaeus, born at Corduba (Cordova) C.5 or 4 B.C. of a noble and wealthy family, spent an ailing childhood and youth at Rome in an aunt's care. He was victim of life-long neurosis but became famous in rhetoric, philosophy, money-making, and imperial service. After some disgrace during Claudius' reign he became tutor and then, in A.D. 54, advising minister to Nero, some of whose worst misdeed he did not prevent. Involved (innocently?) in a conspiracy, he killed himself by order in A.D. 65. Wealthy, he preached indifference to wealth; evader of pain and death, he preached scorn of both; and there were other contrasts between practice and principle.

In 1143 Robert of Ketton produced the first Latin translation of the Qur'an. This translation, extant in 24 manuscripts, was one of the main ways in which Latin European readers had access to the Muslim holy book. Yet it was not the only means of transmission of Quranic stories and concepts to the Latin world: there were other medieval translations into Latin of the Qur'an and of Christian polemical texts composed in Arabic which transmitted elements of the Qur'an (often in a polemical mode). The essays in this volume examine the range of medieval Latin transmission of the Qur'an and reaction to the Qur'an by concentrating on the manuscript traditions of medieval Qur'an translations and anti-Islamic polemics in Latin. We see how the Arabic text was transmitted and studied in Medieval Europe. We examine the strategies of translators who struggled to find a proper vocabulary and syntax to render Quranic terms into Latin, at times showing miscomprehensions of the text or willful distortions for polemical purposes. These translations and interpretations by Latin authors working primarily in twelfth- and thirteenth-century Spain were the main sources of information about Islam for European scholars until well into the sixteenth century, when they were printed, reused and commented. This volume presents a key assessment of a crucial chapter in European understandings of Islam.

Anglo-Saxon Manuscripts is the first publication to list every surviving manuscript or manuscript fragment written in Anglo-Saxon England between the seventh and the eleventh centuries or imported into the country during that time. Each of the 1,291 entries in Helmut Gneuss and Michael Lapidge's Bibliographical Handlist not only details the origins, contents, current location, script, and decoration of the manuscript, but also provides bibliographic entries that list facsimiles, editions, linguistic analyses, and general studies relevant to that manuscript. A general bibliography, designed to provide full details of author-date references cited in the individual entries, includes more than 4,000 items. Compiled by two of the field's greatest living scholars, the Gneuss-Lapidge Bibliographical Handlist stands to become the most important single-volume research tool to appear in the field since Greenfield and Robinson's Bibliography of Publications on Old English Literature. Their achievement in the present book will endure for many decades and serve as a catalyst for new research across several disciplines.

The most famous representative of the school of Antioch, Theodore of Mopsuestia penned a number of commentaries on biblical books in both Testaments. This volume offers not only an introduction to Theodore's life and work but also the first modern-language translation of his commentaries on Paul's minor epistles (Galatians-Philemon). The English translation is accompanied by a facing Latin/Greek text based on H. B. Swete's 1880-1882 critical edition of these early fifth-century commentaries. As a prime example of "Antiochene" exegesis and theology, they are of considerable interest, providing valuable evidence for Theodore's exegetical principles and practice, his Christology and doctrines of grace and free will, and his understanding of crucial developments in Christian ministry and church polity from the time of Paul to his own day.

"The Introduction provides an overview of the history of the Latin Bible, with a summary of the contents of each chapter in this Handbook and the rationale for their arrangement. It then discusses the terminology for referring to the Latin Bible, along with a mini-glossary of specialist terms in manuscript and textual studies which appear in the chapters. The principal editions of the Latin Bible are introduced, along with other resources for its study such as book series and databases. Finally, the conventions for the Handbook are explained, such as spelling practices for Latin and proper nouns"--

Ossa Ostensa is the world's first comprehensive example of how to teach and learn the Latin language using the unique teaching system of the internationally recognized authority Reginald Foster. Laura Pooley ? prize-winning graduate of the University of Oxford and currently a supervisor at the University of Cambridge, brings to life the year she spent in Rome studying Latin with Reginaldus. His inspiring and transformative method of teaching combines with Laura's twenty years of teaching experience to produce concise and crystal-clear explanations of the language. The three 'experiences' of Latin: beginners, intermediates and advanced, are divided between three user-friendly workbooks. Each workbook comprises around thirty lessons, where the language is presented in hand-out form requiring very little modification by prospective teachers. Each language area is then illustrated by translated reading examples. After each lesson, Laura provides translation practice targeted to the taught content. These Latin passages are divided into Classical and Post-Classical literature, to appeal to the interests of all Latin students. Not only that, but each passage is accompanied by teaching questions and translation hints, the mainstay of Reginaldus' classroom persona and pedagogy so famously encapsulated in his *Ludi*. Students therefore can exercise recent language content and develop deep and spontaneous fluency in the Latin language. Enjoy continuing your experience of learning with Reginaldus with book 2 of the Ossa Ostensa series, where the significant language areas of participles and subjunctives are met for the first time.

A prominent lawyer and administrator, Pliny (c. AD 61-113) was also a prolific letter-writer, who numbered among his correspondents such eminent figures as Tacitus, Suetonius and the Emperor Trajan, as well as a wide circle of friends and family. His lively and very personal letters address an astonishing range of topics, from a deeply moving account of his uncle's death in the eruption that engulfed Pompeii, to observations on the early Christians - 'a desperate sort of cult carried to extravagant lengths' - from descriptions of everyday life in Rome, with its scandals and court cases, to Pliny's life in the country.

The 78 letters in this Anthology (41 Greek, 36 Latin and 1 bilingual, with facing English translation) are selected both for

their intrinsic interest, and to illustrate the range of functions letters performed in the ancient world. Dating from between c. 500 BC and c. 400 AD, they include naive and high-style, 'real' and 'fictitious', and classical and patristic items: Cicero, Horace, Ovid, Seneca, Pliny, Julian, Basil and Augustine are juxtaposed with Phalaris, Diogenes, Chion, and the authors of letters on lead, wood, papyrus and stone. Four final items exemplify ancient epistolary theory. The Commentary, besides providing contextual and linguistic assistance, draws attention to specifically epistolary features and to different stylistic levels of Greek and Latin represented. Epistolary topics and formulae are discussed in the Introduction, which also provides biographical and bibliographical information on all texts and authors included, and a history of letter-writing and letter-reading in antiquity.

Andreas Norrelius' Latin Translation of Johan Kemper's Hebrew Commentary on Matthew University of Toronto Press

Epiphanius, Bishop of Constantia on Cyprus from 367 to 403 CE, was incredibly influential in the last decades of the fourth century. Whereas his major surviving text—the Panarion, an encyclopedia of heresies—is studied for lost sources, Epiphanius himself is often dismissed as an anti-intellectual eccentric, a marginal figure of late antiquity. In this book, Andrew S. Jacobs moves Epiphanius from the margin back toward the center and proposes we view major cultural themes of late antiquity in a new light altogether. Through an examination of the key cultural concepts of celebrity, conversion, discipline, scripture, and salvation, Jacobs shifts our understanding of late antiquity from a transformational period open to new ideas and peoples toward a Christian Empire that posited a troubling, but ever-present, otherness at the center of its cultural production.
