Re-Visioning Education in Africa El Shaddai Publishers

This Poverty Reduction Strategy Paper for Nigeria highlights the National Economic Empowerment and Development Strategy (NEEDS). NEEDS gives special support to agriculture, industry, small and medium-scale enterprises, and oil and gas. Under the plan, the government will seek long-term capital for investment. Trade policy will be modified to unburden business of the red tape and complex procedures that hinder it from flourishing. NEEDS envisages forging stronger links between educational institutions and industry to stimulate rapid industrial growth and efficient exploitation of resources.

Lonely Days Springer Science & Business

In Indian context.

School Farms Hill and Wang

This book presents the case for a conceptual and pragmatic revolution of Africa's formal educational systems. Using the context of Ubuntu-inspired education, the authors explore innovative ways to tackle the challenges faced by governments from the local and national level and beyond. Along the way, the editors and their contributors examine important policy questions to encourage fresh thinking on ways to improve the educational system and, in turn, to buoy the development of the region as a whole.

First Aid in English Class Reader

OECD Publishing

Winner of the Francis Parkman Prize *Changes in the Land* offers an original and persuasive interpretation of the changing circumstances in New England's plant and animal communities that occurred with the shift from Indian to European dominance. With the tools of both historian and ecologist, Cronon constructs an interdisciplinary analysis of how the land and the people influenced one another, and how that complex web of relationships shaped New England's communities.

Corporate Governance of State-Owned Enterprises A Survey of OECD Countries
Springer Nature

Stakeholders show a growing interest for organic food and farming (OF&F), which becomes a societal component. Rather than questioning whether OF&F outperforms conventional agriculture or not, the main question addressed in this book is how, and in what conditions, OF&F may be considered as a prototype towards sustainable agricultures. The book gathers 25 papers introduced in a first chapter. The first section investigates OF&F production processes

and its capacity to benefit from the systems functioning to achieve higher self-sufficiency. The second one proposes an overview of organic performances providing commodities and public goods. The third one focuses on organics development pathways within agri-food systems and territories. As well as a strong theoretical component, this book provides an overview of the new challenges for research and development. It questions the benefits as well as knowledge gaps with a particular emphasis on bottlenecks and lock-in effects at various levels.

The Saint Routledge

"The bride price of dowry is highly regarded in many cultures. However, it became a taboo for Okpoko when he couldn't complete the bride price for Ngozi. A famous and rich Obiekwe would approach Ngozi's parents for her hand in marriage. Who is the rightful suitor for Ngozi? Will love always overcome the spirit of money and fame? Read this intriguing drama to find out Ngozi's fate; the consequences of the choice she was forced to make." -- Page 4 of cover.

Phenomenology of Bioethics: Technoethics and Lived-Experience
Legare Street Press

The trusted training resource for pharmacy technicians at all levels. The role of pharmacy technicians is rapidly expanding, and demand for well-trained technicians has never been higher! Technicians are assuming more responsibilities and are taking on greater leadership roles. Quality training material is increasingly important for new technicians entering the field, and current technicians looking to advance. Look no further than the new 5th edition of the best-selling Manual for Pharmacy Technicians to master the practical skills

and gain the foundational knowledge all technicians need to be successful.

Baho! Michigan State University Press
Fifteen years ago, Mama said, starting her story, I came to Lagos from Ghana. I came to Nigeria because I was considered an alien in that country. The government of Ghana passed a law asking all aliens without resident permits to regularise their stay in the country'. This story of migration, identities and lives undermined by cynical and xenophobic politics pushed to its logical and terrible conclusion pertains to the Ghanaian orders of 'alien compliance' issued in 1970-1971, which determined to force all non-ethnic Ghanaians, so called illegal immigrants, to return to their - so stipulated - 'home'. The novel thus touches on concerns of deeper relevance to the politics of race and migration of the twenty first century.

Manual for Pharmacy Technicians
Springer

This book introduces a 'Big History' perspective to understand the acceleration of social, technological and

economic trends towards a near-term singularity, marking a radical turning point in the evolution of our planet. It traces the emergence of accelerating innovation rates through global history and highlights major historical transformations throughout the evolution of life, humans, and civilization. The authors pursue an interdisciplinary approach, also drawing on concepts from physics and evolutionary biology, to offer potential models of the underlying mechanisms driving this acceleration, along with potential clues on how it might progress. The contributions gathered here are divided into five parts, the first of which studies historical mega-trends in relation to a variety of aspects including technology, population, energy, and information. The second part is dedicated to a variety of models that can help understand the potential mechanisms, and support extrapolation. In turn, the third part explores various potential future scenarios, along with the paths and decisions that are required. The fourth part presents philosophical perspectives on the potential deeper meaning and implications of the trend towards singularity, while the fifth and last part discusses the implications of the Search for Extraterrestrial Intelligence (SETI). Given its scope, the book will appeal to scholars from various disciplines interested in historical trends, technological change and evolutionary processes.

Selected Writings of Yusuf Bala Usman on Politics and Society Infinite Study

This book examines the construction and articulation of diasporic cultural identity among the Turkish working-class youth in Kreuzberg (Little Istanbul), Berlin. This work primarily suggests that the contemporary diasporic consciousness is

built on two antithetical axes: particularism and universalism. The presence of this dichotomy derives from the unresolved historical dialogues that the diasporic youths experience between continuity and disruption, essence and positionality, tradition and translation, homogeneity and difference, past and future, 'here' and 'there', 'roots' and 'routes', and local and global.

New School Chemistry ASHP

In this paper, neutrosophic soft set was studied and an observation made of the potential of its application in real life problems, multicriteria decision making problems in particular. To achieve some of the underlying goals, there is a need to define certain algebraic operations, namely, restricted intersection, extended intersection and restricted union. Some basic properties emerging from the definitions are presented and they include union, AND-product and OR-product operations. Some De Morgan's laws and the concept of inclusions are also established in neutrosophic soft set context. Some examples of the application of neutrosophic soft set in decision making problems using level soft sets of neutrosophic soft sets were presented. Furthermore, the concept of weighted neutrosophic soft set were discussed and applied to multicriteria decision making problems.

Examination Invigilators Concept Publishing Company

This book offers a unique description of how phenomenology can help professionals from medical, environmental and social fields to explore notions such as interaffectivity, empathy, epoche, reduction, and intersubjective encounter. Written by a group of top scholars, it uniquely covers the relationship between phenomenology and bioethics, and

focuses not only on medical cases, but also on the environment and emerging technologies. This variety of themes, whilst including techno-ethics, environmental ethics, animal ethics, and medical ethics, is conducive to appreciating broadly how phenomenology can improve our quality of our life. Despite its difficult themes, the book appeals to an audience of both academics and professionals who are willing to understand how to increase the quality of care in their professional field. Chapter 8 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

The 21st Century Singularity and Global Futures Springer Nature

Antiquities of the Jews is a historiographical work by Flavius Josephus. It contains an account of history of the Jewish people for Josephus' supporters.

New Oxford secondary english course Transcript Verlag

When Nyamuragi, an adolescent mute, attempts to ask a young woman in rural Burundi for directions to an appropriate place to relieve himself, his gestures are mistaken as premeditation for rape. To the young woman's community, his fleeing confirms his guilt, setting off a chain reaction of pursuit, mob justice, and Nyamuragi's attempts at explanation. Young Burundian novelist Roland Rugero's second novel *Baho!*, the first Burundian novel to ever be translated into English, explores the concepts of miscommunication and justice against the backdrop of war-torn Burundi's beautiful green hillsides.

Organic Farming, Prototype for Sustainable Agriculture Andesite Press

This book highlights the potential of

school farms to fight hunger and malnutrition by providing access to locally produced, fresh, and healthy food as well as providing young students with educational opportunities to learn, interact with nature, and develop their skills. Hunger is one of the most pressing concerns we face today and there is a clear need to provide alternative sources of food to feed a fast-growing population. School farms offer a sustainable opportunity to produce food locally in order to feed underprivileged students who rely on school meals as an integral part of their daily diet. Approaching the concept of school farms through four themes, Problem, People, Process, and Place, the book shows how they can play an essential role in providing sustainable and healthy food for students, the critical role educational institutions can play in promoting this process, and the positive impact hands-on farming can have on students' mental and physical wellbeing. Utilizing the authors' personal hands-on experiences, and drawing on global case studies, the book provides a theoretical framework and practical guidance to help with the establishment of school farms and community-based gardening projects and an education system which promotes a sustainable and healthy approach to food, agriculture, and the environment. This book will be essential reading for students and scholars of food security, agriculture, healthy and sustainable diets, education for sustainable development, and urban studies. It will also be of great interest to practitioners and policymakers involved in food policy, developing school and community projects, global health and international development, as well as education professionals.

Neutrosophic soft set and its application in multicriteria decision making problems

Livestock rearing is an integral part of socio-economic framework of India since time immemorial. Livestock sub-sector being a vital component of agriculture sector, plays a multidimensional role and acts as a tool in achieving nutritional security, employment generation and socio-economic development of rural sector, particularly among the landless, small, marginal farmers and women. India possesses huge livestock population of varying production potentials, distributed across different agro-ecological zones under different operational and livestock holding size. Hence, it requires different package of practices for their management. Further, factors like drivers of development change and climate change pose many challenges to this sector. Farm animal management encompasses integrated and precise application of basic scientific principles of breeding, feeding, heeding and weeding in general as well as in times of specific need. Therefore, an attempt has been made in this book to cover all these basic and applied aspects of livestock management in detail. In the perspective of reorganization of the syllabus of veterinary science and animal husbandry programme. This book is appropriately divided into fifteen s covering almost each and every aspect of livestock production management.

The Antiquities of the Jews

Presents the OECD Guidelines on Corporate Governance of State-Owned Enterprises as well as a comparative overview of main practices and issues related to corporate governance of state-owned enterprises in the OECD area.
