"Game Feel" exposes "feel" as a hidden language in game design that no one has fully articulated yet. The language could be compared to the building blocks of music (time signatures, chord progressions, verse) - no matter the instruments, style or time period - these building blocks come into play. Feel and sensation are similar building blocks whe

At the start of the 21st century, fighting poverty and protecting the environment are two of the most urgent challenges facing the international community. Environmental changes will jeopardize people's survival to an even greater extent in the future, and will hit the poor hardest. To meet these challenges, it will be essential to breathe new life into the partnership between industrialized and developing countries. It will be equally essential to combine poverty reduction with environmental protection in an integrated policy structure spanning all levels from local to global. In this report, the German Advisory Council on Global Change (WBGU) shows that global environmental policy is a prerequisite for global poverty reduction. WBGU analyses the relevant policy processes and delivers recommendations charting the way forward. 'With its interdisciplinary approach, providing a complex and systematic analysis of the poverty-environment nexus, WBGU's latest report breaks new ground. Indira Gandhi's old, convenient maxim was 'Poverty is the biggest polluter'. Put forward at the 1972 UN Conference on the Human Environment in Stockholm, it has been sorely misused ever since to override environmental precaution and prioritize economic development strategies instead. The new WBGU report maps out a way to shape a coherent environment and development policy. This report revitalizes the Rio spirit and gives it a robust scientific base'. Prof Dr Ernst Ulrich von Weizsäcker, Member of the German Bundestag (MdB)

This handbook is a companion to NPR 7120.5E, NASA Space Flight Program and Project Management Requirements and supports the implementation of the requirements by which NASA formulates and implements space flight programs and projects. Its focus is on what the program or project manager needs to know to accomplish the mission, but it also contains guidance

that enhances the understanding of the high-level procedural requirements. (See Appendix C for NPR 7120.5E requirements with rationale.) As such, it starts with the same basic concepts but provides context, rationale, guidance, and a greater depth of detail for the fundamental principles of program and project management. This handbook also explores some of the nuances and implications of applying the procedural requirements, for example, how the Agency Baseline Commitment agreement evolves over time as a program or project moves through its life cycle.

(a) Design and construction. (1) Each facility or part of a facility constructed by, on behalf of, or for the use of a public entity shall be designed and constructed in such manner that the facility or part of the facility is readily accessible to and usable by individuals with disabilities, if the construction was commenced after January 26, 1992. (2) Exception for structural impracticability. (i) Full compliance with the requirements of this section is not required where a public entity can demonstrate that it is structurally impracticable to meet the requirements. Full compliance will be considered structurally impracticable only in those rare circumstances when the unique characteristics of terrain prevent the incorporation of accessibility features. (ii) If

full compliance with this section would be structurally impracticable, compliance with this section is required to the extent that it is not structurally impracticable. In that case, any portion of the facility that can be made accessible shall be made accessible to the extent that it is not structurally impracticable. (iii) If providing accessibility in conformance with this section to individuals with certain disabilities (e.g., those who use wheelchairs) would be structurally impracticable, accessibility shall nonetheless be ensured to persons with other types of disabilities, (e.g., those who use crutches or who have sight, hearing, or mental impairments) in accordance with this section.
