Competition and Antitrust Law: a Very Short Introduction

Oxford University Press

During the past decade, private enforcement of competition law has slowly taken off in Europe. However, major differences still exist among Member States. By harmonizing a number of procedural rules, the Damages Directive aimed to establish a level playing field among EU Member States. This timely book represents the first assessment of the implementation of the Damages Directive. Offering a comparative perspective, key chapters provide an up-to-date account of the emerging trends in private enforcement of competition law in Europe.

UK Competition Law Oxford University Press, USA

The EU competition policy dilemma -- The institutional basis of strict and non-discriminatory regulation -- Tension between stringent supranational regulations and national neo-mercantilism -- The issue of discrimination against non-EU firms -- Systemic constraints on the EU's role as a global rule-maker -- The EU : stuck between competition and competitiveness.

EU Law in the UK Oxford University Press, USA

The digitization of industrial processes has suddenly taken a great leap forward, with burgeoning applications in manufacturing, transportation and numerous other areas. Many stakeholders, however, are uncertain about the opportunities and risks associated with it and what it really means for businesses and national economies. Clarity of legal rules is now a pressing necessity. This book, the first to deal with legal questions related to Industrial Internet, follows a multidisciplinary approach that is instructed by law concerning intellectual property, data

protection, competition, contracts and licensing, focusing on business, technology and policy-driven issues. Experts in various relevant fields of science and industry measure the legal tensions created by Industrial Internet in our global economy and propose solutions that are both theoretically valuable and concretely practical, identifying workable business models and practices based on both technical and legal knowledge. Perspectives include the following: regulating Industrial Internet via intellectual property rights (IPR); data ownership versus control over data; artificial intelligence and IPR infringement; patent owning in Industrial Internet; abuse of dominance in Industrial Internet platforms; data collaboration, pooling and hoarding; legal implications of granular versioning technologies; and misuse of information for anticompetitive purposes. The book represents a record of a major collaborative project, held between 2016 and 2019 in Finland, involving a number of universities, technology firms and law firms. As Industrial Internet technologies are already being used in several businesses, it is of paramount importance for the global economy that legal, business and policy-related challenges are promptly analyzed and discussed. This crucially important book not only reveals the legal and policy-related issues that we soon will have to deal with but also facilitates the creation of legislation and policies that promote Industrial-Internet-related technologies and new business opportunities. It will be warmly welcomed by practitioners, patent and other IPR attorneys, innovation economists and companies operating in the Industrial Internet ecosystem, as well as by competition authorities and other policymakers.

Multi-dimensional Approaches Towards New Technology Oxford University Press, USA

Since its formation the European Union has expanded beyond all

expectations, and this expansion seems set to continue as more countries seek accession and the scope of EU law expands, touching more and more aspects of its citizens' lives. The EU has never been stronger and yet it now appears to be reaching a crisis point, beset on all sides by conflict and challenges to its legitimacy. Nationalist sentiment is on the rise and the Eurozone crisis has had a deep and lasting impact. EU law, always controversial, continues to perplex, not least because it remains difficult to analyse. What is the EU? An international organization, or a federation? Should its legal concepts be measured against national standards, or another norm? The Oxford Handbook of European Union Law illuminates the richness and complexity of the debates surrounding the law and policies of the EU. Comprising eight sections, it examines how we are to conceptualize EU law; the architecture of EU law; making and administering EU law; the economic constitution and the citizen; regulation of the market place; economic, monetary, and fiscal union; the Area of Freedom, Security, and Justice; and what lies beyond the regulatory state. Each chapter summarizes, analyses, and reflects on the state of play in a given area, and suggests how it is likely to develop in the foreseeable future. Written by an international team of leading commentators, this Oxford Handbook creates a vivid and provocative tapestry of the key issues shaping the laws of the European Union.

The Interaction Between Competition Law and Corporate Governance Springer Nature

New to this edition: --

The Oxford Handbook of European Union Law Cambridge University Press

The Future of International Competition Law Enforcement undertakes an original assessment of the EU's international

cooperation agreements in the field of competition law and is uniquely focused on the bilateral sphere, often labelled as a mere 'interim-solution' awaiting a global agreement.

European Union Competition Policy Versus Industrial Competitiveness OECD Publishing

The competition policy of the European Community is a vital part of Community law. Covering competition law in the UK and the EU, this book introduces the fundamental concepts employed in the application of competition law.

Jones and Sufrin's EU Competition Law Oxford Studies in European Law

This innovative textbook, now in its second edition, presents EU competition law in political, economic and comparative context. It brings competition law to life from an EU and global perspective, with cross currents of trade and industrial policy and attention to the intervention of the state in the market. Quintessentially readable, the book deftly and concisely excerpts the key cases and embeds them in explanatory materials, including policy statements and regulations. It is entirely up to date and integrates, for example, new issues of power in the digital economy. Notes accompanying the cases raise hard questions and explain the fascinating issues underlying contemporary competition policy in the European Union and around the world. Hard Core Cartels Recent progress and challenges ahead Kluwer Law International B.V.

Information Exchange Between Competitors in EU Competition Law Martin Gassler Competing firms often exchange information in order to make more informed market decisions which can help to overcome market inefficiencies. However, an abundance of legal and economic research as well as case law has shown that information exchange may also enable firms to engage in collusion more readily and sustain it longer. This book is the first to concentrate on this challenging topic of EU competition law in such depth. It focuses on 'pure' information exchanges - exchanges that are not ancillary to a wider pro-competitive or anticompetitive conduct - and thoroughly explains the characteristics of such information exchanges, their pro-competitive and anticompetitive effects and discusses all the relevant legal aspects for their assessment. The author provides a robust analytical framework for assessing information exchanges under Article 101 TFEU, focusing on the risk of collusive outcomes

and what types of information exchange are particularly harmful. With detailed attention to the leading cases on information exchange, the analysis examines the most important aspects for assessing information exchange between competitors, in particular: the concept of a concerted practice; the concepts of a restriction by object and effect, including their similarities and differences; the importance of evidentiary issues; the issue of signalling via advance public announcements; factors that facilitate collusion; efficiencies of information exchange, including market transparency; the legal challenges of tackling mere parallel conduct; facilitative practices in the Commission Guidelines, including the Horizontal Cooperation Guidelines; and safe harbours for certain types of information exchange. The book offers clear guidance on how to identify and thus distinguish information exchange that restricts competition by its object and information exchange that restricts competition (only) by its effects. It offers practical solutions to some of the perceived issues when assessing information exchanges. With its wealth of analysis not available from other sources, this concise yet comprehensive review of a much-debated topic in competition law offers clear guidance for practitioners in assessing the issues surrounding information exchange. The book will also be welcomed by competition law academics, competition lawyers and competition authority officials throughout Europe.

Competition Case Law Digest - A Synthesis of Eu and National Leading Cases Springer

Competition, or Antitrust, law is now a global phenomenon. It operates in more than 100 countries and the relationships among competition law systems are often complex and opaque. Competition law is also new to many countries, which creates uncertainty about how decisions will be made in these jurisdictions. This makes it critically important to understand both the similarities and differences among the systems and the relationships between them. A succinct introduction, this title breaks down the complicated and foreboding topic of competition law. Divided into four parts, this book covers the elements of competition laws, its decisions, targets, and globalization and the future of competition law. It also provides global context by looking at competition law in the US, Europe, and growing markets like Asia and Latin America. This title covers the most pressing issues of competition law in an informative and concise

way. Drawing on his lifetime of global experience and research, David J. Gerber's Competition Law and Antitrust is an essential tool for anyone interested in competition or antitrust law.

Competition Law Oxford University Press

This casebook, designed for a readership of graduate students, policy makers, and practitioners in competition law, aims to provide a comprehensive reference on EU and UK competition law. While the majority of the text comprises analysis supplemented with detailed commentary and analysis of judgments, NCA and Commission decisions, and legislation, the casebook also gives a high-level introduction to the design and history of EU and UK competition law, including an overview of the main actors and their objectives, furnishing students with the understanding of the law required to practise competition law. In particular, the casebook takes an interdisciplinary approach to the subject, featuring a substantial section on the economic context of competition law accessible even to those with no economics background. The book is accompanied by specialist volumes on intellectual property and enforcement and procedure.

The UK Competition Regime Oxford University Press

This book reviews progress in the fight against hard core cartels. It quantifies the harm caused by cartels and identifies improved methods of investigation. It also examines progress in strengthening sanctions against businesses and individuals.

EU Competition Law Oxford University Press

This book is the fourth edition of a highly practical guide to the leading cases in European Competition Law. It explores the application of Article 101 TFEU, Article 102 TFEU and the European Merger Regulation, as well as the public and private enforcement of Competition Law. In addition, it reviews the intersection between Competition Law and Intellectual Property Rights and the application of Competition Law to State action. Each chapter outlines the relevant laws, regulations and guidelines for each topic. Within this framework, cases are reviewed in summary form, accompanied by analysis and commentary. "This book should be in the library of every competition law practitioner and academic. The summary of cases is first class. But what makes it really stand out is the quality of the commentary and the selection of the material which includes not only the most important European judgements and decision but also some of the leading cases from the US and

European Member States." Ali Nikpay, Gibson, Dunn & Crutcher "The study of EU Competition law requires the analysis and understanding of a number of increasingly complex and lengthy European Commission and European Court decisions. Through the provision of case summaries, excerpts from the important passages and concise commentary linking these decisions to other key case law and Commission documents, this unique and impressive book provides the student and practitioner of EU competition law with an extremely clear and useful introduction to these leading decisions." Dr Kathryn McMahon, Associate Professor, School of Law, University of Warwick "The Guide is an invaluable tool for both students and practitioners. It provides a compact overview on the fundamental cases and highlights the essential problems in a clear and sharp analysis." Dr Christoph Voelk, Antitrust Practice Group, McDermott, Will & Emery LLP, Brussels "This edition will be especially valuable to competition law specialists abroad who are interested in the jurisprudence and policy of the European Union and its member states. Familiarity with the European regime is essential for proficiency in competition law today, and this volume provides an excellent foundation." William E Kovacic, Global Competition Professor of Law and Policy, George Washington University Law School, Former Chairman, US Federal Trade Commission "A perfect reference for students of competition law, giving them a kick start when searching for EU case law on a specific subject." Magnus Strand, University of Uppsala, Sweden

EU Competition Law Oxford University Press, USA

The most comprehensive resource for students on EU competition law; extracts from key cases, academic works, and legislation are paired with incisive critique and commentary from two experts in the field.

EC Competition Law Oxford University Press, USA

Building on its unrivalled reputation as the definitive EU law textbook, this seventh edition continues to provide clear and insightful analysis of all aspects of European Union law. Drawing on their wealth of experience, Paul Craig and Gráinne de Búrca succeed in bringing together a unique mix of illuminating commentary and well-chosen extracts from a wide range of cases, legislation, and academic publications. Chapters have been carefully structured and designed to enhance student learning at all levels, laying the foundations of the subject while building

analysis of more complex areas and cutting-edge debates. The seventh edition has been comprehensively updated to reflect the extensive legal developments that have taken place since publication of the sixth edition, and a new chapter on current challenges facing the EU has been added.

Global Competition Oxford University Press, USA

"A reference book in this area of EU competition law and a must-have companion for academics, enforcers and practitioners alike, as well as EU and national judges." Judge Nils Wahl, Court of Justice of the European Union This seminal text offers an authoritative and integrated treatment of the legal and economic principles that underpin the application of Article 102 TFEU to the behaviour of dominant firms. Traditional concerns of monopoly behaviour, such as predatory pricing, refusals to deal, excessive pricing, tying and bundling, discount practices and unlawful discrimination are treated in detail through a review of the applicable economic principles, the case law and decisional practice and more recent economic and legal writings. In addition, the major constituent elements of Article 102 TFEU, such as market definition, dominance, effect on trade and applicable remedies are considered at length. The third edition involves a net addition of over 250 pages, with a substantial new chapter on Abuses In Digital Platforms, an extensively revised chapter on standards, and virtually all chapters incorporating substantial revisions reflecting key cases such as Intel, MEO, Google Android, Google Shopping, AdSense, and Qualcomm.

EU Competition Law Cambridge University Press

The essential guide to EU competition law for students in one volume; extracts from key cases, academic works, and legislation are paired with incisive critique and commentary from an expert author team. In this fast-paced subject area, the authors carefully highlight the most important cases, legislation, and developments to allow students to navigate the breadth of legislation and case law. With their clear explanations and commentary, the authors provide invaluable support to students as they approach this complex and highly technical area of law. Extracts provide opportunities for students to understand the law in practice, and to see its relevance to business. Indispensable for undergraduate and postgraduate students alike, this is the standalone guide to the competition law of the EU. Online resources: The text is

accompanied by online resources containing: -An additional chapter on State Aid -Web links -Updates in the law
EU Competition Law Cambridge University Press
Written by experts, this innovative textbook offers students a relevant, case-focused account of EU law. Under the experienced editorship of Catherine Barnard and Steve Peers, the text draws together a range of perspectives on EU law designed to introduce students to the key debates and case law which shape this vast subject.

EU Competition Law Harvard University Press

This volume explores the promise and limitations of competitive market dynamics, looking at the threats to competition - cartels, agreements, monopolies, and mergers - and the laws in place across the US and European Union to safeguard the process of competition.

The Boundaries of EC Competition Law OUP Oxford

This book explores how the EU's enforcement of competition law has moved from centralisation to decentralisation over the years, with the National Competition Authorities embracing more enforcement powers. At the same time, harmonisation has been employed as a solution to ensure that the enforcement of EU competition rules is not weakened and the internal market remains a level playing field. While employing a comparative law argument, the book, accordingly, analyses the need for harmonisation throughout the different stages of development of the EU's competition law enforcement (save Merger control and State Aid), the underlying rationale, and the extent to which comparative studies have been undertaken to facilitate the harmonisation process from an historical perspective. It also covers the Directives, such as the Antitrust Damages Directive and the ECN+ Directive. Investigating both public and private enforcement, it also examines the travaux préparatoires for the enforcement legislation in order to discover the drafters' intent. The book addresses the European and the Member States' perspectives, namely, the Central and Eastern European (CEE) countries, as harmonisation proceeds through dialogue and cooperation between the two levels. Lastly, it explores the extent to which harmonisation of the competition law enforcement framework has been accepted and implemented in the Member States' legal systems, or has led to the fragmentation of the national systems of the CEE countries.
