World War I created a set of forces that affected the political arrangements and economies of all the countries involved. This period in global economic history between World War I and II offers rich material for studying international monetary and sovereign debt policies. Debt and Entanglements between the Wars focuses on the experiences of the United States, United Kingdom, four countries in the British Commonwealth (Australia, New Zealand, Canada, Newfoundland), France, Italy, Germany, and Japan, offering unique insights into how political and economic interests influenced alliances, defaults, and the unwinding of debts. The narratives presented show how the absence of effective international collaboration and resolution mechanisms inflicted damage on the global economy, with disastrous consequences.

Der erste Teil bietet eine kritische Gesamtschau unseres Wissens und zugleich eine Einführung in das Studium der altassyrischen Epoche (die ersten beiden Jahrhunderte des 2. Jahrtausends), wie wir sie durch Entdeckungen in Assur und die Keilschriftarchive der altassyrischen Händler kennen, die in der Handelskolonie (genannt Karum) in der Unterstadt des alten Kanesh (moderne Kültepe) in Zentralanatolien lebten. Die ersten Kapitel bestimmen, was "altassyrisch" ist und analysieren die Chronologie und die verfügbaren archäologischen und

schriftlichen Quellen. Darauf folgt eine kritische Darstellung der Veröffentlichungen zu den altassyrischen Quellen. Nach einem Abriss der Altassyrischen Geschichte folgt ein Überblick zur "anatolischen Situation", der die Stämme, lokale Herrscher und die rund vierzig altassyrischen Handelsniederlassungen in Nordmesopotamien und Anatolien behandelt. Ein eigenes Kapitel ist den wichtigen altassyrischen Handelsverträgen gewidmet. Der zweite Teil fasst die jüngsten Erkenntnisse zur Geschichte Nordsyriens zeitgleich mit der spätesten Phase des altassyrischen Handels zusammen. Der ausführlichen Untersuchung der Quellen ist ein Appendix der wichtigsten Texte beigefügt. Das Buch ist durch umfassende Indices erschlossen und enthält eine ausführliche Bibliographie.

The Moto Guzzi Story is a story of survival. As one of Italy's oldest, and most legendary marques, Moto Guzzi had seen the height of success during the 1930s, and then the 1950s when they dominated 250 and 350cc Grand Prix racing. Their withdrawal from racing coincided with a period of stagnation until the company was sold to De Tomaso in 1973. During the 1970s the V7 Sport and Le Mans were at the forefront of the new superbike era, and later, with Dr John Wittner's help, embraced contemporary technology with the 1000cc Daytona. If one aspect characterises Moto Guzzi it is continuity. The great 500cc Falcone single ran from 1950 until 1976, and the V7, originally seeing the light of day in 1967, continued well into the 2010s. This continuity breeds loyalty, and Guzzi owners are a fiercely proud breed. Guzzis are not like other motorcycles, even Italian ones, and to qualify as a Guzzi owner requires a dedication and individuality that will be rewarded in a long term relationship. Other titles by Ian Falloon include Moto Guzzi Sport Bible, Moto Guzzi Big-Twins Essential Buyers Guide, the Complete Book of Moto Guzzi, Honda

Story, Kawasaki Story, BMW Story and The Ducati Story. He also has his own collection of motorbikes, including a 1973 Moto Guzzi V7 Sport.

Becoming Adult, Becoming Christian Penguin

The collection focuses on the advancements of characterization of minerals, metals, and materials and the applications of characterization results on the processing of these materials. Advanced characterization methods, techniques, and new instruments are emphasized. Areas of interest include, but are not limited to: · Novel methods and techniques for characterizing materials across a spectrum of systems and processes. · Characterization of mechanical, thermal, electrical, optical, dielectric, magnetic, physical, and other properties of materials. · Characterization of structural, morphological, and topographical natures of materials at micro- and nano- scales. · Characterization of extraction and processing including process development and analysis. · Advances in instrument developments for microstructure analysis and performance evaluation of materials, such as computer tomography (CT), X-ray and neutron diffraction, electron microscopy (SEM, FIB, TEM), and spectroscopy (EDS, WDS, EBSD) techniques. · 2D and 3D modelling for materials characterization. The book explores scientific processes to characterize materials using modern technologies, and focuses on the interrelationships and interdependence among processing, structure, properties, and performance of materials.

"This thesis refutes the generally accepted claim within Generative Grammar that English there is an expletive (meaningless element) that is only present to satisfy a syntactic requirement. Instead it is argued that there is a proform that picks up a situation (or location) from the context. There is a part of the predication structure in existential sentences, which state

about the situation that it contains an individual (or amount of a property) specified by the postverbal noun phrase. New data that are relevant for the definiteness effect are presented and it is demonstrated that we need to distinguish between two types of there-sentences: the results of a Magnitude Estimation Experiment for example show that these so-called there-BE and there-V sentences behave differently with respect to wh-movement (among other differences). Therefore, the two construction types are analysed differently: in there-BE sentences, there is proposed to function as the subject of predication, whereas it functions as the predicate in there-V sentences (just like in the locative inversion construction). The thesis concludes with applying the result of the investigation of English there to German da, and shows that also da is a proform that can pick up locations, times and complex situations in the context. The study offers new insights into the analysis of existential sentences and has implications for the analysis of potential subject positions, the EPP, and the classification of expletives in the Germanic languages. It is therefore interesting for scholars working in these fields and syntax in general."--P. [4] of cover.

The Political Economy of Reproduction in Japan Intellect (UK)
This book analyzes the political economy of reproduction and its role in the process of Japanese modernization. Hiroko analyzes state attempts and policies to intervene into women's bodies and everyday lives to integrate them into the Japanese political economy. Based on Foucault's concept of governmentality the author develops a model to assess reproduction in three forms - economic, biological and socio-political - from 1868 until the present day.

This is a seminal text uniquely dedicated to oral hard tissue pathology, presenting the growth of clinical knowledge and advancement in the field in recent years. Starting with a discussion of numerical and formative anomalies and unusual eruption, the book goes on to consider caries, erosion, resorption and toothwear, as well as tooth fractures and discolouration, and ends with a chapter on congenital syndromes with dental anomalies. Pathology of the Hard Dental Tissues is an invaluable reference for specialist practitioners and researchers as well as dental students, combining a scholarly overview of the field with

clinical management protocols. Includes prevention techniques as well as treatment regimes Contains many colour clinical photographs Accompanied by a large number of references Provides helpful tables to categorise the causes and characteristics of lesions Written by a leading expert in the field Fetish Rising Stars

A gripping, nail-biting thriller... Makedde Vanderwall, part-time model and forensic psychology student always attracts the wrong type of man. When she travels to Sydney on assignment and finds her best friend murdered, she soon discovers a deadly puzzle of suspicious photographers, hired thugs, mysterious lovers and the handsome, jaded Detective Andy Flynn investigating the Stiletto Murders - the most violent serial killings Australia has ever known. In her quest to uncover the truth behind her best friend's murder, Mak falls headlong into a deadly game of cat and mouse, unaware she has become the obsession of a sadistic psychopath. When a photo from her portfolio disappears, her borrowed flat is ransacked and Andy Flynn suddenly goes underground, Mak knows she must run. But where can she go and to whom can she turn? Mak has scratched the seedy underbelly of a foreign city and is driven into a corner, an evil place where, for her own well-being and state of mind, she must suspect everyone and everything... the first book in the Mak Vanderwall series, FETISH is followed by SPLIT, COVET, HIT, SIREN and ASSASSIN.

Science and Colonial Expansion Saint-Paul
This collection gives broad and up-to-date results in the research and development of materials characterization and processing. Coverage is well-rounded from minerals, metals, and materials characterization and developments in extraction to the fabrication and performance of materials. In addition, topics as varied as structural steels to electronic materials to plant-based composites are explored. The latest research presented in this wide area make this book both timely and relevant to the materials science field as a whole. The book explores scientific processes to characterize materials using modern technologies, and focuses on the interrelationships and interdependence among processing, structure, properties, and performance of materials. Topics covered include ferrous materials, non-ferrous materials, minerals, ceramics, clays, soft materials, method development, processing, corrosion, welding, solidification, composites, extraction, powders, nanomaterials, advanced materials, and

several others.

In this updated reissue of his 1984 classic, James Fowler applies his groundbreaking research on the development of faith to Christianity. In his revised first chapter Fowler locates his approach to the study of human and faith development in relation to the contemporary conversation about identity and selfhood in postmodernity. Fowler invites readers to explore what it means to find and claim vocation: a purpose for one's life that is part of the purposes of God. Reclaiming covenant and vocation as ideals for responsible, mature, Christian selfhood, Fowler shows how a dynamic understanding of what vocation involves can both inform and transform lives.

Jimmy Reilly has always protested his innocence, and Jeremy Scott, his lawyer, has always believed him. He's convinced that the case against Reilly will collapse, that he'll leave court as a free man. But there's a loophole in the law, and Reilly falls right through it. Even the jury is stunned by what they, unwittingly,

have done to him. Yet persistently denying the charges, he is denied any help. Scott, furious at the failings of his own profession, steps outside its parameters to investigate the case himself—and slides straight into a world that both mirrors and mocks the judicial system. A parallel universe populated by cops, ex-cons, and court reporters—people who, for a price, will “fix” cases of child abuse and sexual assault. And other people who pay that price with their lives.

Exile's Return Springer

This Handbook is the first major volume to examine the conservation of Asia's culture and nature in relation to the wider social, political and economic forces shaping the region today. Throughout Asia rapid economic and social change means the region's heritage is at once under threat and undergoing a revival as never before. As societies look forward, competing forces ensure they re-visit the past and the inherited, with the conservation of nature and culture now driven by the broader agendas of identity politics, tradition, revival, rapid development, environmentalism and sustainability. In response to these new and important trends, the twenty three accessible chapters here go beyond sector specific analyses to examine heritage in interdisciplinary and critically engaged terms, encompassing the natural and the cultural, the tangible and intangible. Emerging environmentalisms, urban planning, identity politics, conflict memorialization, tourism and biodiversity are among the topics covered here. This path-breaking volume will be of particular interest to students and scholars working in the fields of heritage, tourism, archaeology, Asian studies, geography, anthropology, development, sociology, and cultural and postcolonial studies.

This thesis presents an experimental study of ordering phenomena in rare-earth nickelate-based heterostructures by means of inelastic Raman light scattering and elastic resonant x-ray scattering (RXS). Further, it demonstrates that the amplitude

ratio of magnetic moments at neighboring nickel sites can be accurately determined by RXS in combination with a correlated double cluster model, and controlled experimentally through structural pinning of the oxygen positions in the crystal lattice. The two key outcomes of the thesis are: (a) demonstrating full control over the charge/bond and spin order parameters in specifically designed praseodymium nickelate heterostructures and observation of a novel spin density wave phase in absence of the charge/bond order parameter, which confirms theoretical predictions of a spin density wave phase driven by spatial confinement of the conduction electrons; and (b) assessing the thickness-induced crossover between collinear and non-collinear spin structures in neodymium nickelate slabs, which is correctly predicted by drawing on density functional theory.
