This book is designed to serve as a clear and concise clinical manual that covers all aspects of the current management of gingival recession, with a particular focus on surgical techniques with the adjunctive use of autogenous tissues or soft tissue substitutes for recession coverage. A structured overview of the various surgical techniques is provided with the aid of high-quality illustrations, delivering an evidence-based clinical treatment guideline. In addition, individual chapters are dedicated to the classification of gingival recession, etiology and prevalence, clinical examination and diagnosis, decision making, potential complications, and postsurgical care. Gingival recession is a common condition in the adult population and is related to

several undesirable conditions such as unaesthetic appearance, root caries, and hypersensitivity. Periodontal plastic surgery is now an important tool in the armamentarium of the clinician treating gingival recessions, and practitioners at all levels will find this book to be an invaluable source of guidance.

National Geographic Books

Power in the Village explores the formation of late-nineteenth-century Italian rural society in southern Brazil, through an examination of how Italian peasants in northern Italy and southern Brazil solved issues related to family honor. Looking specifically at social networks and justice practices to examine the kind of rationality that ruled individual and family behaviors, the book offers an understanding of the restoration of social balance in these communities, and explores the culture of

immigrants, particularly in issues related to honor and morality. Taking as a case study the ambush and murder of a parish priest, Antonio Sorio, in January 1900 in Silveira Martins, a small town of Italian immigrants, Vendrame offers a reinterpretation of the society of Italian immigrants in southern Brazil. She argues that rather than being an idyllic picture of a homogeneous and harmonious society, the colonial settlements were places pervaded by tension, solidarity and self-interest, which guided individual and collective behavior. This book will be of great interest to scholars working in Italian history, Brazilian history, immigration history and the history of colonialism. It will also be of interest to scholars working on ethnographic and religious history, as well as to social anthropologists.

A nursing reference letter is a type of composed correspondence that affirms a medical caretaker's abilities, capabilities, demeanor and experience. This letter is normally composed by a previous manager, partner or instructor. It shows that the nursing candidate is excellent to work with and did a good job. In addition, it informs the person receiving the letter of the reasons why they ought to hire the candidate and provides examples of how they contributed to the success of previous positions. A nurse reference letter may be required for admission to a

master's program if you want to continue your education. Usually, this kind of letter should be written by a former teacher. However, you can get a reference from any coworker or employee. These kinds of letters will zero in favoring the medical attendant's instructive foundation and utilization of basic abilities acquired in their undergrad program.

Pocket Guide for the Home Care Aide is the perfect everyday reference when working with patients in their homes. It serves as a resource to address the unique needs of the home care aide as an integral part of the home care organization. The pocket guide provides an overview of the essential elements of orientation for the home health aide, as well as self analysis and development tools. It provides procedures for basic home health aide skills and gives information about the most common home health diagnoses.

Primary Care Routledge

The definitive career guide for grad students, adjuncts, post-docs and anyone else eager to get tenure or turn their Ph.D. into their ideal job Each year tens of thousands of students will, after years of hard work and enormous amounts of money, earn their Ph.D. And each year only a small percentage of them will land a job that justifies and rewards their investment. For every comfortably tenured professor or well-paid former academic, there are countless underpaid and overworked adjuncts, and many more who simply give up in frustration. Those who do make it share an important asset that separates them from the pack: they have a plan. They understand exactly what they need to do to set

themselves up for success. They know what really moves the needle in academic job searches, how to avoid the all-too-common mistakes that sink so many of their peers, and how to decide when to point their Ph.D. toward other, non-academic options. Karen Kelsky has made it her mission to help readers join the select few who get the most out of their Ph.D. As a former tenured professor and department head who oversaw numerous academic job searches, she knows from experience exactly what gets an academic applicant a job. And as the creator of the popular and widely respected advice site The Professor is In, she has helped countless Ph.D.'s turn themselves into stronger applicants and land their dream careers. Now, for the first time ever, Karen has poured all her best advice into a single handy guide that addresses the most important issues facing any Ph.D., including: -When, where, and what to publish -Writing a foolproof grant application -Cultivating references and crafting the perfect CV -Acing the job talk and campus interview -Avoiding the adjunct trap -Making the leap to nonacademic work, when the time is right The Professor Is In addresses all of these issues, and many more.

Power in the Village Independently Published

Home health care, as an organized entity in the continuum of health care in the U.S., is a fairly new phenomenon. Geriopharmacotherapy in Home Health Care looks at the state of the pharmaceutical arena in home health care. With origins in a federally funded grant program, five state programs--North Carolina, Hawaii, Mississippi, South Carolina, and Utah--have evolved into a progressively interactive group, with certain common problems and perceptions across states, both in

medications and other programmatic concerns. The contributing authors of this book examine several of these problems and concerns in detail. Each chapter assists readers in understanding the pharmaceutical endeavors undertaken through the initiative and creativity of these state-funded home health programs, which are still developing and growing. There are multiple concerns about the impact of medication on patients cared for by home health care workers, among them, the high incidence of chronic diseases, debilitating illnesses, and the potential for adverse reactions to medication. Several of the topics explored in detail include: a critical analysis of the medications patients consume how to clinically critique problems and seek interventions to remedy therapeutic and clinical problems survey results on pharmaceutical services from home health agencies in North Carolina needed modifications in available computer software to provide optimal computer capabilities for consultant pharmacy services an examination and comparison of several software programs for practicality and logistical capabilities Geriopharmacotherapy in Home Health Care documents the outgrowth of program innovation and the creativity of five states' current status of home health care pharmacy. With continued tremendous growth in the elderly population, the demands on home health care will continue to grow dramatically for years to come. Home health care professionals--nurses,

nurses aids, consultant pharmacists, agency directors and workers--will find the developments in this book informative as they increase and improve the services available to homebound elderly.
