Hidden Out in the Open is the first English-language volume on Spanish migration to the United States in the late nineteenth and early twentieth centuries. This panoramic study covers a period defined by the crucial transformations of the Progressive Era in the United States, and by similarly momentous changes in Spain following the Restoration of the Bourbon monarchy under Alfonso XII. The chapters in this volume are geographically wide-ranging, reflecting the transnational nature of the Spanish diaspora in the Americas, encompassing networks that connected Spain, Cuba, Latin American countries, the United States, and American-controlled territories in Hawai'i and Panama. The geographic diversity

reveals the different jobs immigrants engaged in, from construction gangs in the Panama Canal to mining crews in Arizona and West Virginia. Contributors analyze the Spanish experience in the United States from a variety of perspectives, discussing rural and urban enclaves, the role of the state, and the political mobilization of migrants, using a range of methodological approaches that examine ethnicity, race, gender, and cultural practices through the lenses of sociology, history, and cultural studies. The mention of the Spanish influence in the United States often conjures up images of conquistadores and padres of old. Forgotten in this account are the Spanish immigrants who reached American shores in the late nineteenth and early twentieth centuries. Hidden Out in the Open reveals the role of the modern migration of Spaniards in this "land of immigrants" and rectifies the erasure of Spain in the American narrative. The book will be of interest to scholars and students of US history and the history of modern Spain and Europe, as well as those interested ethnic and migration/diaspora studies, Hispanic/Latino studies, and the

study of working class and radicalism.

Learn the Tips, Become One of Those Who Know Building Construction and Architectural Practice, and Thrive! For architectural practice and building design and construction industry, there are two kinds of people: those who know, and those who don't. The tips of building design and construction and project management have been undercover-until now. Most of the existing books on building construction and architectural practice are too expensive, too complicated, and too long to be practical and helpful. This book simplifies the process to make it easier to understand and uncovers the tips of building design and construction and project management. It sets up a solid foundation and fundamental framework for this field. It covers every aspect of building

construction and architectural practice in plain and concise language and introduces it to all people. Through practical case studies, it demonstrates the efficient and proper ways to handle various issues and problems in architectural practice and building design and construction industry. It is for ordinary people and aspiring young architects as well as seasoned professionals in the construction industry. For ordinary people, it uncovers the tips of building construction; for aspiring architects, it works as a construction industry survival guide and a guidebook to shorten the process in mastering architectural practice and climbing up the professional ladder; for seasoned architects, it has many checklists to refresh their memory. It is an indispensable reference book for ordinary people, architectural students, interns, drafters, designers, seasoned architects, engineers, construction administrators, superintendents, construction managers, contractors, and developers. You will learn: 1.How to develop your business and work with your client. 2.The entire process of building design and construction, including programming, entitlement,

schematic design, design development, construction documents, bidding, and construction administration. 3.How to coordinate with governing agencies, including a county's health department and a city's planning, building, fire, public works departments, etc. 4.How to coordinate with your consultants, including soils, civil, structural, electrical, mechanical, plumbing engineers, landscape architects, etc. 5.How to create and use your own checklists to do quality control of your construction documents. 6.How to use various logs (i.e., RFI log, submittal log, field visit log, etc.) and lists (contact list, document control list, distribution list, etc.) to organize and simplify your work. 7.How to respond to RFI, issue CCDs, review change orders, submittals, etc. 8.How to make your architectural practice a profitable and successful business.
