ROGERS MARKS

The Correspondence of Charles Darwin: Cambridge University Press

Includes more than 40,000 entries and 50,000 definitions, giving tips on spelling, confusable words, and usage.

Cambridge IGCSE Mathematics Core and Extended Coursebook with CD-ROM Oxford University Press Philip Webb was a British architect known as a founder of the Arts and Crafts movement and also a key member of the Pre-Raphaelite circle. He had a long association with William Morris and was responsible for the design of the hugely influential Red House, Morris's first home. Webb's letters will be of interest to art and architecture historians.

The University of Cambridge: From the earliest times to the royal injunctions of 1535 Oxford University Press, USA

An easy-to-use dictionary containing 90,000 up-to-date words, phrases, and definitions.

Compact Oxford-Hachette French Dictionary Oxford University Press, USA

This volume is part of the definitive edition of letters written by and to Charles Darwin, the most celebrated naturalist of the nineteenth century. Notes and appendixes put these fascinating and wide-ranging letters in context, making the letters accessible to both scholars and general readers. Darwin depended on correspondence to collect data from all over the world, and to discuss his emerging ideas with scientific colleagues, many of whom he never met in person. The letters are published chronologically: volume 24 includes letters from 1876, the year in which Darwin published *Cross and Self Fertilisation in the Vegetable Kingdom*, and started writing *Forms of Flowers*. In 1876, Darwin's daughter-in-law, Amy, died shortly after giving birth to a son, Bernard Darwin, an event that devastated the family. The volume includes a supplement of 182 letters from earlier years, including a newly discovered collection of letters from William Darwin, Darwin's eldest son.

John Viriamu Jones and Other Oxford Memories Oxford University Press

This fully updated edition offers over 120,000 words, phrases, and definitions. It covers all the words you need for everyday use, carefully selected from the evidence of the Oxford English Corpus, a databank of 21st century English, containing over 2 billion words. The Factfinder centre section gives quick-reference entries on topics including famous people, countries, and science. Includes 3 months' access to Oxford Dictionaries Pro at oxforddictionaries.com.

Concise Oxford English Dictionary Good Press

Over 40,000 entries and 50,000 definitions fill the pages of this new American edition of the bestselling "Oxford English Minidictionary," which offers authoritative and up-to-date coverage of today's American English.

The University of Cambridge in the Eighteenth Century Routledge

Offers definitions for English words and phrases, along with observations about the evolution of the dictionary since its first edition and tables that contain information for such topics as countries and chemical elements.

Benjamin Disraeli Letters: 1848-1851 OUP Oxford

This volume is part of the definitive edition of letters written by and to Charles Darwin, the most celebrated naturalist of the nineteenth century. Notes and appendixes put these fascinating and wide-ranging letters in context, making the letters accessible to both scholars and general readers. Darwin depended on correspondence to collect data from all over the world, and to discuss his emerging ideas with scientific colleagues, many of whom he never met in person. The letters are published chronologically: volume 26 includes letters from 1878, the year in which Darwin with his son Francis carried out experiments on plant movement and bloom on plants. Francis spent the summer at a botanical research institute in Germany; and father and son exchanged many detailed letters about his work. Meanwhile, Darwin tried to secure government support for attempts by one of his Irish correspondents to breed a blight-resistant potato.

Oxford Mini Thesaurus Springer Science & Business Media

"The Life of Samuel Johnson, LL.D." (1791) is a biography of Dr. Samuel Johnson written by James Boswell. It is regarded as an important stage in the development of the modern genre of biography; many have claimed it as the greatest biography written in English. While Boswell's personal acquaintance with his subject only began in 1763, when Johnson was 54 years old, Boswell covered the entirety of Johnson's life by means of additional research. The biography takes many critical liberties with Johnson's life, as Boswell makes various changes to Johnson's quotations and even censors many comments. Regardless of these actions, modern biographers have found Boswell's biography as an important source of information. The work was popular among early audiences and with modern critics, but some of the modern critics believe that the work cannot be considered a proper biography. James Boswell (1740-1795) was a lawyer, diarist, and author born in Edinburgh, Scotland. He is best known for the biography he wrote of one of his contemporaries, the English literary figure Samuel Johnson, which the modern Johnsonian critic Harold Bloom has claimed is the greatest biography written in the English language.

The Correspondence of Charles Darwin: Oxford University Press, USA

From 1965-1968, I held an Agricultural Research Council Research Fellowship at Christ's College, Cambridge. Later in 1981, when I was a Visiting Fellow in the Department of Biochemistry, University of Cambridge and renewed my contacts with Christ's College, my friend and colleague David Coombe, a Fellow of Christ's College, informed me that a collection of letters of Charles Darwin had just been - covered in the Library storeroom, underneath the College. I had always

maintained an interest in Charles Darwin, from the early age of thirteen, when I had first read his books, with I might say some difficulty! This collection was the 155 letters of Charles Darwin to his second cousin William Darwin Fox, which had been given in trust to the College, in 1909, by members of the Fox family at the time of the Darwin Centenary celebrations. I was allowed access to these 155 letters and at that time made my own transcriptions. It seemed to me that this was a magnificent account of the lives of two naturalists of the nineteenth century, starting at the time that they were at Christ's together, in 1828, and going to 1880 when W D Fox died - just two years short of the death of Charles Darwin in 1882. Of course this valuable resource had not gone unnoticed before. Darwin's son, Francis Darwin had been given the letters in the 1880s, when he was preparing his *Life and Letters of Charles Darwin* in 3 volumes.

A Collection of Cambridge Examination Papers in Arithmetic, Algebra and Plane Trigonometry Oxford University Press

A series of titles written to cover the complete Cambridge IGCSE Mathematics (0580) syllabus and endorsed by Cambridge International Examinations. This lively textbook, written by an experienced author and teacher, delivers comprehensive coverage of the IGCSE Mathematics syllabus for both Core and Extended courses. Offering a wealth of questions, supported by worked examples and diagrams, with hints and tips along the way to reinforce skills and guide learning. The dynamic and quality text, endorsed by Cambridge International Examinations, has been made available in print and e-book formats. The print book includes a CD-ROM of supplementary materials including interactive revision questions, worksheets, worked solutions and calculator support. These supplementary materials, except the interactive questions, are also included in the e-book version.

The Anglican Revival Cambridge University Press

Originally published in 1978, this is the second of two volumes of the selected letters of George Ernest Morrison, The Times correspondent in China in the late Imperial and early Republican period. Few people were in a better position to observe and comment on the events of those years. The first volume of *Correspondence* ends with the revolution and the collapse of the Manchu dynasty in 1912. The second volume covers Morrison's career as political advisor to the first President of the Republic of China until his death in 1920.

The Letters of Philip Webb University of Toronto Press

The latest volume in the critically acclaimed *Letters of Benjamin Disraeli* series contains or describes 952 letters (778 previously unpublished) written by Disraeli between 1852 and 1856.

The Letters of Philip Webb, Volume IV Oxford University Press

This volume is part of the definitive edition of letters written by and to Charles Darwin, the most celebrated naturalist of the nineteenth century. Notes and appendixes put these fascinating and wide-ranging letters in context, making the letters accessible to both scholars and general readers. Darwin depended on correspondence to collect data from all over the world, and to discuss his emerging ideas with scientific colleagues, many of whom he never met in person. The letters are published chronologically. In 1881, Darwin published his final book, *The Formation of Vegetable Mould through the Action of Worms*. He reflected on reactions to his previous book, *The Power of Movement in Plants*, and worked on two papers for the Linnean Society on the action of carbonate of ammonia on plants. In this year, Darwin's elder brother, Erasmus, died, and a second grandchild, also named Erasmus, was born.

The Pocket Oxford Dictionary and Thesaurus Cambridge University Press

"Based on the New Oxford dictionary of English"--Preface.

Cambridge University Examination Papers Oxford University Press

Philip Webb (1831-1915) was a British architect known as a founder of the Arts and Crafts movement and also a key member of the Pre-Raphaelite circle. He was an important figure in the literary and artistic world of the late-nineteenth century. Webb had a long association, both professionally and personally, with William Morris and his family as well as becoming treasurer of Morris's revolutionary Socialist League. They first met as trainees in the same architect's practice and remained collaborators throughout their lifetimes. Webb was responsible for the design of the hugely influential Red House, the Morris's first home. It was through Morris that Webb became connected with Dante Gabriel Rossetti and Edward Burne-Jones, amongst others. Webb and Morris were also joint founders of the Society for the Protection of Ancient Buildings (SPAB), the first organization to promote conservation rather than intrusive restoration. This comprehensive selection from Webb's surviving letters includes many important and previously unpublished letters to some of his closest associates. They reveal the wide range of his professional and personal interests. These four volumes will be of interest to art and architecture historians, scholars of Victorian history in general and of William Morris and the wider Pre-Raphaelite and Arts and Crafts movements in particular.

Palmer's Index to "The Times" Newspaper Cambridge University Press

A compact, intermediate-level dictionary covering over 90,000 words and phrases, and 120,000 translations ideal for the home, office, or school.
