Leonardo Da Vinci and the Pacioli Code Penguin

Leonardo da Vinci and the Pacioli Code by Jerzy K. Kulski was published in 2019 to mark the 500th anniversary of Leonardo's death at 67-years of age on May 2 in Amboise in France. This illustrated (160 images) and referenced book honours and celebrates Leonardo's life and accomplishments in art, science and his philosophy on dialectics, linear perspective, geometric variations, divine proportion, vision, perception and anamorphosis. It highlights and commemorates his friendship with the Franciscan friar and mathematician, Fra Luca Pacioli. The author focuses particularly on the subjects, objects, pictorial codes and hidden messages contained within the mysterious portrait entitled Fra Luca Pacioli and Student that is held at the National Museum of Capodimonte in Naples and officially attributed to the Venetian painter Jacopo de' Barbari. However, this official attribution is questionable because the painting shows all the typical signatures, mysteries, anagrams, geometric proportions, symbols and praxis of Leonardo da Vinci. It is a fantastical Renaissance masterpiece drawn and painted with science, wit, guile and artistry by an innovator communicating with puzzling rebuses and psychological imagery. Kulski describes and analyses the science, mathematics, geometry, symbolism, history and pictorial codification of the portraiture of the Franciscan friar Luca Pacioli, the condottiero and joustier Galeazzo Sanseverino, Leonardo's signature rhombicuboctahedron hanging in space from a red thread, an enigmatic black fly, together with a secretive anagram, IACO. B AR. VIGEN NIS. P.1495, that encodes the political intrigues in the Duchy of Milan during the time of Leonardo da Vinci. The exposition explores Leonardo's 5-year working relationship with Fra Luca Pacioli on Euclidian geometry, regular solids and the divine proportion, together with the support and intrigues of their powerful and rich sponsors, Galeazzo Sanseverino and his father-in-law Ludovico Sforza, the Duke of Milan, who inspired the portraiture. This book is dedicated to the Italian Renaissance art researcher Carla Glori who deciphered the mysterious code associated with the menacing black fly on the yellowed, encrypted cartouche and proved beyond reasonable doubt that the painting originated from the studio of Leonardo da Vinci when he still was entangled in various disputes with his other major art works, The Virgin of the Rocks, The Last Supper, Mona Lisa and the giant equestrian statue known as Colossus. The 21 chapters also contain 160 images and a bibliography of 250 cited books, journal references and Internet web pages.

This study is the first to consider the whole body of Leonardo's works with an eye to a comprehensive interpretation that combines both cultural history and the history of ideas. According to Maiorino, Leonardo's was a mythmaking mode of activity that had a Daedalian range and affected art and technology alike. As both artist and inventor, Leonardo did not separate reason from experience, empiricism from abstraction, an attitude Maiorino characterizes as "Anti-Humanism". Rather than accepting the earlier view that the culture of the Renaissance was divided against itself or that it came to be divided, he argues that anti-Humanism was present from the start in such founders as Petrarch and Alberti and continued to be a current in later authors and artists; hence the significance of Leonardo to Humanism and to Baroque and Renaissance culture at large.

A singular fatality has ruled the destiny of nearly all the most famous of Leonardo da Vinci's works. Two of the three most important were never completed, obstacles having arisen during his life-time, which obliged him to leave them unfinished; namely the Sforza Monument and the Wall-painting of the Battle of Anghiari, while the third—the picture of the Last Supper at Milan—has suffered irremediable injury from decay and the repeated restorations to which it was recklessly subjected during the XVIIth and XVIIIth centuries. Nevertheless, no other picture of the Renaissance has become so wellknown and popular through copies of every description.

De passage à Paris, Robert Langdon, professeur à Havard et spécialiste de symbologie, est appelé d'urgence au Louvre, en pleine nuit. Jacques Saunière, le conservateur en chef a été retrouvé assassiné au milieu de la Grande Galerie. Au côté du cadavre, la police a trouvé un message codé. Langdon et Sophie Neveu, une brillante cryptographe membre de la police, tentent de le résoudre. Ils sont stupéfaits lorsque les premiers indices le conduisent à l'œuvre de Léonard de Vinci. Ils découvrent également que Saunière était membre du Prieuré de Sion, une société secrète dont avaient fait partie Nexton, Boticelli, Léonardo da Vinci, Victor Hugo, et qu'il protégeait un secret millénaire. L'enquête de nos deux héros les entraînera à travers la France et le Royaume-Uni, non seulement pour chercher une vérité longtemps cachée concernant la Chrétienté, mais également pour échapper à ceux qui voudraient s'emparer du secret. Pour réussir, il leur faut résoudre de nombreuses énigmes, et vite, sinon le secret risque d'être perdu à tout jamais. Traduit de l'anglais par Daniel Roche

"Studying nature with passion, and all the independence proper to his character, he could not fail to combine precision with liberty, and truth with beauty. It is in this final emancipation, this perfect mastery of modelling, of illumination, and of expression, this breadth and freedom, that the master's raison d'être and glory consist. Others may have struck out new paths also; but none travelled further or mounted higher than he." (Eugène Müntz)

Mary Magdalene was the wife of Jesus Christ. When he was crucified a pregnant Mary Magdalene fled to France escaping persecution. In the country that offered her refuge, she gave birth to Sarah. Sarah's descendants became the Merovingian dynasty. The Vatican has done, and still does, everything in its power to conceal this truth, but Christ's descendants have had their own allies from the beginning in the Knights Templar and the Priory of Sion.

Did the the church engage in a cover up to make religion as a revelation ? And are the facts in the Genesis and the Exodus did really happened ? And even more does the modern man belong to a single prehistoric ancestor ? The Sacred Code was kept until now, the historical events described in the Da Vinci Code revealed with astonishing facts that the Holy Bible is actually the Holy Grail, a testament from the Egyptian Book of the Dead that define the Mary bloodline. Leonardo Da Vinci artworks alongside the greatest stories ever told such as the Iliad and the Odyssey by Homer and the Divine Comedy by Dante are in fact, very much a revelation of the Mary bloodline . Flavio Davito offers an accurate background of historical facts and determined the source of The Sacred Code which separates the Mary bloodline from a previous civilization and bringing to light that the Darwinian theory is not the Genesis of the new human race.

This new Great collection of his art and notes from Cheapest Books. Put together all notes and drawings of Da Vinci as found, not need reordered. A singular fatality has ruled the destiny of nearly all the MOST FAMOUS OF LEONARDO DA VINCI'S WORKS. Two of the three most important were never completed, obstacles having arisen during his life-time, which obliged him to leave them unfinished; namely the Sforza Monument and the Wall-painting of the Battle of Anghiari, while the third—the picture of the Last Supper at Milan—has suffered irremediable injury from decay and the repeated restorations to which it was recklessly subjected during the XVIIth and XVIIIth centuries. Nevertheless, no other picture of the Renaissance has become so wellknown and popular through copies of every description. Vasari says, and rightly, in his Life of Leonardo, "that he laboured much more by his word than in fact or by deed", and the biographer evidently had in his mind the numerous works in Manuscript which have been preserved to this day. To us, now, it seems almost inexplicable that these valuable and interesting original texts should have remained so long unpublished, and indeed forgotten. It is certain that during the XVth and XVIIth centuries their exceptional value was highly appreciated. This is proved not merely by the prices which they commanded, but also by the exceptional interest which has been attached to the change of ownership of merely a few pages of Manuscript. Leonardos literary labours in various departments both of Art and of Science were those essentially of an enquirer, hence the analytical method is that which he employs in arguing out his investigations and dissertations. The vast structure of his scientific theories is consequently built up of numerous separate researches, and it is much to be lamented that he should never have collated and arranged them. His love for detailed research—as it seems to me—was the reason that in almost all the Manuscripts, the different paragraphs appear to us to be in utter confusion; on one and the same page, observations on the most dissimilar subjects follow each other without any connection. A page, for instance, will begin with some principles of astronomy, or the motion of the earth; then come the laws of sound, and finally some precepts as to colour. Another page will begin with his investigations on the structure of the intestines, and end with philosophical remarks as to the relations of poetry to painting; and so forth. Leonardo himself lamented this confusion, and for that reason I do not think that the publication of the texts in the order in which they occur in the originals would at all fulfil his intentions. No reader could find his way through such a labyrinth; Leonardo himself could not have done it. Added to this, more than half of the five thousand manuscript pages which now remain to us, are written on loose leaves, and at present arranged in a manner which has no justification beyond the fancy of the collector who first brought them together to make volumes of more or less extent. Nay, even in the volumes, the pages of which were numbered by Leonardo himself, their order, so far as the connection of the texts was concerned, was obviously a matter of indifference to him. The only point he seems to have kept in view, when first writing down his notes, was that each observation should be complete to the end on the page on which it was begun.

Not only was Leonardo da Vinci (1453-1519) an astonishing painter, but also a scientist, anatomist, sculptor, architect, musician, engineer, inventor, and more. The question is rather, what was he not? During the Italian Renaissance, he mastered the most beautiful works of art for the Medicis' in Italy

and for the King of France. He aroused admiration from his contemporaries, who depicted a universal genius, curious and virtuous. Even today, interest in da Vinci and his work does not fade; his works and writings are still studied by foremost experts hoping to decipher one of the numerous secrets of this visionary artist. Studying nature with passion, and all the independence proper to his character, he could not fail to combine precision with liberty, and truth with beauty. It is in this final emancipation, this perfect mastery of modelling, of illumination, and of expression, this breadth and freedom, that the master's *raison d'être* and glory consist. Others may have struck out new paths also; but none travelled further or mounted higher than he.
